Lamar prefers Bayard. So do thousands of intelligent Southerners. Bayard or Hancock are now the Southern favorites.

What is the matter with the edi tors? One got cowhided recently. and another killed his man. There would have been an eternal fitness in the arrangement if the cowhided man had done the killing.

The South is held responsible for the Ohio catastrophe. With so many to do the lying against the South, and so many to believe the lies, how could it be otherwise. But m New York and elsewhere it is said that the "soft-money oraze" did it.

Governor Jarvis made a brief peech at the meeting of the thirteen Governors in Philadelphia, in second ng the resolutions relative to the Yorktown celebration, introduced by Mr. Glennan, of the Norfolk Virginian. We find the outline of the re marks thus reported in a special to he Richmond Dispatch:

"Governor Jarvis, in seconding the res olutions, said that coming from a State that had drafted the first Declaration of Independence, he but reflected the unanimous entiment of his people that this celebration might be a grand success. One hundred years ago but one sentiment animated the eople of this country, and that was a deire for the success of the struggle in which they were engaged, and he hoped that now, s one united country, we would do what we could to obliterate the bitter memories of the past, and to make the stars and tripes float over not only a prosperous, but united country.'

General Mite and Major Atom are n Richmond. The General is a man of vast proportions. He makes the beam kick at nine pounds. He is veteran of many years, having attained to his fifteenth year. "Majah" is a veteran too, and won his spurs since the "late onpleasantness." He has arrived at his tenth year, and, sithough the junior of the General, goes his nine pounds and three better. Altogether it is a heavy

team. The General expects to be in Grant's Cabinet. The "Majah" is on furlough at present, but if the Utes do not behave themselves he will "take a hand."

Dun, Barlow & Co.'s circular shows that for the last quarter there were 1,262 failures, with liabilities aggregating \$15,275,550, against 2,853 failares, aggregating \$66,378,363, for the corresponding time of last year. For the nine months of 1879 the total failures are 5.320, representing \$81, 054,940 liabilities, against 8,678 failures, with liabilities of \$197,211,129, for the first nine months of 1878. This shows a great reduction in failures. The outlook is encouraging. The panic is over and we may expect steady but gradual improvement.
