At least four hundred clergymen attended the funeral services of the late Rev. Dr. William Adams, in New York.

Dr. G. W. Bagby, of Virginia, is at least 100 feet high. Hurrah for the author of a series of excellent letters appearing in the Baltimore Sun entitled "New England by the Back Door."

The New York Herald latterly appears to be leaning towards Garfield. But no one could ever foretell one day what the Herald would do or say the next day.

Gen. A. A. Torbert, lost on the City of Vera Cruz, was a native of New Jersey, a graduate of West Point, and a cavalry commander in the West under Grant.

There was a big Democratic demonstration in Philadelphia on Friday night. Among the speakers was Mr. Randall, who replied to Secretary Sherman on the Southern war claims bugaboo. It was most effective and complete.

The Republicans say Philadelphia will give a larger majority than ever for their party. Very likely, as no city in the world ever gave as many fraudulent votes as the "City of Brotherly Love." It gave more votes by some 20,000, we think it was, than New York gave with 200,-000 more inhabitants.

The Norfolk (Va.) Cotton and Knitting Factory was burnt a few days ago. The stockholders are so well pleased with their experiment that they will rebuild at once and increase the capital stock to \$100,000. The STAR months ago urged the capitalists of Wilmington to erect a knitting factory here. It would pay.

Forney's Progress, Ind. Rep., thinks Hancock's election certain already. It gives him the South, New York, New Jersey and Connecticut -188 votes. Necessary to elect 185. It then gives as "more than probable for Hancock," Indiana 15, Ohio October 5th, the Judge will speak as the representative of the State at King's Mountain. Judge Fowle has 22, Pennsylvania 29, California 6, Oregon 3-total, 75; added to 188

also accepted invitations to speak in the counties of Edgecombe, Robeson and Franklin, but the dates of his Jupiter is now our evening starbright and beautiful. There is a brilliant astronomical feature to occur this month. The Providence Journal 88 ys:

"September records an event of noteworthy interest on its planetary annals, for on the 25th occurs the long-anticipated and much-dreaded epoch, the perihelion of Jupiter. Our giant brother then reaches his nearest point to the sun, and is also within a few days of his opposition or nearest point to the earth. But while the earth at perihelion is only 3,000,000 miles nearer the sun than at aphelion, Jupiter comes at that epoch 46,000,000 miles nearer the great central orb. He is then, however, more than 450,000,000 miles from the sun -fortunately far enough away to counteract and mollify the increased force of attraction between two such mighty masses."

VOL. XXVI.--NO. 144.

"Colonel Thomas Hart Benton, for thirty

years a distinguished United States Senator

from Missouri, and who was a Titan among

the intellectual giants of his day," writes a correspondent of the Baltimore Gazette,

would never allow his name to be used as

upon his person, concealed in his cravat.

In the light of subsequent events 'Old Bul-

lion' appears to have been over fastidious.

Were he living to-day the aforesaid youth-

ful indiscretion would be considered by his

political friends as a mere diminutive speck

with Col. Benton than the above

account indicates. He was a boy,

was at the University of North

Carolina, was charged with theft,

was expelled from the Philanthropic

Society, and when young left the

State and became one of the com-

manding intellects of his time. There

was no ground for supposing him

innocent. His school-mates and

friends of the same literary society

would never have disgraced him with

an expulsion if there had been rea-

sonable grounds for believing him

innocent. He may have outgrown

the weakness of making a mistake as

to mine and thine, and we suppose

this was the last, if not the only,

theft he ever perpetrated, as in a

long political career we do not think

his personal honesty was ever in-

volved. It was a sad case of

"youthful indiscretion," to put it

mild. Col. Benton was born about

three miles from Hillsboro, Orange

- Reidsville Times: Orange Pres-bytery is in session here. This is the 241st session here. It first assembled over one hundred years ago at Hawfields Church, in Alamance. There will be several interesting questions put before the session, not the least of which is the dividing of the Presbytery, making an East Orange and West Orange. But it will hardly be acted on at this session.

- Raleigh News: An entirely novel sight will be presented at our State Fair, October 18 to 23, next, in the exhibition, for the benefit of all interested in fine poultry, of the Novelty Incubator. In this curious apparatus chickens are hatched by steam, the full process of hatching, from the first pip of the egg, until the chickens emerges from the shell, being exposed to full view. After the chickens are hatched they are cared for by an artificial mother, which is a sight of much interest.

- Chapel Hill Ledger: Died, near Chapel Hill, Sunday afternoon, Aug. 29th, at 8 o'clock, Benton Utley, in the 69th year of his age. Mr. Utley was in town last Saturday and voted in the primary election. Late in the afternoon he left Windsor by P. H. Winston, Sr., one town, and through the kind asssitance of Mr. Adley Andrews, who took him out of town in his wagon, he reached the home of his sister, Mrs. Strain, living some two miles from town. The Railroad Combination. The combination entered into by the Richmond & Danville corporation and the Coast Line seems to be exciting a good deal of interest about Augusta and other Southern points, but newspapers have not been able to get hold of all the facts in the case. The Augusta Evening News says :

"These two great rival lines will now be controlled by the same officers, and run schedules to equalize the vast business from and to the North in the passenger and

freight departments. "This is one of the largest and most powerful railroad combinations of the day, and controls all the land avenues from the North through this section. What portions of the road will be made trunk lines or the regular through line is not known, but for the Florida travel both routes through Augusta and the Coast Line through Charleston and Savannah will be principally

The Charlotte Observer has the following

in reference to the matter : "It appears to considered likely by persons here in Charlotte that the greater part of the passenger business will be done over the route by this city. It is shorter, in the first place, and besides this, it is known that the Richmond & Danville Railroad proper-or the line from Richmond to Charlotte-will put on a fast train to carry the United States mail, and this will enable the Central Short Line—composed of the Richmond & Danville and Charlotte, Columbia & Augusta-to make much quicker time than they have ever made before to all Southern points. The other route, con-necting with Norfolk steamers, has special facilities for shipping freight, and it is thought will on this account be given the

larger portion of it." Boller Explosion at Tolsnot.

We learn from our friend Hobgood, of the Sunny Home, that the steam boiler attached to the saw, grist and planing mills of R. J. Taylor, at Toisnot, N.C., exploded Saturday morning, at 6 o'clock, dangerously injuring Ed. Whitehurst and Wiley Batts, colored, the two firemen. Batts was badly bruised and cut up, while Whitehurst is bruised and badly scalded. Fortunately, these parties were the only ones at the mill at the time. The buildings are total wreck. MRS. WINSLOW'S SOOTHING SYRUP.—Rev Freeman":—We would by no means recommend any kind of medicine which we did not know to be any kind of medicine which we did not know to be good—particularly for infants. But of Mrs. Winslow's Soothing byrup we can speak from knowledge; in our own family it has preved a blessing indeed, by giving an infant troubled with colic pains, quiet sleep, and its parents unbroken rest at night. Meet parents can appreciate these blessings. Here is an article which works to perfection, and which is harmless; for the sleep which it affords the infant is perfectly natural, and the little cherub awakes as "bright as a button." And during the process of teething its value is incalculable. We have frequently heard mothers say they would not be without it from the birth of the child till it had finished with the teething sleep, on any consideration whatever.
