And now Garfield is importuned to give Robt. Lincoln, son of the lamonated President, a place in his Cabinet. Surely, the ideas of the Republicans as to the qualifications of a Cabinet officer must be exceedingly depressed when they think Bob Lincoln qualified. The next thing you may expect to hear will be to ask Congress to make Fred Grant Captain General (as his dad could not come it) and put him at the head of the army. This is a time of splendid plays an important part in sickening, burnmedicerity and in many departments.

Senate bill 98, to allow defendants in certain criminal actions to become witnesses for themselves. Explained by Mr. Dortch. He said that he had seen the evil of the present system; had known cases where great injustice had been done because the mouth of the defendant was stopped. Would own practice where the main witness postmasters endorsement, and drew the arulina, in session assembled, representing had sworn away the life of the accused but for the severity of his ham, cross-examination. This evil would years in Albany Penitentiary! have been averted if he could have testified in his own behalf. The part of the bill which referred to the landlord and tenant act was also specially desirable. Nearly all of the ill-feeling between landlord and tenant was due to this cause alone. The passage of the bill would do way with such feeling since others addressed the Senate. The debate grosed without action the hour of ad-

Raleigh division of the North Carolina Rail Receip road, a part of which we copy: In the engine were the engineer, James Murphy, the fireman, Amas Hardy, colored, and the conductor of the train, Mr. R. T. Halsey. The two latter were killed. The engine had turned over and the tender came in on top of it. The body of Amos Hardy was found crushed flat between the tank of the tender and the firebox of the engine. The tank had also caught Conductor Halsey on the back of the neck and mashed his head clean through the body of Hardy, the fireman. Both, were, of course, killed instantly. Engineer Murphy had his arm broken, but, it is stated, received no further injuries of any consequence. No one else on board the train was butt The engineer's escape is attirbuted to the fact that he remained seated, avoiding being caught withithe others by the tank, which would have in all probability been the result had he been on the floor of the cab. It is probable that Conductor Halsey was on the engine to direct the engineer how to stop the train at Gibsonville. Such is-freight conductors on this road state-the custom on local freights. Neither the engine nor the train, it is said, is badly wrecked, as the speed at the time the train peared the station was probably not more than ten or twelve miles an hour. Conductor Halsey was a native of Huntsville, Als., but had for sometime been living with his family, a wife and three children in Charlotte. His companions speak of him in very high terms. His remains arrived last night on the 12:17 train. Amos Hardy, the fireman, ived at Company Shops.

MRS. WINSLOW'S SOOTHING SYRUP.-Rev Sylvanus Cobb thus writes in the "Boston Christian Freeman":—We would by no means recommend any kind of medicine which we did not know to be good—particularly for infants. But of Mrs. Winslow's Soothing Syrup we can speak from knowledge; in our own family it has preved a blessing indeed, by giving an infant troubled with colic pains, quiet sleep, and its parents unbroken rest at night. Most parents can appreciate these blessings. Here is an article which works to perfection, and which is harmless; for the sleep which it affords the infant is perfectly natural, and the little cherub awakes as "bright as a button." And during the process of teething its value is incalculable. We have frequently heard mothers say they would not be without it from the birth of the child till it had finished with the teething siege, on any consideration whatever.
