Yesterday morning there was plenty of ice in and about the city, and we noticed a thin skim on the pavement in front of the Court House as late as 10.30 A. M. Some of the pumps in the city were frozen up, and people generally were talking about the singular temperature for such a late period in the season. In the meantime fruit and early

Lecture of the Rev. pr. Yeates. The second of the series of lectures, to be given under the auspices of the Wilmington Library Association, was delivered at the Opera House last night by the Rev. - Beef is very scarce in Wilming. E. A. Yeates, D. D., pastor of the Front Street M. E. Church. The speaker was very pleasantly and appropriately presented by Mr. Chas. H. Robinson, President of the Association, and in his introductory remarks at once placed himself en rapport with his auditors.

The Reign of Theory was selected by Dr. Yeates as the subject of his discourse, and he handled this fruitful and interesting theme in a masterly and most entertaining manner.

He touched upon the issues of life from youth to mature age, theology, politics, science, liturature, education, &c., &c., and gave a few of the numerous theories held upon these questions, many of which are widely accepted, and showed how clearly false and ridiculous a large number were and how equally impracticable were others. Urged that the need of the age to a large extent was more practical, well directed effort, and earnest, untiring labor, as opposed to indolence, unreasonable complaining and idle theorizing. The lecture was replete with important truths, bits of humor, and original ideas, and gave evidence of profound learning and much careful and inteiligent study. It was excellent in matter, admirable in construction, and delivered in a graceful, forceful and finished style. Dr. Yeates' effort created a deep and most favorable impression upon all who heard it, and was universally praised.

Skinner's shippard in the shape of a portion of the gunboat Raleigh, which was built here in 1863 and soon afterwards sunk on the rip off New Inlet. Mr. James Nolan, on the wrecking schooner Wass, under command of Capt. Horton, was cruising in that neighborhood a day or two since, when they came across some obstacle on the bottom, whereupon Capt. Loring, an experienced submarine diver, donned his suit and went down, placing two kegs of gun powder in the midst of the obstruction and setting it off. The result enabled him to ascertain that it was the wreck of a vessel, and he next placed a thirty-five pound package of powder under the wreck and blew it apart, when a portion of the sunken gunboat, which proved to be the front of the turret, was brought to the surface, hitched on to the schooner and brought to this port, where it was dropped on the railway at Capt. Skinner's yard and hauled up out of the water. It is chiefly valuable for the iron which is attached to it, but if it was in some sections of the country Mr. Nolan and his confreres would be overrun with applications from relic seekers, and the enterprise might eventually prove an exceedingly profitable one.
