The election of Miller is said to have been the work mainly of V. P. Arthur. The Administration organs are praising him. Blaine fixed up the plan, it is alleged, with Arthur. Conkling is to become a sort of political outcast. So the talk is.

Some of the Conklingites are very indignant at the election of Warner Miller to the Senate. But the star of Lord Roscoe is setting probably and the indignation will not be heeded. By the way, Miller is no improvement on Platt. He is represented as a rather vulgar specimen of the machine politician.

The tremendous iron trade of Pennsylvania is in an uncommonly healthy condition. Manufacture are very busy and cheerful. The trade outlook is thought to be better than ever before. Spirits Turpentine to have recognized his would-be-assassins,

Dr. Bucke, Medical Superintendent of the London Asylum for the Insane, says Guiteau is not insane but a "moral idiot." He thus defines it:

"When a man is born deficient in mental faculties we call him a fool. If he is totally destitute of these faculties we call him an idiot. .. When a man is deficient in moral qualities he is a criminal-in nature if not in deed; if he is totally destitute of moral qualities he is a moral idiot."

He says such "idiooy" may coexist with a high degree of intellectuality. He says a "moral idiot" has no feeling of affection and no conscience. He feels no diagrace. He thinks Guiteau ought to be killed. He says:

"He should be killed not as a punishment for his crime, for he is incapable of understanding that he has committed a crime. But he should he killed as a protection to society—killed just as you would kill a wild beast or a rattlesnake. You would not kill a mad dog in punishment for being mad and biting some one-you would kill him in order to insure the general safety."

He says he has no respect for life and no companation-is, in a word, a wild beast with intellect. This per cent; cotton quiet at 11 11-16@11 15-16 about the substance of what Dr. Bucke said.

> Another comet, the third of the year, has made its appearance and will be visible, possibly, to the naked eye. Mr. Schaebeerle, of Ann Harbor, is the discoverer of the new one. The following is interesting. Prof Swift discovered a comet on May 1st last: We copy from the Herald :

> "Prof. Swift being asked whether he thought science would be a gainer by the appearance of so many comets so near together, answered by saying that his comet of May 1st and Encke's comet were too faint for spectroscopic observation, but that the comet which is now in the vicinity of the north star has yielded rich stores of information concerning its composition through the spectroscope and its appearance in the camera. If the present comet should increase in size it was possible that the observations made upon the last comet would be confirmed by means of the spectroscope, and this would be a great gain to science.

"In answer to the question, 'Are all comets slike? Professor Swift

"That is something which no astronomer has yet been able to find out, but it is expected that if through the spectroscope the comets yield common spectra, they are of common composition. The great comet, which was analyzed by means of the spectroscope, revealed hydrocarbon va-

WHO IS MRS. WINSLOW?—As this question is frequently saked, we will simply say that she is a lady who for upwards of forty years has untiringly devoted her time and talents as a Female Physician and nurse, principally among children. She has especially studied the constitution and wants of this numerous class, and, as a result of this effort, and practical knowings obtained in a lifetime spent as nurse and physician, she has compounded a Soothing Syrup for children teething. It operates like magic—giving rest and health, and is moreover sure to regulate the bowels. In consequence of this article Mrs. Winslow is becoming world renowned as a benefactor of the race; children certainly do hase up and bless her; especially is this the case in this city. Vast quantities of the Soothing Syrup are pally sold and used here. Wethink Mrs. Winslow has immortalized her name by this invaluable article, and we sincerely believe thousands of children have been saved from an early grave by its timely use, and that militons yet unborn will share its benefits, and unite in calling her blessed. No mother has discharged her duty to her suffering little one, in our opinion, until she has given it the benefit of Mrs. Winslow's Soothing Syrup.
