The New York Herald says that in the city alone there is a loss of \$6 000,000 in one year because of a fraudulent evasion of taxation. In Wilmington, we have no doubt, there is a considerable loss in the same way. In North Carolina the loss, we must believe, is more than a half million dollars from this cause alone.

Even that old hardened reprobate and sinner, the New York Tribune, is beginning to realize that there is a storm brewing that will wreck many a Protection argosy. It says:

We earnestly hope Republicans at Washington realize the gravity of the situation, and will act so as to leave no point of danger unguarded. We believe they can reduce both the internal revenue and the tariff. We believe the country will hold them responsible for a failure on either."

Gen. Fitz Lee is on a lecturing tour for the benefit of the Southern Historical Society. He is billed to lecture at Knoxville, Montgomery, Mobile, New Orleans, Houston, Galveston, San Antonio, Austin, Waco, Corsicana, Dallas, Fort Worth, Sherman, Little Cock, Memphis and Nashville. The old Confederates ought to have him in Wilmington. He is a gallant and true Southron and the cause he represents appeals to every friend "of the lost cause."

John S. Wise's assault upon old man Massey seems to have been the result of a very hot temper. He slapped him twice with the open hand in the face. The State has a long account from which the following is

"After having been separated Capt. Wise said, 'You have lied on me long enough.' Mr. Massey rose from his chair and said, 'If

Voorhees undertook to rake Vance down with a Protectionist currycomb, when to his astonishment Vance poured a tub of cold-water over him in the shape of a question. Here is a newspaper report:

"Voorhees proclaimed himself a protec tionist and sneered at the free trade doc-trinaire who had fled the field when one of his own local interests was pleading for a high tariff. He lashed the humbug and false pretense of men who attack all other interests but rally to the protection of their own Democrats who while pounding down all Eastern and Western industies were willing enough to exact a duty of three per cent. on rice.

'Vance, emerging from the cloak room, with his heavy, resolute tramp, assumed that Voorhees referred to him, and so struck On March 5, the 106th anniversary | back. He said that, in the language of one of his constituents, he 'shirked no responsi-bility and shrank from no reflections.' He was no free trader; but, while opposing protection as a system, he was not to be blamed for silently accepting such bounty as was accorded his State. He offered to help put rice on the free list if Voorhees would put window-glass there. 'Will the Senator do it?' shouted old Zeb, and added: 'Have I stumped the Tall Sycamore of the Wabash, and is the oracle dumb?'"

> Vance was twitted by Gorman, of Maryland, a Democrat, about his favoring protection on rice and turpentine. Here is the reply from the Congressional Record:

Mr. Vance Would the Senator have me get up when there is a general divide of the plunder and refuse the share which is equitably due to my State? [Laughter.] Mr. Gorman: No, sir.

Mr. Vance: Certainly; I yield to the nat-ural sense of justice of all Senators. If they are going to plunder the people and divide it out they ought to give the State of North Carolina her share; but I have not even asked to put any duty on rice.

All About a Bottle Stopper. Mr. H. Hutaff showed us yesterday a newly patented bottle stopper, which does away with the inconvenience and trouble incident to the realization of the virtues of a good bottle of soda water, sarsaparilla, etc., by the old way of extracting stoppers. The new invention consists of a flat, circular-shaped concern made of india rubber and lead, to which is attached a large wire, arranged is a sort of a loop which projects from the mouth of the bottle, and which, by a light pressure sends the button-shaped stopper below the neck of the bottle a sufficient distance to allow the contents to come out with the force desired. It is really quite a convenience to dealers in and consumers of the popular beverages re-

Foreign Exports. The following were the foreign shipments yesterday: The Norwegian barque Thela, Capt. Ramloff, for Bristol, England, by Messrs. Alex. Sprunt & Son, with 200 casks spirits turpentine and 3,827 barrels of rosin valued at \$9,900; and the schr. Wm. H. Bordman, Capt. Richardson, for Port de Paix, Hayti, with 120,147 feet of lumber and 118,600 shingles, valued at \$2, 308 05. Total value of foreign exports for the day \$12,208 05.

Our Bar-The Depth of Water on it. One of the pilots brought information to this city yesterday that a cotton laden barque, the name of which he could not remember-the Norwegian barque Alaska or the Danish barque Aurorita-passed over the bar yesterday morning drawing 17 feet and 9 inches of water, and that there was sufficient water on the bar at the time to have floated a vessel drawing 19 feet, being in advance of the highest spring tide. This shows well for the improvements below.

Buffalo Lithia Water TAKES THE PLACE OF THE SURGEON'S KNIFE FOR STONE OF THE

BLADDER.

ITS VALUE IN BRIGHT'S DISEASE, THE GOUTY DIATHESIS, &c.

Case of Mrs. ——, stated by Dr. David E Smith, of Bronxville, Westonester, N. Y. of Bronxville, Westchester, N. Y.

"Mrs.— was subject to severe attacks of Gout, a consequence of an inherited Gouty Dia-Beeia, followed after some time by Stone in the Biadder. The limbs were very Edematous, so much so as to pit readily on pressure with the finger, leaving an indentation long after its removal. The Urine was loaded with Urales and 25 per cent. Albumen, and the microscope revealed Caste, showing unmistakably, as I thought, Bright's Disease of the Kidneys. I prescribed the Buffalo Lithia Water, Spring No. 2, which afforded prompt relief in the Gouty Afection, and resulted, in a few weeks, in the passage of a Stone five-eighths of an inch long, by one-fourth of an inch in diameter. Under the continued use of the water the Urine has been relieved of Albumisous Impregnation, and restored to a normal condition: no Caste can be discovered, the Edematous condition of the limbs has been relieved, and the general health of the patient to a great extent restored."

STONE IN THE BLADDER, PROSPHATIC.

"My son, a young man, suffered from Stone in the Bladder, of a mixed character, consisting chiefly of Calcium, Carbonale and Phosphate. After persistent use of all remedies indicated in the case without benefit, I put him upon Buffalo Lithia, Spring No. 2, the use of which, for some six weeks, resulted in the passage, at short intervals, of Gravel, of small size, and at times of particles of Sand, followed, sometimes afterwards, by the discharge of a Stone weighing 12 grains, the largest, I am confident, I ever knew to pass through the Urethra), virtually ending his troubles, since which time any unpleasant symptom has been relieved by the use of the water for a short time. Its action in this case has been indeed wonderful."
