### Buffalo Lithia Water

TAKES THE PLACE OF THE SURGEON'S KNIFE FOR STONE OF THE BLADDER.

ITS VALUE, IN BRIGHT'S DISEASE, THE GOUTY DIATHESIS, &c.

STONE IN THE BLADDER (URIC ACID), SYMPTOMS OF BRIGHT'S DISEASE.

Case of Mrs. \_\_\_\_, stated by Dr. David E Smith, of Bronxville, Westchester, N. Y. of Bronxville, Westchester, N. Y.

"Mrs. — was subject to severe attacks of Gout, a consequence of an inherited Gouty Diathesis, followed after some time by Stone in the Bladder. The limbs were very Edematous, so much so as to pit readily on pressure with the finger, leaving an indentation long after its removal. The Urine was loaded with Urates and 25 per cent. Albumen, and the microscope revealed Caste, showing unmistakably, as I thought, Bright's Disease of the Kidneys. I prescribed the Buffalo Lithia Water, Spring No. 2, which afforded prompt relief in the Gouty Affection, and resulted, in a Lithis Water, Spring No. 2, which allorded prompt relief in the Gouty Affection, and resulted, in a few weeks, in the passage of a Stone five eighths of an inch long, by one-fourth of an inch in diameter. Under the continued use of the water the Urine has been relieved of Albuminous Impregnation, and restored to a normal condition; no Casts can be discovered, the Edematous condition of the limbs has been relieved, and the general health of the patient to a great extent restored."

STONE IN THE BLADDER, PHOSPHATIC.

A Case stated by Dr. B. S. Hardy, Hookerton, Greene Co., N. C. Greene Co., N. C.

"My son, a young man, suffered from Stone in the Bladder, of a mixed character, consisting chiefly of Calcium, Carbonate and Phosphate. After persistent use of all remedies indicated in the case without benefit, I put him upon Buffalo Lithia, Spring No. 2, the use of which, for some six weeks, resulted in the passage, at short intervals, of Gravel, of small size, and at times of particles of Sand, followed, sometimes afterwards, by the discharge of a Stone weighing 12 grains, the largest, I am confident, I ever knew to pass through the Urethra), virtually ending his troubles, since which time any unpleasant symptom has been relieved by the use of the water for a short time. Its action in this case has been indeed wonderful."

URIC ACID GRAVEL. A Case stated by Dr. Hasford Walker, of George-

town, D. C.

"Mr. George C. Congdon, of this place suffering from Uric Acid Grave, has been under treatment for some time past. He had as many as six separate attacks (all of them of very great severity), between June the 28th and July the 16th, a space of eighteen days. He declined in strength and flesh rapidly, and to such an extent as to excite serious apprehensions as to the result. Having exhausted the most approved remedies of Maleria Medica, without beneficial results, I prescribed for him, as a last resort, Buffalo Lithia Water, Spring No. 2. with the happiest effects. In a very short time after beginning its use, he passed a Calculus of about six grains in weight, has not been troubled since, and is now to all appearances, entirely well." appearances, entirely well.

STONE OF THE BLADDER (LITHIC ACID), AND HEM-ORRHAGE FROM THE BLADDER. Dr. J. B. Jones, Charlotte, N. C., Member Medical Society of N. C.

"In a case of Stone in the Bladder, composed of alternate concentric layers of Calcareous Matter and Lithic Acid, attended with alarming Hemorrhage from the Bladder, I prescribed the Buffalo Lithia Water, Spring No. 2, waich arrested the formation of Stone, and diminished both the frequency and violence of the Hemorrhage."
