his line, But will "Sir Henry" act any better than plain Henry did?

A glance at our dispatches this morning will discover exciting news. In Moscow and Birmingham important discoveries have been made of the work of the dynamite patriots. In Moscow the discovery of a mine leading to the Kremlin where the Czar is to be crowned is really startling, and shows the industry, daring and implacable hatred of his enemies. The activity of the revolutionists all around is well calculated to excite the public pulse of both England and Russia no little.

#### A Desperate Character.

Officer Dicksey went to the corner of Water and Mulberry streets, yesterday, to arrest one Mary Jones, colored, on an alias warrant for costs in Justice McQuigg's court, and was just in time to prevent the defendant from inflicting what might have proved a fatal wound upon Willis Drake, the well known colored shoemaker. She had a razor in her hand, with which she had already cut a severe gash in Drake's left arm, some three inches in length, and was just in the act of giving him a wipe across the throat with the weapon when her arm was seized by Officer Dicksey, who jerked her backwards upon the floor. He then took the weman to Justice McQnigg's office, where a proper commitment was issued and she was lodged in jail, in default of security in the sum of \$100, to await a hearing before the magistrate named this morning. She was discharged from the guard house a few days ago.

Dr. Wilson's Lecture Next Tuesday. Those who are fond of real "Enjoyment," such as will impress itself upon the memory so indelibly that it will afford food for pleasant thought and reflection in the future, should not fail to hear Rev. Dr. Wilson discourse on that subject at the Opera House on Tuesday evening next. There are few who have a higher appreciation of the bright side of things than Dr. Wilson, and if you would like to know his idea of enjoyment in its fullest and truest sense go and hear him. The lecture will be under the auspices and for the benefit of the Wilmington Library Association.

## Prof. Herrmann.

The New York papers all speak in the highest terms of Prof. Herrmann and his fine company of specialty artists. The New York World says:

"It is no wonder that Herrmann is doing so well. His entertainment is an admirable one, and appears to have been arranged for the special wonder and delight of ladies and children. There is a very neat and clean performance by excellent specialty artists, and upon the whole the attraction is to be commended for its parity, merit and extent. It is gratifying to see so whole-some an offering patronized so liberally by the clite of society.

Can Any Good Come Out of Naza-

This question was asked and answered eighteen hundred years ago, and with equal propriety a like question would apply to Wilmington to-day. And just as true, also, is the trite saying, that "a prophet hath no honor in his own land." We have been led into this train of thought from the fact that a chemist of this city years ago patented an invention for the extraction of oils from woods and other vegetable substances, notably so from the seed of the cotton plant, and also from animal matter. But it would really seem that, from the fact that this inventor was a North Carolinian, his fellow citizens could see no merit in what in all probability will prove to be one of the most wonderful inventions of the present century. We refer to Dr. D. M. Buie of this city, as the inventor of the new process of extracting oils from organic or inorganic matter. We have been shown samples of oil from cotton seed, and from fish, just as distilled from the crude matenal. The oil is perfectly pure and transparent, and requires no refining, except it may be to imitate and sell for an oil known in the household vocabulary by another name. The inventor claims, and indeed the experiments have proved, we understand, that the yield by this process is nearly if not double the effete and enormously expensive one of hydraulic machinery. The new process is claimed to possess three important features

-cheapness, purity and efficiency. Mr. George Dick, representing a syndicate of Norfolk capitalists, has been fortunate enough to secure this patent, who will, we learn, proceed immediately to develop the process, build the machines and place them at the disposal of our Southern planters for the extraction of the oil from their

While heartily congratulating Mr. Dick and his associates and wishing them suc cess, we must at the same time express our regrets that there should not have been enterprise sufficient in our own community to have claimed not only the invention, but the development also, with the benefits likely to flow therefrom.

## City and County Matters.

There being some uncertainty in regard to what action was taken by the Legisla ture upon certain matters pertaining to New Hanover county, J. C. Millis, Esq., one of our acting magistrates, wrote to Col. Saunders, Secretary of State, for information. In reply he says:

"An act to amend chapter 23 Battle's Revisal reads as follows: "Sec. 1 That that the provisions of section 4, chapter 23, of Battle's Revisal, shall not apply to or be in force in the city of Wilmington, county of New Hanover, and in

Charlotte, Raleigh and New Berne. "Sec. 2. That all Constables, elected or appointed, shall reside in the township for which they are elected or appointed. Provided the provisions of this section shall only apply to New Hanover, Wake, Craven and Mecklenburg counties.

Section 4, chapter 28, referred to in the first section above, reads as follows:

"For the better executing of any precept or mandate, in extraordinary cases, any Justice of the Peace may direct the same in the absence of or for want of a constable, to any person not being a party, who shall be obliged to execute the same under the same penalty that any constable would be liable to do?
