Alderman Boney, chairman of the com mittee on Fire Department from the Board of Aldermen, appeared before the Board and presented a communication from Capt. J. L. Boatwright, chairman of a committee of the Wilmington Steam Fire Engine Co. No. 1, addressed to Alderman Boney and making the following suggestions, viz That a new set of harness be purchased fo, the company; that a horse be purchased, also, for the company's hose reei; that the horse be fed by the city.

Inasmuch as the recommendations of Capt. Boatwright had not received the approval of the committee on Fire Department of the Board of Aldermen, and as the appropriation for the Fire Department as it now stands was approved by the Board of Audit and Finance upon the recommendation of the Board of Aldermen, it was suggested to Alderman Boney by Mr. Jones, that it would be proper before any alteration is made in the appropriation, that the request should emanate from the Board of Aldermen, and that therefore the matter should be laid before that Board for its action.

The Board then adjourned.

What the Weather Prophets Say.

Vennor, in his predictions for July says that it will be a very warm month, and in this particular he seems to be, unhappily, correct. The thermometer here has ranged in the nineties for several days past, and not only here in Wilmington, but in cities north and south of us. Vennor further says that "on the 19th occurs the conjunction of Mars and Saturn at 10.19 P. M. and on the same day Jupiter in conjunction with Mercury. A violent storm may be expected on that and probably the following day, with intense electrical manifesta tions along the coast of the North Atlantic

The scientist of the Rochester (N. Y.) Democrat, says, under date of the 15th inst, of the remarkable spots observed on the sun, that "to the five groups of sun spots, which have exhibited intense action during the past-week, two more have just been added by the sun's rotation," and that 'the sun storm which is just coming into view covers a great area, showing very rapid changes." He predicts that violent hunder storms and tornadoes may be expected this week in the Northern States and Canada.

city yesterday evening about 6.30 o'clock, a flash of lightning set fire to a warehouse on the naval store yard of Messrs. Woody & Currie, on South Water street, between Orange and Ann. The warehouse, a frame structure, contained about 200 barrels of spirits turpentine, and with its contents was soon blazing fiercely. Dense volumes of smoke rose up and gave the first intelligence of the fierce conflagration that was raging. The fire bells rang out, and soon, despite the storm, the streets in the vicinity were thronged with hundreds of people. The fire spread with great rapidity to the warehouses, yards and wharves adjoining, owing to the combustible nature of their contents; but by hard work the Fire Department succeeded in staying the further spread of the fire, and in less than an hour had it fully under con-

Owing to the fact that the fire occurred at an hour when many of the business men of the city had gone to their residences at the Sound, it was impossible to get a correct statement of the losses, and amounts of insurance; but estimates place the former at \$18,000 to \$20,000, which is believed to be generally covered by insurance. A partial statement of the burned property is as follows:

Two warehouses and a wharf, the property of Mr. Alfred Martin; occupied by Mr. D. L. Gore, (in one of which was stored 100 bales of hay and ten barrels of

molasses). Insured. Warehouse and wharf owned by Messrs. Calder Bros., and occupied by Messrs.

Woody & Currie. Insured. A warehouse and wharf belonging to Messrs. G. W. Williams & Co., containing

molasses. Insured. A warehouse belonging to Fowler & Morrison, containing molasses. Insured. Besides the above, some fifty cords of

wood, the property of Messrs. Fowler &

Morrison, were consumed; uninsured. The firemen had hard work in saving the warehouses and wharf of Messrs. Robinson & King, and Mr. H. B. Eilers, but after a long tussle succeed.

A Storm.

Shortly after 5 o'clock yesterday afternoon dark and portentous looking clouds suddenly rolled up from the northwest and swept over the city. A strong breeze sprang up at the same time, and the dust for awhile was blinding. There was hurrying and scurring to and fro by pedestrians, and the sidewalks of the city pre sented an animated scene, in strong contrast to their dull and vacant appearance a few hours before, when the sun was shining its fiercest. There was a strong electrical display at the same time. It was probably only the southern edge of the storm that touched us. Farther to the north it had the appearance of being very heavy.

The Cape Fear Artillery. The guns of the Cape Fear Artillery Company, which have been lying in the yard at the City Hall for months past, have been repainted and rubbed up, and the harness put in order. The entire equipment will be shipped Saturday by steamer to New York city. In overhauding the pieces a quantity of powder-in cartridges-was found in one of the limber chests, where it had remained ever since the guns were last used, when Mr. John Sneeden, one of the gunners, was severely wounded by the premature discharge of one of the pieces. The Fruit Fair.

Capt. R. P. Paddison, President of the North Carolina Fruit Growers' Association, who has just returned from the meetink of the officers of the association at Greensboro, says that there is every prospect for a fine and successful exhibition at the Fair to be held in this city on the 22d and 23d of August next. Capt. Paddison says that while early peaches are generally a failure, the supply of late varieties of that fruit will be fine and abundant, and that apples, pears and grapes throughou the State are remarkably good.

The Excursion To-Night. The excursion to Federal Point adver-

tised to take place last night under the management of Capt. Jno. W. Harper and Mr. Geo. N. Harriss, was postponed on account of the weather. By reference to our advertising colums it will be seen that the excursion will be had to night. Music, dancing, refreshments, sheephead supper and surf bathing are among the attractions. The managers have completed every arrangement necessary to the pleasure and comfort of their patrons.
