bood of the Clarady residence during the progress of the arrest and search, and no little excitement prevailed Quite a crowd also followed the officers and the woman down the street

Since the above was written the officers have made another search and brought away two fine baskets, a number of towels, new pocket-handheschiefs, under-clothing, dresses, a silk cap, etc.

Mag Clarady had a hearing before Justice Hill on the charge of assault and battery with a deadly weapon. The evidence developed the fact that she made two attempts to use her axe (to say nothing of the assault upon the officer), one upon Mary Bradley and one upon Mary Howe. She was required to give bond in the sum of \$200 in each case for her appearance at. the next term of the Criminal Court, failing in which she was lodged in jail. The case against her for receiving stolen goods will be heard at some future day.

After the woman reached the prison : package containing one gold piece of the denomination of ten dollars and one of five dollars, together with three dollars in threecent pieces, was found concealed in her stocking.

The Fish Hatchery.

Mr. W. J. Hollingsworth, of Fayetteville, who has been in charge of the fish hatchery started here by Fish Commissioner Worth, has completed his work for the season, packed up his jars and other things and will leave for home to-day. The success of the experiment of fish hatching here was quite as marked as could have been expected under the circumstances. It was the first introduction of the plan here, and of course it was not understood by our fishermen and others. Mr. Hollingsworth has taken great pains to explain all the hidden mysteries of the art and to instruct the fishermen in the method of securing the spawn. As the season advanced, and they hecame more thoroughly acquainted with all the methods and plans for operating a hatchery, their interest in the matter proportionately increased, and another season they will doubtless enter into the undertaking with far more spirit than they did this. Of course much depends upon our fishermen for the success of the experiment. and we are assured by Mr. Hollingsworth that they will receive liberal compensation. During the season just closed 215,000

young shad were hatched and turned loose in the Cape Fear, which is a good showing

tion since my induction into Congress. Up to the time, some four weeks ago, of my necessitated absence on account of my mother's fatal illness and subsequent obsequies, not a letter was received that was not inswered, nor a request preferred by any of my constituents that was not attended to to the best of my ability. I leave it to those who sent me here to

say whether my labors in their behalf have had results. If they wish me to continue, I am willing to serve; if they wish me to leave, I am ready to go. All I demand is that fair play may preside when the decision is made. And of this I cannot doubt, both on account of the high character of those who would not be averse to taking my place, and of the good sense and sense justice of those upon whom the decision will involve.

The proper discharge of my duty to my people will preclude my taking an active part in the preliminary canvass prior to the convention. My record and their indulgence must plead for me. From the cause above assigned I have

fallen behind in my correspondence, but I hope to catch up during the coming week. Yours, &c., W. J. GREEN.
