The arge assemblage was addressed by Hon Wharton J. Maj. C. W. McClammy, Pender's Democratic war-horse, was expected, but did not put in an appearance, having no doubt been unavoidably detained from some cause which will hereafter be explained.

River Improvements. Under the supervision of the engineers in charge of the upper Cape Fear river improvements, the work of building a jetty at Payetteville is now in progress, and, when completed, will prove a great advantage in the matter of navigation, as boats can then go up to the wharf without any trouble or detention whatever. He has already disposed of some territory, on certain conditions, to Mr. J. Van Lindley, Greensboro', who is now President of the Fruit Grower's Association of North Carolina.

The soil of North Carolina is undoubt edly adapted to fruit culture, and we be lieve it can be made one of the largest fruitgrowing States in the country.

- The steamer Wave, which met with a

The Wave has been remodelled in a measure, being lighter and more roomy than before. The gentlemen's cabin and dining-room have been completed and workmen are now engaged in putting up the ladies' cabin. She draws less water than before the accident and is believed to be a stronger and better boat in every way. The engine room is open, in accordance with the custom of steamers on many other rivers, instead of being inclosed as heretofore, and will remain so all summer, or as long as the weather will permit.
