SCIENCE AT THE UNIVERSITY. We have had for some weeks a very neat pamphlet of nearly a hundred pages, bearing the title: "Journal of the Elisha Mitchell Scientific Society for the year 1883-'84."

There is a great difference in Granville tobacco even. There are sections that do not produce a fine grade, and we learn from Mr. William L. Meadows, of this city, who is from Granville, and has worked Granville tobacco for a quarter of a century, and understands his business, that there is a very small sub-section in the fine tobacco section of that county that produces a tobacco that eclipses all other tobacco for chewing purposes.

There is so much ignorance and bragging about tobacco that we have written the above. According to the papers every county that can grow tobacco can grow it equal to Granville tobacco. The fact is, only a part of Granville makes the fine "gold leaf" and the very finest is limited to a small section of that county. It is Cuba over again in that respect.

NEW YORK, Aug. 28.—The Cleveland ratification meeting in the Academy of Music to-night was in every respect a phenomenal success. No meeting like it in point of numbers or in the wild enthusiasm of the audience has been held this campaign, and in many respects it has not been exceeded in years.
