The road bed is twenty-four wide, while on ceach side canal, one six feet wide the other eight feet wide, the latter being on the side whence comes b far the largest amount of drainage which these canals carry off. MORE STEALING.

A Young Colored Man Steals a Valuable Gold Watch and Chain-A Lively Pursuit and Pinal Escape.

Yesterday afternoon, between 2 and 1 o'clock, Mr. E. Bentell, the watch-maker, who has a shop in Mr. F. Stolter's store, on Second, between Market and Princess streets, was on the sidewalk talking with a friend, thinking Mr. S. was in the store, when a young mulatto man, a stranger, who was in the store at the time Mr. Benteli stepped out, deliberately made his way into the enclosure where Mr. Bentell does his work and slipped a gold watch and chain from their place of suspension at the window, came out of the store, and made with them. Mr. B.'s attention was directly after called to a suspicious circumstance which caused him instantly to glance at the lot of watches suspended at the window, when he immediately missed the one that had been stolen, as it was the only gold one he had in his shop, being a valusble one left there for repairs, and worth, perhaps, between \$75 and \$100, with the chain which was also of gold.

Deputy Sheriffs Brewington and Holmes were notified and went to look for the thief, whom they soon afterwards discovered on Nutt street. Becoming aware that he was about to fall into the clutches of the officers he ran into the yard attached to Mrs. Bryson's boarding house and finally made his way over fences and sheds into Front street. The officers kept up their pursuit of him until he ran into a lot on Walnut, between Fourth and Fifth streets, and finally disappeared, when they gave up the

The thief is said to be a stranger here. Mr. Benteli says he was a well dressed, respectable-looking young man. At the moment of the robbery Mr. Stolter and a friend had stepped into the back room, leaving the stranger the only occupant of the store. A colored man who was in the back part of the building says he got a glimpse of the young man with his left hand on the door leading into the enclosure, and he supposes it was just as he was coming out with his prize, as the next instant he was gone.

Careless Throwing of Rocks, &c. A gentleman was passing the mouth of as alley on Front street, yesterday afternoon, just as some colored boys were in the act of hurling missiles at each other. when a block of wood, thrown by one of them, struck him on the shin, hurting him so painfully that it was some time before he could walk, and at last accounts his ackle was still badly swollen. The careless hurling of rocks and other missiles in the streets is dangerous, and efforts should be made to stop it. In this instance the boy assured the gentleman that his hitting him was a matter of pure accident, that he was

sorry for it and begged his pardon. Graded School Examination. At a public examination of Union graded school, in the southern section of the city, yesterday, the first and second year's classes were drilled in arithmetic and reading, and showed a preficiency which was very gratifying to the large number of visitors present. We hear that there will be another public examination of all the graded schools before the close of the present session, at which time Prof. Noble, the Superintendent, will award the Peabody

MRS. WINSLOW'S SOOTHING SYRUP.—REV. SYLVANUS CORE thus writes in the Boston Christian Freeman:—We would by no means recommend any kind of medicine which we did not know to be good—particularly to infants. But of Mrs. Winslow's Soothing Syrup we can speak from knowledge; in our own family it has proved a blessing indeed, by giving an infant troubled with colic pains, quiet sleep, and the parents unbrokes rest at night. How parents can appropriate these blessings. Here is an article which works to perfection, and which is harmless; for the sleep which it affords the infant is perfectly natural, and the little cherub awakes as "bright as a button." And during the process of teething its value is incalculable. We have frequently heard mothers say that they would not be without it from the birth of the child till it had finished with the teething sleep, on any considefinished with the teething siege, on any consideration whatever.
