MORNING EDITION. OUTLINES.

Geo. Mack, a murderer, was taken from a train at Kansas City, Mo., and hanged by a mob. Gen. Grant is busy at work on his book. Russia appears to be disposed to entertain England's proposals for arbitration; it is believed the King of Denmark will be selected as arbitrator; war preparations in England continue unchecked; the Admiralty are inspecting vessels with the view of chartering or purchasing them. Business failures the past week number 189 in the United States.

The President has grown weary at last and is forced to rest. What there is left of George W. Cable, since Judge Gayarre flayed him, is up in New England. There appears now to be a good prospect of peace. It is thought that the matter in dispute will be referred. Gen. Oroncheff will be in command of the Russians in Turkistan. He greatly distinguished himself in the war with Turkey.

At Middletown, Ohio, Miss Ella Taylor accompanied others on a visit to a haunted graveyard, and died from the excitement. Vast forest fires are raging in the mountain counties of Virginia and doing great damage. In Tarboro when there is an infection or contagious disease on a lot the health officer displays yellow flags. A good idea. Mrs. Langtry is said to really play very well in "Peril." She did not play well when in the United States, although she was supposed to be in peril then.

Grant's Chief Commissary, Brig. Gen. M. R. Morgan, says Col. Charles Marshall's account of what occurred at Appomattox is the most correct he has seen. The poor little newspaper that France got mad with England about has 500 subscribers. One of our water tank North Carolina "cities" can beat that. The Administration stands by Mr. Kelly. It gives him the mission to Vienna—salary \$12,000. It is of the same rank as the one to which he was first appointed. The fellow Cleverus is to be put on trial next Tuesday at Richmond, Va. He is guilty, we have no doubt, and richly deserves hanging a half dozen times, if it were possible. The Albany Argus, Dem., is against England and with Russia because of the sympathy of the former for the South. What a reason for a man to give who is not "daft." Mormon Cannon, after a three days trial, was found guilty of unlawful polygamous practices with three women. James C. Hamilton and Bishop Ward have been arrested under a similar charge. Professor J. R. Harris, an Englishman, has resigned his place at John Hopkins' University because he was censured for opposing vivisection. We agree with him in his course and think John Hopkins has made a mistake. The broom will be put in motion in Virginia next week. The Administration regards Mahoneism as worse than Radicalism. North Carolina is about as sick of the latter as Virginia is of the former. Let your broom sweep this way Mr. President.

THE MORNING STAR.

VOL. XXXVI.—NO. 35. WILMINGTON, N. C., SATURDAY, MAY 2, 1885. WHOLE NO. 5810

Senator Beck has been interviewed and he speaks out plainly and admiringly concerning the President. Among other things he is reported as saying: "He possesses extraordinary executive ability. I have seen all the Presidents from Andrew Johnson down, and I do not hesitate to say, Cleveland approaches nearer to my idea of what a chief executive should be than any of them. While prudent and wise, he is, at the same time, a man of great force of character, indomitable will power, independent and decisive in the discharge of his official duties, literally and in the strictest sense of the word—the President of these United States. Of course he is not infallible. He may have already committed some errors, and before the expiration of his term of office may make others, but that is human, and I would not give the title of a copper for a man who did not display occasional evidences of those little imperfections to which all nature is heir."

We have received a very neatly printed catalogue of Wake Forest College for 1884-'85. There are now six Professors and one Tutor. The matriculates during the year number 144. The Baptists of North Carolina deserve credit for the great things they have done for education. Starting with a small agricultural school they have striven until they have secured excellent buildings, most eligibly situated in a beautiful section of the State, an excellent working faculty, a healthy endowment and good patronage.

A horrid story is telegraphed from Raleigh to the press to the effect that some moonshiners in Person county caught a revenue officer by the name of O'Bryan asleep, saturated his clothes with kerosene and then set fire to him. He rolled over in the branch and put the fire out, but was so badly burned that he died in two days. Some persons whose property he had destroyed caused his death in this manner.

Our wide-awake contemporary, the Clinton Caucasian, copied what the STAR said about the Cossacks watering their horses in the Indian Ocean and asks, "What sort of horses do the Cossacks ride? The kind we have about here prefer fresh water."

Bless your soul honey that was only intended for a bit of rhetoric—to give a finishing touch.

The Wadesboro Intelligencer conveys startling news in the following: "Information reaches us that Col. Cash one day this week was married to the young, beautiful and accomplished sister of Dr. Clayton, the wealthy Mississippian, who purchased the Colonel's plantation, near Cash's depot, a year or two ago, for \$60,000."

Mr. E. J. Hale, editor of the Fayetteville Observer, has been appointed consul to Manchester, England; salary \$3,000 a year. Mr. Hale is a finely educated gentleman and has good abilities. He was a very gallant Confederate and rendered efficient service in the campaign of 1864.

The Novos Vryma, of St. Petersburg, says that Russia will settle matters with England in India and not in Afghanistan alone. England will be apt to be heard from nearer home than that. She has not a big navy for nothing.

Spirits Turpentine.

—Ex-Governor Jarvis is at New Bern.

—Asheboro Courier: The Mormons held a conference a short time ago near the Pilot mountain, Surry county. As many as fourteen preachers were in attendance, and it is said they have obtained quite a foothold in that county.

—Clinton Caucasian: The meeting at the Methodist church continues. There have been over forty conversions. Mr. Wiley Butler, one of the most highly esteemed citizens of Honeycutt's township, died at his home, eleven miles from Clinton, on the night of April 28th, 1885, after a lingering illness.

—Charlotte Observer: Some unknown parties have exploded dynamite in Phifer's pond, killing large numbers of fish. The banks of the pond are said to be lined with dead fish and the stench arising therefrom is obnoxious. —Rev. Joseph Johnston, the colored preacher who was sent to jail on the charge of larceny, was yesterday released, as the committing magistrate ascertained that it was a case of malicious prosecution.

—Scott's Hill correspondent of the Hickory Press: The financial outlook in this section is not very good. Many young men are without suitable employment, and are looking to the Government for relief in the shape of an appointment. The farmers are generally indebted to the merchants, with no very bright prospect of speedy relief. I think the farmers of the Piedmont region are generally in better condition than in this section.

—Weldon News: The grist mill on the farm of Mr. J. P. Leach, near Ringwood, was burned down on Tuesday night of last week. On Wednesday afternoon of last week the fast train ran over and killed a little white boy named Samuel Owens, near Pleasant Hill. The meeting at the M. E. Church still con-

tinues without abatement of interest or attendance. Ten persons joined the church last Sunday and there are several points in Asheville.

—Asheville Citizen: Yesterday an old lady near Qualla waded the dangerous signal in so energetic and violent a manner that the train was quickly brought to a standstill, and when the serious conductor wanted to know where the land slide, broken rail or trouble was, she with a pleasant smile, and most matter of fact way said, "Why, honey, ther' haist' n'akin' the matter; I jest want sum of you-uns to carry this mess of fish to Asheville, swap 'em fur sugar and fetch it back to me to morer."

—Charlotte Democrat: The catch of shad in the Catawba river this season has been rather remarkable. Since the building of railroad bridges, dams, &c. across the river in many places, but few shad have been caught in the Catawba this high up. But two or three wagon loads of fine fish have recently been brought down from the upper reaches of the Catawba. Mr. M. B. McGill has been re-elected Chief of the Fire Department of this city.

—Raleigh News-Observer: A meeting of the stockholders of the Albemarle & Raleigh Railroad Company was held yesterday at the Yarbrough House for the purpose of electing a Board of Directors for the coming year. The following Directors were elected: Hermann R. Baltzer, Henry L. Rogers, Alfred Lichtenstein, Charles Unger, George H. Schimmel, Wm. Hest Roesler, Adolph H. Hegerich, W. G. Upchurch, Simon Stearns, John K. Creech, B. T. Strickland, Ernest Baltzer, Edwin Schultze.

—Raleigh Farmer & Mechanic: Attorney General Garland's mother was a daughter of State Senator Jas. P. Hill, of Franklin. Maj. Chas. M. Cooks is a relative. Superintendent of Public Instruction S. M. Finger's car is county school men notifying them that on and after the second Thursday in October each county superintendent and public school teacher must stand an examination in Physiology and Hygiene, he created quite a flutter, particularly among book publishers, or their agents.

—Wadesboro Intelligencer: A few days ago the house of J. P. Roirie, Esq., near Grassy Islands, was destroyed by fire, originating from a spark falling upon the roof. No insurance. Frank Lowery, who lately killed a man near Orlando, Fla., and escaped, appeared a few days ago in Union county. Learning, however, that the sheriff of Union had a telegram from the sheriff of the county in Florida, he fled to the mountains, and is ordering his arrest. Lowery again fled, and has not since been heard from.

—Asheville Citizen: We are informed by a physician that the health of Asheville this spring is a hundred per cent. better than it was this time last year. He attributes the improvement to the present hygienic condition of the town. Dr. Millard's management. Mrs. Saman's Tulin, daughter of Nathan Coward, Esq., of Caney Fork, Jackson county, died on Friday last. This is the third member of the Coward family to die in a few weeks. Other members of the family are in a critical condition.

—Lenoir Topic: Dr. Beall has drawn the water from his carp ponds and sorted out the fish according to size. He has sold about 3,000 fish this spring, and has about 2,500 more and 3,000 leather and carp in his ponds. He has been keeping his ponds free of all predators that prey upon fish he found turtles and bull frogs plentiful and fat. He caught one green old frog almost as large as a negro baby. —Dr. A. M. Foster, of W. A., has been elected pastor of the Presbyterian churches at Lenoir and Hickory.

—Rockingham Reporter: Between now and the 11th of September next, the Secretary of State, by the aid of surveyors, is to have erected in each county of the State requesting him to do so through the board of commissioners, historical and monumental for the correct retracing of surveys. The county commissioners are to keep these monuments in good repair; every surveyor in the month of December is to test his needle by them, and a record of these tests, and all corrections resulting therefrom, are to be recorded in the "Meridian Record" book, in the office of the Register of Deeds; and no survey after the 11th of September is binding upon any party in interest unless it appears in the "Meridian Record."

—New Orleans Times-Democrat: As one of the visible results of the World's Fair at New Orleans, there are to-day several millions of Americans from every part of the United States, and foreigners representing all corners of civilization, are crowded about North Carolina, one of the chief and most progressive States of the new South, is a commonwealth possessed of an imperial array of resources, agricultural, mineral, marine and industrial, such as the regions of the earth can equal anywhere on the earth's surface. Prior to the splendid presentation of the State's wealth and possibilities, contained in its official exhibit, the same millions had but little idea of North Carolina beyond the fact that it enjoyed the rather deteriorating pseudonym of the Tar Heel State.

—Fayetteville Observer: It is with feelings of peculiar sadness that we have to chronicle the death of Mrs. Ed. Smith, of Harnett county. We understand that Dr. John Beau, a French gentleman, representing capitalists, is now in Fayetteville, and that he yesterday obtained about 4,000 acres of land from Mr. A. B. Walker, on Little River, near Little River Academy, on which he expects to locate quite a colony of his people. Seeing a number of strangers in town last Thursday, we stepped into the hotels to see their registers, and were surprised to see that our visitors were from Tennessee, Kansas, Iowa, Alabama, Michigan, California, Minnesota, Ohio, Georgia, Virginia, Vermont, West Virginia, Massachusetts, South Carolina, Texas, Florida, and all parts of our State. We found that many were contractors, and were here inspecting the line of the Wilson & Fayetteville Railroad.

THE CITY.

NEW ADVERTISEMENTS. Box 602—Wanted to rent. Mutton—Suits to measure. Lost—Black and tan setter. J. B. Marshall—Fresh eggs. HINCHESBERRY—Base-ball supplies. Gas Light Co.—Stockholders meeting. The Concert Last Night. The Wizard Oil Company gave a second concert last night at the Opera House, for the benefit of the Wilmington Light Infantry, and it was well attended. The performance was equally as meritorious as the former one, and the different participants were cheered repeatedly.

Local News. —Only one bale of cotton received here yesterday.

—Wong Ling is the name of the Chinese laundryman on Second street.

—Rev. Alex. Kirkland will preach at the First Presbyterian Church tomorrow, at 11 a. m. and 8 p. m.

—The ordinance of baptism was administered to two persons at the First Baptist Church Thursday night.

—There was only one case of drunk and down before the Mayor yesterday morning, which was discharged.

—This city and vicinity was visited by a heavy rain Thursday night, which will have a fine effect on vegetation.

—The Ladies' Memorial Association of this city have decided to observe Monday, May 11th, as Memorial Day.

—The Sunday School hour of the First Baptist Church has been changed from 8:30 p. m. to 9:00 a. m. The change goes into effect to-morrow.

—The new uniforms of the Seaside Base Ball Club arrived yesterday morning, and were on exhibition at Dyer's during the day. They are very handsome.

—Mr. F. M. James, superintendent, informs us that there were 18 interments in Oak Grove Cemetery during the month of April, of which 10 were children and 8 adults. All colored.

—The grocermen having announced that they will close hereafter at 7 p. m., until the 1st of September, the dry goods men will probably also adopt an earlier hour for closing during the same period.

—Maj. Finger stated while here that the fruit crop in the Western part of the State was badly damaged by the late frosts. The crop in this section is not damaged at all, and the promise is fine for a heavy yield.

—Shipments of Western North Carolina lumber to Europe. The Charlotte Observer of Thursday says: "A shipment of 225 car loads of lumber from Western North Carolina is now passing through this city for the export of Wilmington, whence it will be conveyed in vessels to Europe. The fact that speculators in Europe find it profitable to pay the transportation charges of this lumber over such a great distance by land and sea is sufficient proof as to the value of the lumber itself. The lumber is shipped from Alexander's, in Buncombe county, and comes to Charlotte in Western North Carolina cars, and here it is transferred to the cars of the Carolina Central road and carried on to Wilmington, where it is transferred on board ship. The shipment is an immense one, as a little thought will show. The work of transporting the lumber from Alexander's to Wilmington was begun on Thursday of last week, and the shipments have averaged about eight car loads per day. Yesterday there were ten car loads. Each car is loaded to its fullest capacity, and carries 30,000 pounds of lumber."

This lumber which is going to Europe is said to be the finest in the world, and great care is taken in its shipment. The plank vary in length from 16 to 18 feet, and are from 1 1/2 to 3 inches thick. The Observer adds: "The beauty of this lumber consists not only in its size, but in its clearness and perfection. The European buyers are authorized for the statement that no country in the world can produce lumber superior to the shipment that is now being made to them. This is the most favorable illustration of the value of the timber lands of our State that has yet been known, and this introduction into European markets of North Carolina lumber is something for our people to rejoice over."

—Death of Charles B. Fennel. It has been known for several days past that Mr. Charles B. Fennel was sinking rapidly, but nevertheless the announcement of his death yesterday morning, about 8 o'clock, at the residence of his father, Mr. Owen Fennel, on Dock, between Sixth and Seventh streets, caused a shock among his many devoted friends. During the past winter deceased manifested symptoms of the terrible disease (consumption) which so quickly carried him off, and he made a trip to Florida with the hope that in that mild climate he might recover his health. Instead, however, he grew rapidly worse. His parents hastened to his bedside, and, as soon as practicable, brought him back home again, could everything that parental solicitude could devise or medical skill accomplish was done with the hope that he might finally be spared. But, alas! nothing would avail. There were slight improvements, to be followed by more serious relapses, until at last he passed peacefully away and is at rest. Mr. Fennel was only 29 years of age, the last six of which, previous to his illness, he passed in the employment of Mr. D. L. Gore, commission merchant, in whose esteem his capacity and strict business integrity had won him a high place. The funeral will take place this afternoon at 9 o'clock, from the residence to the First Baptist Church.

—Throwing Hooks. Robert Banks, a colored youth, had a hearing before Justice Collins yesterday, on the charge of assault and battery upon another colored boy, named G. W. Green, by hitting him on the head with a rock. The evidence showed that the rock was a small one and could not be designated as a deadly weapon. However, as a warning to the boys, who are becoming so fond of throwing missiles at each other, and with a view of breaking up the practice, the magistrate sent Banks to jail for four days.

THE BIG STEAL.

Additional Particulars in Reference to the Recent Big Dry Goods Steal—More Plunder Unearthed, &c.

Thursday the Sheriff's officers further searched the premises of Mag. Fisher, on McRae, between Hanover and Brunswick streets, when a number of other articles, supposed to have been stolen, were recovered and taken to the Sheriff's office. Articles thus far have been identified by Messrs. Katz, Brown & Roddick, McIntire, Sampson, David, Taylor, Giles & Murchison, Munson, C. W. Yates and Mrs. A. C. Moore. Fannie Fisher, youngest daughter of Mag. Fisher, and said to be less implicated than any of the Fisher family, has been made a State's witness and released.

All day Thursday and yesterday, crowds flocked to the Court House, passed through into the park and took stations at the window looking into the room where the stolen goods are deposited. Each separate detachment would look and comment for about ten minutes and then they would back out and another squad would take their places. We have not seen our colored population stirred up to such an extent for many years. Many white people also called to see the show.

It is expected that the preliminary examination will be delayed until Monday, when it will take place before Justice Millis. One of the officers who visited Mag. Fisher's house yesterday says some of the rooms present the appearance of a tailor's shop, there are so many scraps of different material scattered around. The old woman was the wife of Tony Fisher, who came here from New Bern and went North after the war. She is about forty-five or fifty years old, and has three grown daughters, all of whom have been implicated in the robbery to a greater or less extent.

LATEST. The latest development is to the effect that the authorities have evidence, procured by Deputy Sheriff Strode, that two sacks and a sheet filled with goods had been taken to the side of Smith's Creek, near the site of the Willie Carter murder, but were subsequently removed. Deputy Strode visited the place yesterday, and, while the goods were gone, he found some of the wrappings of articles stolen from Mr. Katz and a tag from a parcel supposed to belong to Mr. Taylor.

A Hint to Farmers—Try the Cultivation of Broom Corn. At this particular juncture in the farming interests of North Carolina, when it is so important that every foot of ground possible should be utilized, it may not be amiss to call attention to what might be made a profitable crop. We allude to broom corn. There is a broom factory here in successful operation here, and there are other channels through which all the broom corn that would be likely to be raised in this particular section could be disposed of. All the material used in the factory—here has to be obtained at a distance, and the demand for it will constantly increase as the business grows and develops. We have at hand some useful information in regard to the cultivation of the broom corn. The ground ought to be good and fresh as you would want for Indian corn, and also well broken. The seed should be planted in the spring (not too early), and the rows should be three and one-half feet apart, the seed being drilled. Much depends upon good cultivation and the absence of weeds. Out when the seed on the stalk are in the milk. It will not do to let them mature too thoroughly. In cutting, one hand goes ahead to "table," followed by the cutters. The tabling consists in bending the stalks of two rows diagonally across each other, about two feet from the ground. The brush projects beyond the row, and is then cut and laid on the table, thus formed, to dry. Six inches of the stalk should be left to the brush. Threshing the seed should come next. Posts can be set in the ground, and cross pieces attached, so as to form a sort of table, upon which the straw is laid, with the brush projecting. To get the seed out is the next thing. The cheapest way is to get a piece of tough hickory, a foot long and six inches wide, and saw teeth three inches deep and one-quarter of an inch in width. The teeth should grow gradually smaller towards the end, something on the style of a comb. In cutting, sheds ought to be provided to protect the corn from the sun and rain. The corn should be laid in racks, not too thick, and sufficiently far apart to allow free ventilation.

It is claimed for broom corn that it can be made a more profitable crop than either corn or cotton. One bushel of seed will plant twelve acres, and the usual yield of seed is fifty-five or sixty bushels. The cost of cultivation is about the same as Indian corn. The yield of broom corn is from four hundred to one thousand pounds to the acre. Those going into the business for profit should begin with five or ten acres. Several bushels of seed have been procured for those who wish to try the experiment, and can be had at the broom and mattress shop on Chestnut street, next to the Rock Spring Hotel. The seed is an important part of the crop, forming an excellent food for stock.

Cotton. The receipts of cotton at this port for the month of April just closed footed up 872 bales, as against 1,008 bales for the corresponding month last year. The receipts of the crop year from September 1st to date foot up 93,626 bales, as against 91,387 bales for the same period last year, showing a net increase of 2,239 bales in favor of 1885.

Weather Indications.

The following are the indications for today: For the South Atlantic States, partly cloudy weather and occasional rain, followed on Saturday by fair weather, southwest to northwest winds and stationary temperature.

Harbor Master's Report. Capt. Price, Harbor Master, reports the following arrivals at this port for the month of April: AMERICAN. Steamers, 5—4,227 tonnage. Brigs, 1—937 " Schooners, 16—4,510 " Total American, 22—9,664 " FOREIGN. Barques, 12—5,638 tonnage. Brigs, 6—1,658 " Schooners, 1—240 " Total foreign, 19—7,487 " Total—41 vessels; 16,601 tons.

Juvenile Base Ball Notes. The juvenile base ball clubs known as "Turpikie Stars," Capt. C. Bunting, and "Hard to Beat," Capt. H. Willis, played a game yesterday, with a score of 3 for the former and 2 for the latter. The "Bad Boys," Capt. W. Bunting, played a match game of base ball with the "Lazy Boys," Capt. H. Merritt, the B. B.'s scoring 4 and the L. B.'s 2. The "Good-for-Nothings," Capt. Russell Bellamy, and the "Take It Easy," Capt. R. Northrop, played a game, which resulted in a score of 6 for the former and 8 for the latter.

Reproduction of an Old Portrait. We were shown a day or two ago, at Yates' book store, a portrait of Mr. Wm. A. Willson's mother. The original was taken fifty years ago, the lady herself having died about the year 1837. The old picture had become very much faded and dilapidated, and the present one is a reproduction by Mr. E. V. Richards. It is a fine picture of a handsome lady, aged about thirty-five years, and has been placed in a large and fine gilt frame. Those who know say the copy is a very correct representation of the original.

The Fayetteville Branch. We have authority for the statement that fifty miles of the Fayetteville branch of the Wilmington & Weldon Railroad next to Wilson have been let to Messrs. J. A. Montgomery and Wright & Co., of Birmingham, Ala., and that the remaining twenty miles have been let to Mr. J. W. Harden, of Marvin, N. C. Work upon these contracts will begin in fifteen days, and it is understood that they will be completed by the 1st day of April, 1886.

RIVER AND MARINE. —Yesterday the steam propeller Greenwick, Capt. H. Clay Cassidy, from Jacksonville, bound for New York, put in at this port for fuel. The old friends of Capt. Cassidy were glad to meet him and shake hands with him once more. The Greenwick is bound North.

—The rigging, rope and blocks of the wrecked Sch. Gen. F. E. Spinner, off Federal Point, which were purchased by Messrs. A. W. Watson and W. E. Farrow, at the auction sale of vessel, cargo and effects, on Monday last, have arrived here. Mr. W. L. Smith, Jr., bid off the cargo of coal, the hull and the anchors, and the amount realized altogether was only about \$300.

DEATHS. FENNEL.—In this city, yesterday morning, at 7 1/2 o'clock, CHARLES B. FENNEL, son of Owen and C. C. Fennel, aged 29 years and 6 months. Funeral will take place this afternoon, at 3 o'clock, at the house on Dock street between 5th and 7th, thence to the First Baptist Church, and thence to Oakdale Cemetery. Friends and acquaintances are respectfully invited to attend.
