WILMIN'GTON, N. C. TUESDAY EVENING, MAY 5, 1885.

EVENING EDITION

JUDGE BLACK AND S. J. RANDALL. The Philadelphia Record is one of

the able papers of Philadelphia, and it has a circulation of about 100,000 daily. It is a thoroughly Independent paper, and is a very able advocate of Tariff Reform. It, in common with Philadelphia Democratic papers, has a great distrust of Mr. Randall as an exponent of De mocracy. They openly charge, and it is unquestionably a fact, that he is kept in the Congress by a Republican gerrymander. The Times, an Independent Republican paper with High Protection proclivities when it is honest and out spoken, says Mr. Randall can do more good to the Protectionists of Pennsylvania by being kept in the Congress as a Democrat than by turning him out and putting some Republican in his place, or words to that effect. This was said some time ago.

Judge Jeremiah Black was the ablest Democrat in America up to his death. He never paltered with his conscience for place or power. He never held with the hounds and ran with the hare. He was a genuine Democrat, and we are glad that selections from his political writings are soon to be given to the country by his son, the present Lieutenant Governor of Pennsylvania. It will be good reading and is much needed now to teach men what Democracy is, and the difference between principles founded in the Constitution and principles that are formulated in a spirit of open hostility to that sacred instrument-the difference between local government and consolidated power-between States attending to their own domestic affairs and Paternal usurpation and foolery-the difference between a tax levied for revenue with incidental protection and a tax levied for protection with incidental revenue (which is the Randall idea)-the difference between a Government of the people, and by the people and for the people, and a Government built up by usurpation and destruction and held together by the "cohesive power of public plunder." Judge Black's political writings should be studied, and it will be then seen how great the gulf that separates a people who steadfastly hold to the grand principles that gave vitality, force and unity to the Democratic party in the past and that class or party that advocates a system of taxation that oppresses the many for the benefit of the few, that upholds and favors a system of Federal interference in State affairs, and that seeks by constant effort to undermine and ultimately to destroy the sovereignty and autonomy of independent Commonwealths.

Judge Black was no more like the

of darkness and despair, The Philadelphia Record said this of him only a few days ago:

"Judge Black, who was not in the habit of compromising with his conscience for the sake of party policy, used to declare that no protectionist could be a Democrat." But, notwithstanding this truth, a good many advocates of the existing tariff are masque-rading as Democrats."

THE PIELD IS THE SOUTH.

The Republican Protectionists in the North are building their hopes upon the ignorance and selfishness of the Southern voters. Just as they find that discussion in the North is converting its more intelligent manufacturers into Tariff Reformers, and that Protection has most signally failed to protect they become the more earnest and enterprising in trying to capture the South and make the cupidity and selfishness of men serve their ends. Of course they are trusting to men's great ignorance in this matter.

It is a singular fact that nearly every author of any note in the North as a political economist is an open Free Trader or a very decided enemy of Protection. Not only so, but of the eighty-six works on Political Economy in the great British Library (the Museum) but two favor the Rob Roy doctrine of Protection. Very curious that if Protection be honest and fair and sound in theory. It is most singular that they who know most about political economy should be openly hostile to the iniquitous and unfair principle of Pro-

But the South is the canvassing field for Protectionists. They trust that manipulated facts and repeated sophisms and false logic will delude the Southern people as they have so long deluded the masses in the North. Light is breaking in that section, and now the prapagandists turn to the ignorant South feeling that their only remaining chance lies here. The Washington Post says:

"But it is nevertheless true that the South more than any other section for recruits to enable them to put off temporarily any change in that system and to rivet it upon the country for all time, if possible. Their firm hold upon New England is gone and they are losing what little strength they have had in the West. They are forced, as a last resort, to turn to the South."

NEGROPHILISM AT WORK.

A Rev. Dr. Allen, a fanatic and negrophilist, we suppose, has charge of Biddle University (colored), near Charlotte. He has so interfered with the arrangements of that institution that the Southern Presbyterians are on a big disgust and will wash their hands clean of it. This man Allen gives notice that social equality is now rampant and that whites and negroes eat and hobnob together, and, we suppose, bunk together. Sambo has the worst of the bargain, for Sambo is a more decent fellow than his white brother, who, in an attempt to destroy the color line, simply degrades himself. The Charlotte Ob-

"They say it is a fact that the colored people at Biddleville now allow the white folks to eat at their table and also to enter their parlor and mingle with them in social

This Dr. Allen gives notice that not only do four white (so-called) Professors eat and mix socially with the negroes, but "all visitors, be they white or colored, * * do the same thing." We are sorry for the visitors when they are caught in the social fly-trap. Our neighbor, the Presbyterian, has some healthy 1emarks on this new departure. We do not know who is more to be watched and despised-a Mormon emissary or a white fellow who is so in love with Sambo and Pompey that he systematically attempts to degrade

Our ably and intelligently edited contemporary, the Norfolk Land mark, refers thus to the popular idea of what newspapers are published

"But the dear public for the most part thinks that the newspaper is published 'for fun,' or at least this seems to be the prevailing view, whereas there is very little fun in the business, even when a paper is rich enough to retain a 'funny man' to illuminate its columns."

Some people think it is published for their benefit. Others think that a town of 8,000 whites ought to pub-20,000 or 50,000 whites. They are so intelligent that it has never occur red to them that to publish a newspaper is a very expensive business and that a community is apt to get quite as good a paper as it will pay for. Verb sap.

Wilmington had 22 deaths in April exclusive of 4 drowned, 4 still born and 2 suicides, There were 22 from disease and old age. This is great improvement over some of the months of last year. It is a death rate of 18.4 in the 1,000 inhabitants last named than an angel of light is for the year. The death rate for like the sootiest devil in the regions whites was but 9 in the 1,000. The swindlers,

first three months the deaths were A CLEAN SWEEP WANTED. 100. Add 22 and we have 122 for 4 nonths in a population of 20,000. This is 18.3 for the 1,000 inhabitants or one year. The white deaths would not exceed upon this rate of mortality more than 13 in the 1,000.

According to the following Mr. Bayard and the President have made another blunder. The N. Y. World publishes the following dispatch sent to Secretary Bayard:

"You have been imposed upon. The appointment of Putnam to day as a disgrace to the Administration. This man would sell the American flag to the heathen for an undershirt. His financial recor as a bleeder has been a public scandal.

There is universal disgust at his appointment.

CURRENT COMMENT.

- Judge Gayarre applied for the Naval Office at New Orleans, but it was given to Mr. H. P. Kernochan. In his remarkable letter to the President the Judge recalls the fact that he had been elected to the Senate of the United States, and the offices he has filled are numerous, in law, legislation, finance, education and diplomacy. Not for his fifty years of Democratic service, did he wholly urge his claim for recognition. but on an unusual basis thus: I wish it to rest on more elevated groundthat of my being one of the well known representatives of the literature of the South who should be entitled proportionately to as much recognition as the representatives of the literature of the North, on whom official patronage has always been systematically and properly bestowed without distinction of party.-Augusta Chronicle, Dem.

-- What is "Protection?" " "Protection' is taxation. If the 'protective' tariff did not increase the price of merchandise, it would afford no 'protection.' It is taxation of Americans. Not Englishmen, or Frenchmen, or Germans, but our own people. We pay the extra price for the protected' articles we consume. Can a country's prosperity be increased by taxation? Are the people of a country to be made richer and happier by taking away a part of their living? Is it possible that the prosperity of a country can be increased by taxing the people to pay men for carrying on industries which would not be profitable otherwise? Do the people of this country understand that in the price of almost every article they consume they pay something to keep certain protected manufacturers alive?"-Boston Herald.

IN FAVOR.

Phil. Record, Ind. Reform. Whether by accident or design the late Democratic members of the Forty-eighth Congress who entered into the coalition with the Republicane to defeat the introduction of a bill to reduce needless taxation are receiving a considerable degree of attention from the Administration at Washington. One of them has just been made a Postmaster in Pennsylvania for his share in defeating Democratic policy, and Thomas M Ferrel, ex-Representative of the district over the river in New Jersey, has been appointed Collector of Internal Revenue, after naming one of his friends for postmoster in Camden. These appointments indicate that in Pennsylvania and New Jersey at least it is judicious for a Democrat to be a high tariff man in order to be in favor with the Administration, whatever may be the case in other latitudes. Yet it has been generally believed that the Administration is in favor of tariff reform. Probably its prudent policy is to give the offices to the opponents of tariff revision and to concede the policy to the revenue reformers.

An Opinion of Mugwumps. The correspondent of the Indianpolis Sentinel, who is a confidential

friend of ex-Senator McDonald, has

telegraphed to that paper as follows: "There is a good deal of indignation among prominent Democrats at he national capital on account of the attitude of the mugwumps in trying to dictate to the President. Indeed, the Fresident himself is said to be already disgusted with these political eunuchs, and has served notice on them that this is to be a Democratic Administration, and meddling on their part with the affairs will be

Sound Sense from the South.

Chattanooga Times. We say to our Northern readers, as we have said many times: Be-ware of "Southern" industrial papers that are not printed in the South. They are, every one, so far as we have tested them, frauds pure and simple. Generally they are run in the interest of some land, manufacturing, mining, railroad or other scheme, which scheme is in the conduct of unconscionable sharks and

The Mahoneites have held a council of war, and the sounds of preparation for the fall campaign are becoming audible. Governor Cameron has led off, but it must not be forgotten that Mahone and his lieutenants may come to an understand-ing before November; and our safe plan is to count on a fight with the Mahoneites as a whole. If this should prove an erroneous calculation so much the better. In the meantime the Democrats have a good deal to look after, and we trust Mr. Cleveland will finish up the business of dispensing offices soon enough to let our Demogratic Congressmen get, back to their districts and to the work before them. If he wants to avoid one mistake, at least, let him make a clean sweep of the office-holders in this State; and when that is done he will have made a whole-some example of partisans who were office.

The Post in an editorial this morning crowd se thickly on us, would be of little moment. If thereby we avoided war, but even if the frontier question is settled the inevitable conflict will only be postponed for a brief period."

The Standard says editorially: "Earl Granville throws up the sponge in a most artistic manner. We have no doubt that when the British Empire perishes, it too will have learned to die aesthetically. It remains to be seen how much life there is Cleveland will finish up the business offensive in office.

The Farmer Pays for All.

Louisville Courier Journal, Dem-A 27 per cent. tariff would cost the farmers as much as the whole amount of their sales to the protected classes. Our present 44 per cent. tariff costs the farmers nearly half as much again as their entire gross receipts from the sale of their products to the protected classes. The farmers pay \$1.50 for the privilege of selling to the protected classes as much of their products as will bring \$1.

> Too Diaphaneus. Boston Herald, Ind. Rep.

It is announced that Samuel Randall is engaged in preparing a tariff bill which will "reduce the revenue to the lowest allowable limit, without affecting the protection now afforded to manufacturing interests." The sort of a tariff reform bill that the agent of the Pennsylvania monopolists would draft can easily be magined.

OUR STATE CONTEMPORARIES.

An administration from either political party which is noted for corruption, had management and narrow prejudices, should be condemned openly by not only those who hold offices, but the great mass of the people as well; still no greater calamity or surer overthrow can come to a party than to have in its employ those who are inimical and hostile thereto. - Edenton Enquirer.

The visit of Dr. C. H. Wiley to our town calls up some of the many services he has rendered to the State, principally in connection with the common schools. He filled the office of Superintendent of Public Instruction from about the year 1848 till the conclusion of the war. He found the system, if system it might be called, in chaetic confusion; but at the beginning of the war North Carolina was considered as having the very best and most efficient system of common schools in the Southern States It was due to Dr. Wiley. He had everything to do, and everybody to instruct. He exerted himself with great ability and indus-try. Fortunately the Legislature stood by him, and he had overything pretty much his own way, save the lack of money. He wrote well, talked well and managed well, and to day the State is under obligation to him for his efficient services in the cause of common school education.—Pittsboro Home.

POLITICAL POINTS.

-One of the latest complaints againts the President is that "he keeps his own counsel most rigidly"—even from his Cabinet officers. Mr. Cleveland has evidently learned to have a low opinion of a secret that is shared by two. - Boston Herald, Ind. Rep.

The critics of Senator Eustis who don't relish his plain and outspoken denunciation of the Administration, make haste to charge him with representing a bad ring. This is all true. But it is equally true that Mr. Eustis and his bad ring were one of the potent forces in accomplishing Mr. Cleveand's nomination. They are no worse now than they were then .- Phil. Press, Rep. Organ.

Metal Poison.

I am a coppersmith by trade, and during a series of years my arms (being bare when at work) have absorbed a wonderful amount of metal points. son. Having a scrofulous tendency from my youth, the small particles of copper and bras would get into the sores, and by this process the poison was conveyed into my blood till my whole system became infected. I was treated with the old remedies of mercury and iodide potassium. Salivation followed, my teeth are all loose in my head, my digestive organs deranged, and I have been helpless in bed for over a year with mercurial rheumatism. My joints were all swollen, and I lost the use of my arms and legs, and became helpless as an infant.

My sufferings became so intense that it was impossible for me to rest. The doctors advised me to go to the city hospital for treatment. This I could not bear. A friend who has proved a friend indeed, urged me to try Swift's Specific, believing it would cure me. Others discoursed believing it would cure me. Others discouraged me, but I secured a few bottles, and have now taken two dozen bottles. The first effect of the medicine was to bring the poison to the surface, and I broke out all ever in running sores. They soon disappeared, and my skin 'cleared of. My knees, which had become twice their natural size, have resumed their usual size, and are supple as of yore. My arms and hands are all right again, and can use them without pain. The entire disease has left all parts of the body save two ulcers on my wrists, which are healing myidly. I am weak from long confinement, but I have the use of all my limbs. This medicine is

The drouth in Southwest Georgia last spring dried up the wells, and we were compelled to use water from the creek on the plantation. The result was that all were troubled with chills and fever. I carried with me several bottles of Swiit's Specific, and as long as I took it I had perfect health. As soon as I ceased taking it I, like the rest, was afflicted with chills. When I resumed its use it was all right again. We have used it in two or three years, and have never known is to fail in a single instance W. C. Furlow.
