they might be lifted up and made men, they voluntarily shouldered the great burden and in their peeled con dition, in their poverty, they taxed themselves each year to send the schoolmaster to their homes. The sum thus raised has steadily increased until now it is more than seventeen million dollars. It is most commendable. It is most extraordinary. And yet, in the face of such facts, of such a splendid record, there are men, Dr. Curry amongst them, who are willing to reduce the South to the humiliat-

ing condition of being pensioners upon Federal bounty and to have the Paternal Government interfering in the public education of the sovereign Commonwealths. Money is indeed the great leveller, and the money of the Federal Treasury is well calculated to so level the States that the car of Centralization can move on in every direction right over State lines and meet with no obstructions, Constitutional, Congressional or political. Let the South stand by a strict construction of the Constitu-

tion and educate their own people without Federal aid or interference.

# THE TARIFF TO BE ENFORCED.

If Secretary Manning carries out his plan of enforcing the present very unreasonable and high Tariff he will be regarded by the Protectionists an "offensive partisan" and in a new way. It appears that under the exorbitant tax there has been much discrimination and latitude given to the collectors, and the result is that the tax has not been collected in full. The Secretary of the Treasury has determined to have the law enforced fairly and thoroughly. Of course the High Tariff advocates cannot object even though there should be gross inequalities and oppressions resulting. If the present War Tariff be really what its friends have claimed then there cannot be too

the required fifteen knots, even in the alleged successful third trial trip on the sound, while, in order to meet the fifteen knot sea speed required by the law she should lasve run seventeen or eighteen knots in smooth water. The design of the ship, considered as a dispatch boat, is ab-surd. She cannot make speed, and she cannot defend herself. The only use for a gun

on such a ship is for a fore and aft fire, and et her six inch gun can shoot in neither of these directions. She cannot fire at a vesse which she may be pursuing, nor at one rom which she may be flying. The Dolphin was the first of sev-

eral ships that were to be constructed

for the Navy Department. Roach has shown himself incapable and dishonest. He builds an useless ship and is anxious to palm it off upon the Government at a big price, but the new Democratic Secretary of the Navy is too sharp for him. The goods must be up to the standard or no money will be paid. . John has failed, egregiously failed. The Post's special says:

"The report is a sad story of an inefficient advisory board, and of a cunning ship builder who was a week too late in asking for the acceptance of his vessel. If Mr. Roach had been a week earlier Mr. Chan dler would have tied to the wharf of the Brooklyn Navy Yard a graceful addition to the useless hulks of our Navy.
