The prosperity of Wilmington would be greatly enhanced by the establishment of any of the small industries that are so numerous, and so profitable, at the North. We have all the natural advantages, especially for wood-working manufactories; but some how natural advantages don't count for much in these matters, or at least the lack of natural advantages is no bar to success. The industries of Northern cities are built up, we imagine, by enterprise on the part of their promoters; but with the facilities for transportation and other advantages that Wilmington could offer it

THE FLORENCE, NIGHTINGALE OF THE NURSERY.—The following is an extract from a letter written to the German Reformed Messenger, at Chambersburgh, Penn.: A BENEFACTRESS. Just open the door for her, and Mrs. Winslow will prove the American Florence Nightingale of the Nursery. Of this we are so sure, that we will teach our "Susy" to say, "A blessing on Mrs. Winslow" for helping her to survive and escape the griping, colicking, and teething siege. Mrs. WINSLOW'S Sooraine STRUP relieves the child from pain, and curres dysentery and diarrhœa. It softens the gums, reduces inflammation, cureswind colle, and carries the infant safely through the teething period. It performs precisely what it professes to perform, every part of it—nothing less. We have never seen Mrs. Winslow—know THE FLORENCE, NIGHTINGALE OF THE

The Virginia Legislature is patriotic and-selfish. It has adopted unanimously a joint resolution indorsing the infamous Blair bill. It goes it strong for "the old flag and an appropriation." It is a very discreditable vote.

of taxes.

We are indeed delighted that our friend, Rev. Dr. Milburn, was elected chaplain of the Democratic House. Col. Morrison, of Illinois, indorsed him as "a man who feared God, loved his fellow man and voted the Democratic tieket."

The pensions for the year ending 30th June, 1885, aggregated \$64. 978,455-an increase of \$8,069,838 over the preceding year. Since 1861 the United States have paid \$714,-040,541 in pensions. Is it any wonder that taxes are high? There are 345,125 pensioners.

A curious story comes from a quiet New England village. At Fall River, Mass., Dr. Arthur C. Purce, a young and successful physician, was shot at in his house. His dwelling and barn have since been burned and his life is made miserable. The object is to drive him away, it is said.

McClure, of the Philadelphia Times, is a keen politician, shrewd and observant. He favors a reduction of the Tariff, although a Protectionist. He sees that it is inevitable. He writes that "the free traders are jubilant over the suicidal policy of the protectionists that proposes to resist every form of tariff revision." But there are no free traders

Secretary Manning estimates that the expenses of the Government for the fiscal year ending 30th of June, 1887, will amount to \$339,580,552. The estimates for the present fiscal year were \$323,911,394. So there is not much chance for the accumulation of a surplus when the total receipts for the year ending 30th of June, 1885, were but \$322,690,706.38.

He gives such accounts of the grand crops in his fertile mountain section as do one good to hear. There never were such fine crops, and the country is full of the best cattle. His section never was so prosperous as now. On twenty five acres of mountain land he raised the past season 1,500 bushels of corn. Fer-tilizers are very seldom used there, but on ten acres of this land he used 600 pounds of guano.

- Many people seem to think it a cheap way of advertising to flood a town with circulars and hand-bills. But it is not. To print a thousand circulars will cost two, three, or more dollars, to say nothing of the expense of distributing

them. The same matter might be printed in a newspaper as an advertisement and should not be difficult to attract manufactures here if the citizens act together with spirit and determination.

It is interesting to read in this connection of Hartford, Conn., which the paper men tioned above says is proportionately the

richest city in the United States :-"As the insurance business stands out so prominent whenever one thinks of Hartford, many persons do not realize the amount of manufacturing which is done within the city limits. There are in fact 124 manufacturing concerns with a reported capital of \$20,905,676, bringing up the to tal capital invested financially and other-wise to over \$780,000,000. These are large figures and they tell their own story."

A Cold Wave Coming.

Yesterday morning the Chief Signal Offi cer at Washington telegraphed to the observer at the Wilmington station as follows:

"10.30 A. M .- Hoist cold wave signal The temperature will fall from fifteen to twenty five degrees in the next twenty four to forty-eight hours."

The cold wave signal could not be displayed, because the storm signal was up. This, it will be remembered, was the case when the last cold wave came. There is only one flag-pole at the signal station here, and another cannot be furnished because of the lack of an appropriation for the pur-

pose. The temperature here at the time the above warning was received was seventyone degrees. To verify the prediction the temperature should fall to-day or to-morrow to fifty-six or forty six degrees.
