

Lynchburg, Va., had a distinct shock of earthquake Friday night at 11 o'clock. Gen. B. F. Cheatham died in Nashville, yesterday. — J. F. Cobb has been nominated for Congress in the Fifth District of Alabama. — It is feared that the Bermuda Islands have been seriously affected by the earthquake shocks.

Lighthouses on the South Carolina coast were injured by the "shakes." — Augusta, Ga., reports slight shocks of earthquake yesterday. — Prof. McGee, investigating the earthquake at Summerville, S. C., says that he is confident the worst has passed. — Confidence is returning to the people of Charleston, repairs of buildings are being undertaken; camps have been organized for the refugees and a relief committee will provide clothing, food and shelter for all. — N. Y. markets: Money 60@61c per cent; cotton steady at 93 16@94c; wheat, No. 2 red September 86 1/2@87c; southern flour steady; corn, No. 2 September 50 1/2@51c; rosin steady at 98@99 1/2; spirits turpentine dull at 84c.

A Bessemer steel plant is to begin operations at once at Richmond, Va. The Indiana Republicans straddled on the liquor question. They adopted a plank that faces two ways.

Blaine is now wading into the third party in Maine. His whole rhetoric is aimed at Neal Dow and the Prohibitionists.

The say in Tennessee that Bob can out-talk Alf Taylor; whereof the Democrats rejoice and the Rads are down in the mouth.

Morosini's daughter Vio has now deserted the coachman she ran away to marry, and has gone off with a Boston fellow. Lost.

Cotton crop reports from South Carolina are very unfavorable we regret to learn. Corn is good on uplands but ruined in the bottoms.

Richmond is having a \$340,000 City Hall erected. It has bought the site and expended \$60,000, but no lick has been yet struck to build the hall.

It does look that Charleston was the centre of the disturbances, although the roaring that preceded the shocks here on Tuesday night came from the northwest.

Secretary Bayard regards the attacks on his man Sedgwick as aimed at himself. We have never been able to find out whether the Envoy got "gentlemanly drunk" or not.

There are by actual count 150 papers published in North Carolina. They are so numerous that we find it impossible to make the entire rounds weekly in dishing up State news.

The discontent of the Scotch crofters and cottars is so great and so increases that it looks as if England was to have another Ireland upon its hands. Dr. G. B. Clark, M. P., from Caithness-shire, is the Parnell of Scotland. He is the champion of the Scotch.

Billy Mahone has suffered a defeat at last. The Republican Congressional Convention would not nominate his man but selected William E. Gaines, of Nottoway, by a vote of 93 to 23. This is a most crushing repulse and shows Mahone's weakness at home and his waning power. His grip is gone.

Wilmington had 5,000 people in 1844. Raleigh had about 4,000. Wilmington now has 20,000. Raleigh probably about 10,000. When Gen. Washington visited Wilmington in the nineties of the last century it had 1,100 inhabitants. In the Revolutionary War it had 300. In 1844 it had four churches. It now has probably thirty or more.

Prof. Shaler, of Harvard, thinks it was not much of an earthquake after all. But the Professor was not at the right place for observation. The fellow standing on the topmost bough of a tree on the mountain with the water up to his chin, hailed Noah as he passed and asked to be taken in. This refused, he declared it was not much of a shower after all.

The Savannah News of Friday heads its eleven columns of Charleston news with the following startling lines:

"A Yawning Inferno—Charleston on the Crust of a Crater—Huge Bottomless Pits—Lava and Water Hurled High in the Air—Nature's Hideous Jaws—Great Seams in the Earth Opening and Shutting—Subterranean Explosions—Convulsions Following Each Dire Detonation—Forty Corpses Found—As Many More Buried Beneath the Debris."

The eminent Professor Swain Newcomb laughs at the idea of the weather being affected by planetary changes, and says, "there are no planetary changes occurring, and when it is remembered that the changes we have had during the season do not affect the earth a foot beneath its surface, the absurdity of the theory is apparent."

THE CITY.

NEW ADVERTISEMENTS. FIREPLATE—New goods. JAS. MADDEN—For rent. YATES—Fire mouldings. 18 N. 5TH ST.—For rent. W. S. JEWETT—For rent. M. M. KATZ—New goods. BEN WHITE—Hung again. B. F. MITCHELL—For rent. C. M. HARRIS—Notary's Seal. HANSENBERG—School books. MRS. LOEB—School reopening. GILES & MURCHISON—Powder. L. J. POISSON—Real estate agent. EVANS & VONGLAHN—Disolution. CAUTION NOTICE—Crew brig Maria. J. W. GORDON & CO.—Rice birds. McDUGALL & LOVE—Carriages, etc. W. E. SPRINGER & CO.—Rice birds. LAST REGATTA—Carolina Yacht Club. HARRISON & ALLEN—Nutria stiff hats. G. B. FRENCH & SONS—Boots and shoes. W. H. GREEN & CO.—Soap, brushes, etc. PARKER & TAYLOR—Drive well pumps. WILLIAMS, RANKIN & CO.—Bagging, flour, molasses, yarn, etc.

Local Notes. — Cotton receipts yesterday were five bales.

—Services in English this morning at St. Paul's Lutheran Church.

—What's the matter with the hens? Eggs are selling at 25 cents per dozen.

—Rev. Dr. Pritchard will occupy his pulpit, First Baptist Church, at 11 a. m. to-day.

—Regular services have been resumed in St. Mark's Church. See church calendar.

—Milk shakes are not as popular as they were before the earthquake began. Why is this?

—The County Register issued four marriage licenses the past week—two for whites and two for blacks.

—Rev. Mr. Tuttle returned home last night and will hold services to-day at the usual hours in his church.

—The Rev. Dr. Carmichael having returned to the city, the usual services will be held in St. John's Church to-day.

—There were two interments in Oakdale Cemetery the past week—an adult and a child. In Bellevue there was one interment—an adult.

—The Board of Aldermen meet in regular monthly session to-morrow afternoon, at 4 o'clock. The Board of Audit and Finance meet at 8 p. m.

—Supt. O. M. Sadler, of the Southern Express Company, has telegraphed to Manager Williams, at the office here, to forward all contributions for the Charleston sufferers free of charge.

—The well known firm of Evans & VonGlahn has been dissolved; but both members will continue business as dealers in shoes, leather, etc.; Mr. Evans at the old stand and Mr. VonGlahn at No. 109 Market street.

—To a correspondent at Whiteville, who complains of the failure of the STAR to reach him, we can only say that it has been caused by the interruption to the mails caused by the earthquake. The trouble has been remedied.

Laurinburg has a shock. Laurinburg felt the earthquake shock Friday night. A correspondent writes that it was accompanied by the usual rumbling sound, like distant thunder; houses were shaken but no damage was done. The shock occurred at 11 o'clock. People were greatly frightened.

The shock in Onslow. A correspondent at Richlands, August 31st, writes that the shock was severe at 9.53 p. m. Three others were felt. The first lasted thirty-five seconds. The streets of the village were thronged with excited people.

CHARLESTON.

Return of the Relief Committee Sent by the Citizens of Wilmington—Substantial Aid Extended—Gratitude Expressed by the People—Impressions of the Victims.

Mayor Hall, Rev. Mr. Lewis and Alderman Boney, who went as a committee from this city to Charleston, to tender the aid of our citizens to the sufferers in that city, returned yesterday morning. Mayor Hall, who was interviewed yesterday, gave us his impressions of the visit. He says that the committee arrived in Charleston just before sunrise Friday morning. There were no indications of the earthquake around the Northeastern Depot, except the absence of the usual number of hacks and omnibuses, the houses in that neighborhood being generally of wood, which appeared to have escaped serious damage all over the city. The indications, however, Mayor Hall says, increased, and when the party reached the Charleston Hotel, the entire sidewalk was found filled with bricks and mortar from the upper portion of the portion of that building.

After breakfast at the hotel the committee ordered a carriage and started on a tour of inspection, which is best described in Mayor Hall's own words: Going down Meeting street the signs of destruction increased at every step until we came to Broad, where the view was appalling. On our right the Court House was badly rent in many places, from top to bottom. Opposite to this was the Police Station, a building as large as our City Hall without the Opera House annex, completely demolished. Directly opposite this, on the east, is St. Michael's Church, apparently ruined, its famed steeple sadly out of plumb and threatening every moment to fall. It is very doubtful if it can ever be repaired. Going down Broad street every building showed more or less signs of damage. The front of the News and Courier building is badly damaged. Turning down East Bay, and all around the Battery to West Bay, the destruction I may say was complete. Those magnificent and historic houses on East Bay, the most aristocratic in the city, were utterly ruined. Every brick house there I take to be worthless, except the old material contained in them. Passing around the Battery, the same scene of destruction met our eyes everywhere. Going up King street, now and then a brick house, notable among which was the Williams house, would be seen apparently undamaged; but we heard they all suffered seriously inside. It was with difficulty that our driver could pick his way through the debris-covered streets.

Going down on East Bay to enquire after friends and deliver letters, some of our delegation heard heart-rending accounts from different ladies whose experience must have been terrible. We were then shown where the waters were forced through the earth, overflowing a considerable area, leaving cone shaped mounds. For two hours we continued our drive all over the city and everywhere the destruction was more or less complete.

As a general rule the frame buildings fared by far the best. But to sum up in a word, my impression is there is not a building of any kind or size in the city of Charleston but was more or less injured. I should say that the population of the brick houses in the city are seriously damaged and twenty-five per cent. ruined irreparably. I have heard various estimates of the loss and after seeing for myself, I should say the actual loss of real estate would not be less than twenty per cent. on the assessed value, which is, I believe, \$33,000,000. You can make your own calculation.

The loss of life we found to be not one-half as serious as reported, which fortunate circumstance was attributable to the fact that nearly the entire population of the city were within doors at the time and the danger was over before they could get on the streets. I am satisfied that if the calamity had happened during the busy part of the day, and while the sidewalks were crowded, the loss of life would have been fearful.

Considering the terrible exposure of the people, and their awful surroundings, and the intense state of suspense and anxiety concerning the future, the appearance of the people generally struck me as being heroic and worthy of praise. All were on a terrible strain, not knowing at what moment another and more fearful shock would be upon them.

At 12 o'clock we proceeded to the City Hall, by appointment with the Mayor pro tem. There we found everything busied with energy. Our interview with Mayor Boney was brief, as he was overcome with business. I explained to him that we were a committee sent over by the citizens of Wilmington to express to them the deep sympathy felt in this, their supreme hour of distress; and from the fact of all communication being stopped by telegraph that our anxiety as to their people was so great as to cause us to come to help at all hazards, and tender to them our services in anyway needed. I also handed to him the resolutions passed at our mass meeting as fully expressing the sentiments of our people. We also placed in his hands \$1,000 in currency and informed him that an additional \$1,000 in money would be sent him on our return. The Mayor replied, accepting our expressions and donation with much feeling, and stated he would explain our mission to the citizens of the city. Our contribution and offer to help were the first that was made by committee or otherwise, and was deeply felt in the city.

The treasurer who accepted to Alderman Boney for the funds, stated to him that the presence of our committee under the circumstances, even if not bringing one penny worth of news, had forgotten by the people of Charleston. We are felt that we have done the right thing in going as we did, and only regret that we could not do more for that most unfortunate city. The result of this calamity in the future of Charleston no man can tell. It looks just now as if that city has received its death blow, for, be it remembered, that unlike a great fire, there is no insurance money to look to. But from the characteristic and indomitable pluck of the people of Charleston, and the pecuniary aid that must come from all parts of the sympathizing world, I may say, I trust they may be able to again restore their beautiful and historic city to the present position of being the "Queen city of the South."

Last evening, just at or about 11 o'clock another well-defined shock struck the city, and at 11.15 our committee left the Charleston Hotel in the omnibus for the depot, and one of the most touching and memorable sights met our eyes that we experienced during the whole day. Undoubtedly that shock must have caused the entire population of the city, from their terribly excited condition, to rush for safety into the streets and parks. On our way from the hotel to the Northeastern depot, on the streets that we traversed, there must have been not less than 5,000 human beings, scattered along in the middle of the streets; every park was crowded. What made it so impressive to me was that among the immense terror-stricken crowd not one sound was heard. Many were on their knees, as if in silent prayer. It seemed that the time for shouting and loud prayers had passed, and that they had looked death in the face and were quietly awaiting the blow.

Personal. Capt. Walter Coney's wife and family arrived here yesterday morning from Charleston. They are stopping with Mr. Jos. McLaurin, Mrs. Coney's father.

Mr. John D. Bellamy, Jr., son of Mr. M. Bellamy, has entered Chapel Hill upon a highly satisfactory examination. Mr. Joseph D. Hanby is attending Wake Forest, where he expects to prepare for entrance into a medical college. These young men were prepared at the Cape Fear Academy.

Capt. Bixby of the U. S. Engineer Corps, in charge of river and harbor improvements at Wilmington, has been ordered from this city to Charleston, S. C., to consult with the Mayor and render such assistance in the examination of buildings and otherwise as may be in his power.

Was He a Chicken Thief? Policeman Woebsie while walking his beat about twelve o'clock Friday night met a colored man with a pair of chickens. Upon being questioned, the man said he had bought the fowls from a man on a flat at the foot of Princess street; but this was denied by the flatboat man, and the man and chickens were taken to the guard house. Yesterday he was released, there being no charge against him upon which he could be held. He gave his name as John Wesley Rowell.

The Campaign. Major C. W. McClammy, the Democratic nominee in the Third Congressional District, will begin his canvass of the district Tuesday, when he will speak at Kennansville, in Duplin; and on Wednesday he will address the voters of Bladen at Elizabethtown. No other appointments have yet been made.

More Shocks. Several persons report that slight earthquake shocks were felt here last night about 9 o'clock. The statement would seem to be confirmed by a telegram from Augusta, which says that a slight shock was felt there at that hour.

Public Baptism. Rev. J. P. King, pastor of the Second Advent Baptist Church, will baptize some fifty or sixty persons, this afternoon at 3 p. m., in the river at the foot of Queen street.

Regatta at Wrightsville. The Carolina Yacht Club announce that the last regular regatta of the season will be sailed on Tuesday at 3 p. m.

—British barque Flash Light, hence for London, with naval stores, put into New York in distress on the 2nd inst. The captain reports: August 24th, latitude 34, longitude 74, had a hurricane from southeast veering to west, blowing with terrific fury for twenty-eight hours, during which the vessel labored heavily, started butts and blew away a whole set of sails and sprung a leak; all hands were constantly at the pumps to keep her free; bore up for New York for a survey and repairs.

PORTY YEARS' EXPERIENCE OF AN OLD NURSE.—Mrs. Winslow's Soothing Syrup is the prescription of one of the best Female Physicians and Surgeons in the United States, and has been used for nearly a century, and its success is proved by millions of mothers and children from the feeble infant of a week old to the adult. It cures colic, regulates the bowels, and gives rest, health and comfort to mother and child. We believe it is the best remedy ever known for colic, and is equally useful in all cases of DYSENTERY and DIARRHEA IN CHILDREN, whether arising from teething or any other cause. Full directions for using will accompany each bottle. None genuine unless the name of CUTLER & TRUENEL is on the outside wrapper. Sold by all Medicine Dealers, at cents a bottle.

DIED. STRICKLAND.—At his home, on Myrtle Grove Street, on Sunday, the 4th inst., at 10 o'clock, JAMES H. STRICKLAND, in the 28th year of his age. He leaves a wife and many friends to mourn their loss. He has passed into life eternal.
