By WILLIAM H. BERNARD, WILMINGTON, N. C.

THURSDAY EVENING, NOV. 11, 1886. EVENING EDITION.

POLITICAL EDUCATION A NECESSITY.

Prior to the war there was a large and intelligent element in both the old parties that had a proper understanding of the leading political issues. In every neighborhood you could find well informed farmers and merchants who understood the issues dividing parties.

What laws will effectively lighten the burdens of labor? What action is necessary to restrain the greed of corporate wealth? What is the province of Government, and what is the proper relation of the Government to the individual?

Are we not right in saying there is the most pressing need of a wider and profounder political education? We again quote from the Courier-Journal.

EXPORTS OF BREADSTUFFS. For the months ending the 1st of September for 1886, the foreign exports of the United States were \$475,411,322, as against \$462,685,242 for the corresponding time for 1885.

There never was a time in the South when there was more need of a correct understanding of fundamental principles. The speeches and votes in the last session of the Congress, and some recommendations of the Legislature show this beyond question.

vote and no man can be sent to prison at the tinkering of an usurper's little bell, or by the mandate of an impetuous Governor who defies law and right, there is a different condition of things. Political questions are not learned without study and reflection.

"Now all political questions are of a complex character; they have to be decided by reason rather than by sentiment. The social relations are of a most complicated character; the social questions are perplexing and difficult of solution. The effect of a law is felt in every department of life, and we must seek in advance to determine its influence and weigh its good and ill-effects."

This brings us to say that the people need political education more now than ever before, for we are satisfied that they are less perfectly informed as to social and political problems than at any time in the history of our country.

We believe that the young men of the South should give more time to the actual study of politics—that they should take the books and master fundamental principles.

There are also some very important English works that should be studied—Jevons, Mongredien, Ricardo, Adam Smith, and others. The young men should thoroughly understand political and economic science as they are to take charge in the future and direct affairs.

Of 7,700,880 bushels shipped they took 3,702,919. There was a large falling off in the corn exports. In 1885, nine months, the exports footed up 10,951,101 bushels.

Blaine again declares he is out of politics. That means nothing as Blaine is noted for his disregard of truth. He will be in politics at a very lively rate in 1888, if he thinks it a good time to make a race.

The Tariff will not do. Protection has been fastened upon the country for a quarter of a century. In 1873 the great panic began. Since then there has not been much prosperity in this country.

One industry in North Carolina has been benefited by the change in the gauge of Southern Railroads. It is the shingle business. The Baltimore Journal of Commerce says:

"North Carolina shingle manufacturers are now able to ship their shingles through by rail to Baltimore, and they are now coming in pretty freely. Prior to this change our receipts of shingles from that State came altogether by water, and timber land for shingle making was valued according to its nearness to water transportation."

THE PERIODICALS. Babyhood for November will welcome to mothers and those having the charge of infants and little children. Price 15 cents a number.

CURRENT COMMENT. If the Republican roosters in the offices of our esteemed contemporaries who belong to that party would take a lucid interval and contemplate the losses on their side, they would "roost lower" and crow less loudly over Democratic set-backs.

THE LATEST NEWS. FROM ALL PARTS OF THE WORLD. CHICAGO. Improvement in the Stock Yards Situation—The Forces Increasing and All Hands Applying for Work—Arrival of a Large Force of Workmen from New York.

THE ELECTORAL VOTE OF 1886. Philadelphia Times, Ind. Taking the votes of the States as cast this year for State officers, and for Congressmen where no State officers were to be elected, the electoral vote of the Union would foot up as follows:

Alabama..... 9 Dem. 10 Rep. 23 Arkansas..... 10 Illinois..... 23 California..... 8 Iowa..... 12 Colorado..... 3 Kansas..... 9 Connecticut..... 6 Maine..... 4 Massachusetts..... 14 Florida..... 4 Michigan..... 13 Georgia..... 12 Minnesota..... 7 Kentucky..... 12 Nebraska..... 5 Louisiana..... 8 Nevada..... 3 Maryland..... 9 Ohio..... 28 Mississippi..... 10 Oregon..... 2 Missouri..... 9 Pennsylvania..... 30 New York..... 36 Rhode Island..... 4 North Carolina..... 11 Vermont..... 4 South Carolina..... 13 Tennessee..... 12 Wisconsin..... 11 Texas..... 12 West Virginia..... 6 Total..... 198

It will be seen that the Democrats carried 20 States and the Republicans 18. Oregon is classed with the Republicans, although her people elected a Democratic Governor this year by a large majority, but it was admittedly on a local issue.
