-The Independent. Facts About the New House of Repre-

sentatives. N. Y. Times.

The oldest member of the House is Judge William D. Kelley, of Pennsylvania. He was born in 1814. Although he is 73, he is not the oldest-looking man in the House or the least active. The youngest member is Benjamin F. Shively, of the Thirteenth Indiana District. Born in 1857, he is only a trifle under 31 years of age. Mr. Vandever, of California, who was born in 1817, was a member of Congress from 1859 until the breaking out of the war of the rebellion. He and Mr. Holman, of Indiana, who was in the Thirtysixth Congress in 1860 61, saw service before Mr. Kelley. Mr. Randall did not make his first appearance as a member until 1863, four years later than Mr. Holman, but he has began his thirteenth consecutive term, standing next in length of service to Mr. Kelley.

As usual the House membership is made up practically of men of one profession. There are 216 lawyers who are Representatives from States, and of the eight delegates from the Territories five are lawyers. Several of the States have delega-

tions composed entirely of them. Mississippi has seven lawyer members; South Caralina has seven; Texas 10; Vermont, two, and West Virginia four. The farmers come next in numerical strength. They count 12, and the farmers and planters together are only 17. The man ufacturers are 16 in number, but there are two iron makers who could properly be included in that classification. The merchants follow the manufacturers. There are 18 of them. Then come the bankers, 10 in number, and there is one broker. There are nine editors, and one journalist. California, Colorado, Oregon have no college men in their delegations in the House. Maryland has five college men out of a total of six, Mississippi five out of seven, New Jersey one out of seven, New York eight out of thirty four, Ohio four out of twenty-one, South Carolina six out of seven, (three of them Harvard graduates,) Texas two out of eleven. Alabama has five college men, two who put themselves down as "self-educated," and one West Point graduate—Gen. Wheeler, who is, by the way, the only man in the House who was educated at the Military Academy.

OUR STATE CONTEMPORARIES.

It is admirable; and we do not wonder at the encomiums, from both parties, that have been passed upon it It is like Cleveland in all his papers, speeches and letters—sensible, strong, pointed, entirely rid of display in superfluous phraseology. Every old farmer in the land ought to read it and be instructed as he never was taught before on the all-absorbing question now before the country, to wit: the tariff and our system of taxation generally .- Rockingham

We know not how it is in other parts of the State, but we do know that the Demccrats of Warren are solidly in favor of taxing the luxuries rather than the necessaries of life; and they know that whiskey and tobacco are not necessaries. We know this is their sentiment because we have been told so by scores of the most intelligent and thoughtful men in the county. What thicking man would tax the food that his wife and little one eat, or the clothes they wear in preference to the whiskey and tobacco be uses. The inter-nal revenue law is not known to more than one person in every thousand. It only requires a license from those who sell liquors and cigars, and this is what the State does. The law is not offensive nor does it interfere with any honest man - Warrenton Gazette.

Gentlemen, be fair and honest, and don't misrepresent and deceive the farmer. You who desire the abolition of the tax on tobacco know as well as you know that two and two make four, that its abolition would not put one cent more into the pockets of the tobacco growers. If the tax of eight cents per pound were removed, tobacco you know would sell for just eight cents per pound less, or ought to. So the abolition or the retention of the tax of eight cents per pound on manufactured tobacco will not make five cents difference altogether with all the tobacco growers in the United States in the prices received for their tocacco, or ought not to. The tax is never paid by the farmer who grows it, but always by the manufacturer after he precipitated into the water below. Four gets it ready for sale. And when sold to suits of Sunday clothes were spoiled, but tax is repaid to the the merchant the sar manufacturer in the increased price; and Mr. E J. Jones, of Taylorsville, is the when sold by the merchant to the consumer, the consumer repays to the mer-chant the tax he paid in the price of the tobacco. So you see the man who finally chews or smokes the tobacco pays the tax.

Now why lie and misrepresent the facts in
the matter? Why not tell the plain, simple
unvarnished truth? We all know, everybody knows, that the consumer of the tobacco, and not the producer, pays the tax. Then please, in the name of common sense and even-handed justice, tell us how the removal of the tax from tobacco will bene-
