The steam tug W. P. Craighill sunk at her wharf near the foot of Dock street about 3 o'clock yesterday morning. She was lying alongside of the tug Marie and was made fast to that boat, but when she careened the lines parted. Mr. Albert B. Mintz, the fireman, was the only person on board the Craighill, and narrowly escaped going down with the boat. He was asleep in the pilot house and was awakened by the boat careening and the rush of water. Springing up he burst open the door of the pilot house and jumped into the river. He swam to the Marie and climbed up her side just as the Craighill went down and disappeared from sight. The sunken boat lies in about thirty feet of water, and efforts will at once be made to raise her. She is an old boat, recently purchased by Mr. James Sprunt, and was formerly the property of the New York Dredging Company. The cause of the accident is not known. She had been engaged to tow a lighter to Southport and took on board an extra supply of wood for fuel, and it is thought that this may have strained her and caused the seams to leak.

The high price of poultry-especially the dressed kind-has probably stimulated the chicken thieves to redouble their exertions, for scarcely a night passes that some one is not made to suffer from their depredations. Monday night, or rather yesterday morning, for it was after 2 a. m., they paid a visit to the premises of Mrs. Gilbert, on South Fifth street near Dock. Mr. R. M. THE PRESIDENT'S PARTY

En Route for Florida-A Pleasant Trip from Weldon - Cheered all Along the Route-A Short Stop in Wilmington,

The special train from Washington, D. C., with the Presidential party on board, arrived at Wilmington last night at 10.40 o'clock. The train consisted of the engine, tender, a hotel parlor car and baggage car. The occupants were the President, Mrs. Cleveland, Secretary Whitney and wife, and Colonel Lamont and wife, with their personal attendants. Capt. Divine, Superintendent of the A. C. L., accompanied the train from Weldon and will see the party through to Charleston. The train did not come into the depot at Front street, but stopped at the old Union depot, to change engine, engineer and conductor. Engine No. 72, in charge of Engineer Zach Nettles, and Conductor Nash Bunting, took the train south from this place to Jacksonville. A careful inspection of the car trucks and couplings was made under the direction of Mr. J. R. Kenly, Master of Transportation, and after a delay of about ten minutes the train speeded

Through the courtesy of Mr. Kenly, a reporter for the STAR went up to the Union depot on the engine which took the place of the one which brought the train from Richmond. He caught a glimpse of the President seated in his car reading a paper. Two or three of the gentlemen of the party were with him, but Mrs. Cleveland and the others had retired for the night.

Mr. Tom Lauther, the engineer who brought the train from Richmond, said that they were greeted by Rocky Mount and other places. The train reached Goldsboro about halfpast eight o'clock and ran very slowly through the town. The President and Mrs. Cleveland stood on the rear platform of their car and waved a greeting to the immense crowd that cheered them heartily as they passed.

The President's train was the second section of the fast train, which reached here about twenty minutes in advance of the second section. On this train there were a number of Senators on their way to Jacksonville, including Senator Call and wife and two daughters, Senator Faulkner and wife, Senator Daniel and wife, Senator Pugh, wife and daughter, Senator George, wife and daughter, Senator Payne and wife, Senator Reagan, wife and daughter, Senator Jones of Arkansas, wife and daughter, Senator Stewart and wife, Senator Butler and two daughters, and ex-Senator Simon Cameron.

Howard Reitef Anniversary. The steady down-pour of rain yesterday prevented the parade of the Howard Relief Fire Engine Company, which was announced to come off at balf-past nine o'clock in the forenoon. While the boys do not mind a wet jacket, fire and not water is the element they take delight in meeting. Everything was in readiness for the parade, and but for the heavy rain it would no doubt have eclipsed all previous efforts. The engine and hose carriage had been handsomely decorated for the occasion and were covered with a profusion of wreaths and flowers, beautifully worked into emblems, etc.

The reception at Adrian Hall was attended by all the members of the company and a number of invited guests, including the officers and members of other white companies, the Mayor and members of the Committee on Fire Department of the Board of Aldermen, the Chief of the Department and Assistant. A collation was spread in the hall, to which all present did full justice, and numerous toasts were given and speeches made. Germania Cornet band were present and furnished delightful music for the occasion.

Lithia and Magnesia Water. OTTERBURN LITHIA AND MAGNESIA WATER. THE GREAT REMEDY FOR DYSPEPSIA AND KIDNEY DISEASES. A FIRST-CLASS MINERAL WATER AT LOW RATES. THREE DOLLARS PER CASE OF SIX GAL-LONS.

GEORGE J. HUNDLEY, proprietor, Amelia Courthouse, Va. The following physicians en-dorse it. Read their certificates: 206 BAST GRACE STREET, RICEMOND, VA.

General George J. Hundley: Believing the Otterburn Lithia and Magnesia Water a valuable agent in the treatment of that variety of Renal and Vesical disorders present where a Gouty Diathesis exists, especially in cases subject to more or less fraquent recurrence of Renal Colic and the passage of Calculi from the Kidney and sandy deposit in the urine, I desire to commend it to the profession and public. In my hands it has succeeded when all other agents have failed.

Respectfully yours, &c.,

JOHN N. UPSHUR, M. D.,

Professor of Materia Medica, &c., in the Medical College of Virginia.

RICHMOND, VA., December 15, 1 886. General George J. Hundley:

For ten years past I have suffered greatly with my Kidneys and Biadder, and nothing gave me reliet until I began the use of Otterburn Lithia and Magnesia Water last August. This is decidedly the strongest of any mineral water I have ever used, and I have tried several kinds for five or six years. When I began the use of this water I had just passed a large stone from the Kidneys, but have not passed any since. I heartly recommend this Water to all who may be suffering as I have been. C. A. HILL,

RICHMOND, VA., September 6, 1887. General George J. Hundley, Amelia Courthouse,

Dear Sir:—Our mutual friend, Mr. Charles E. Wingo, informs me that you desire my opinion of the Otterburn Lithia and Magnesia Water. I am satisfied that it is one of the finest waters in this country for Atonic Dyspepsia, and the tests I have subjected it to have been numerous, but always satisfactory. I esteem it equally high in disorders of the urinary organs—for several of my cases of Kidney trouble have improved more rapidly under the use of the Otterburn Water than Bethesda or Buffalo Lithia. To prove my appreciation I am daily using it in my practice, and have been much benefited by its use in my own case, which is one of Atonic Dyspepsia.

Young Men's Christian Association Buildings. The fact that one hundred and wenty-three Young Men's Christian Associations in the United States and Canada have practically tested the advantage of owning their homes, and have proven that in ever instance their work is not only broader but better since they became possessors of such homes, leads to the belief that such a home is to-day a necessity in the city of Wilmington, if she would care properly for the social, intellectual, physical and spiritual welfare of her young men. It will show to the young men that the Christian and philanthropic men of this city are interested in their welfare, both temporal and spiritual, and it will be a lasting answer to the argument of some that the Christian business men have no interest in young men further

MRS. WINSLOW'S SOOTHING SYRUP.—REV STLVANUS CORR thus writes in the Boston Christian Freeman:—We would by no means recommend any kind of medicine which we did not know to be good—particularly to infants. But of Mrs. Winslow's Soothing Syrup we can speak from knowledge; in our own family it has proved a blessing indeed, by giving an infant troubled with colle pains, quiet sleep, and the parents unbroken rest at night. Most parents can appreciate these blessings. Here is an article which works to perfection, and which is harmless; for the sleep which it affords the infant is perfectly natural, and the little cherub awakes as "bright as a button." And during the process of teething its value is incalculable. We have frequently heard mothers say that they would not be without it from the birth of the child till it had finished with the teething slege, on any comideration whatever.
