FIRE ON MARKETSTREET.

Narrow Escape of a Little Child.

The dwelling of Messrs. S. and B. Solomon, on Market between Sixth and Seventh streets, was discovered to be on fire last night about half-past 8 o'clock. The fire was in a bed-room in the second story of the building, and was caused by a gas-jet igniting a window curtain. The flames were extinguished by people in the neighborhood with buckets of water before much damage was done beyond burning some of the furniture in the room. The Fire Department was summoned by an alarm sent in from box No. 35, corner of Eighth and Market, but its services were not brought into requisition although hose reels and

trucks were soon on the ground. A little child was in the room, but was rescued unharmed, the fire having been discovered, fortunately, before the flames reached the bed on which it was sleeping.

was adopted, that the matter be referred to the city attorney, asking his written opinion as to the legality of the city making such an appropriation.

Bond of the Wilmington Gas Light Company in the sum of \$1,100, for fulfillment of contract with the city, was approved, with E. S. Martin and Richard J. Jones securities.

WEATHER AND CROPS.

Report of the North Carolina Experimen Station and State Weather Service.

The reports of correspondents of the Weekly Crop Bulletin issued by the North Carolina Experiment Station and State Weather Service, co-operating with the United States Signal Service, show generally very favorable effect of the weather on nearly all crops during the week ending Friday, May 16th, 1890 The rainfall was about the average in most sections of the State, except local heavy rains in the Eastern District, but, falling where, as reported in the last Bulletin, rain was badly needed, it has done much good. The following are the greatest amounts for the week: Wilmington, 2.43 inches; Willeyton, 1.33; Lumberton, 1.77; Newbern, 2.30; Douglas, 2.20. A few places still need more rain, the soil not having been moistened to sufficient depth in consequence of which cotton germinates slowly. The temperature has been about the average, except that during the early part of the week the nights were rather cool. On the whole typical May weather prevailed during the week. Increasing warmth and sunshine are now needed for cotton. Farmers are busy, cheerful and san-

EASTERN DISTRICT. Copious rains have fallen in many portions of this district, which last week were reported as needing rain badly. More is needed in Pasquotank, Bertie, Duplin, Sampson, and a few other counties. A bad stand of corn is reported from some places and cotton is germinating slowly on account of dryness. Generally crops are doing very well.

CENTRAL DISTRICT. Average conditions of temperature, rainfall and sunshine prevailed, causing crops to make great progress. Cotton is generally reported up well, with excellent stand, in some places finest obtained in many years. Corn also doing well. Oats and wheat not showing much improvement except perhaps in Harnett county, Prospects excellent for good apple crop, as the flowers were very thick. Grapes in good condition.

WESTERN DISTRICT. The weather has been splendid, not a single unfavorable report has been received. Cotton and corn are everywhere reported as doing very well, and wheat in some places shows some improvement, though it seems certain that the crop will be short, owing partly to the injury caused by rust. Spring oats in good condition. The crop of apples and other fruit will be good. Farmers are in good spirits over the excellent pros-
