The N. Y. Tribune, anticipating defeat, remarks that it. will be very difficult to get out a full Republican vote this fali. Enthusiasm seems to have taken a back seat.

They do say that Gen. Mahone, too, is out of politics. What would Republican politics in Virginia be without Billy Mahone, the most picturesque figure in the whole menagerie.

The Republicans of Michigan declare in their platform that "The Republican party believes that the interests of the farmers should be carefully guarded." That old rot is about played out.

Mr. M. H. DeYoung, Republican, proprietor of the San Francisco Chronicle, says he wouldn't object to being a United States Senator, but as it costs about \$300,000 in his State to be elected he will not try.

Tom Reed has hard luck. Blaine not only got away with him with the patronage in his district, but a poet has got to grinding out verses about him. This is too much, coming all

Leonard Tobias, the reputed son of a New York millionaire, who with his young wife had a royal time in 'sent to Mr. Jones. Yokohoma, Japan, where he lived at the rate of \$5,000 a day till he got

through \$100,000, wound his big time up by shooting a hole through his head after a twenty day frolic. Too much fool and the green-eyed monster was what ailed him. He was jealous of his wife.

The new tariff law is beginning to make itself felt. The Dry Goods Economist says that prices now are about ten per cent. higher than they were in August, on all goods in which wool plays a prominent part as a raw material, while linens and knit fabrics have increased in the same ratio. This is only the begin-

Gould is entirely too thin-skinned to be a Republican. The Cook county, Illinois, Democrats have taken a new departure and have nominated Mrs. Mul-

ligan for superintendent of schools. Mrs. Mulligan is the widow of Gen. Mulligan. She held the office of pension agent at Chicago under Mr. Cleveland's administration, but was ber of fires and false alarms of fire in the removed by Mr. Harrison, to make city.

Special officer Wm. Sheehan was sent to serve the warrant on Melton He found the latter at his home and took him into custody, but while the officer was searching the premises his prisoner got away and finally escaped. The officer found, however, the suit of clothes belonging to Mr. Powers and a number of other articles stolen

from Mr. Northrop's and . Mr. Powers' houses. Robert Jones was also arraigned in

another case, with a colored boy named Charles Robbins, for burglary in the second degree in breaking into and robbing in the night time the residence of Mr. Marsden Bellamy, on Market street, about the time the other robberies mentioned above were committed. On this charge both Jones and Robbins were held for the action of the Criminal Court.

The depredations committed by these obbers were of the most outrageous and wanton character. A police officer who went through Mr. Powers' house said it looked as if Sherman's bummers life. had visited it. Handsome furniture in the rooms had been broken and ruined with a hatchet which had been used to break open bureau drawers, and everything was scattered on the floors. At one of the other houses jars of preserves had been broken and the contents of the jars thrown about the rooms, and carpets, bedding and furniture was otherwise soiled, defaced and injured. Melton, the white man who made his escape from officer Sheehan, is believed to have been a regular "fence" for the disposal of stolen goods.

VITAL STATISTICS. Dr. F. W. Potter's Report for the Month

of September.

The report of Doctor Potter for the month of October gives the total number of deaths in the city during the month as 38, including eight still-born and one accidentally killed-showing a less number of deaths than the same month for five years past. The report says: "We have consumption as a prevailing disease, especially among the colored population and due greatly to their manner of N-S A Norwood. We very seldom have a well marked case of old fashioned bilious fever; which was very common forty years since, as was dysentery. There must be some caase for this, more than

the lapse of time. May it not be the draining of ponds or stagnant bodies of water in our city." Among the causes of death were consumption, which carried off one white and five colored; convulsions, three colored; apoplexy, two colored; typho-malarial fever, two colored. There were over three times as many deaths among the colored population as the white; the figures being : White-adults, 3; children, 6. Total, 9.
