THURSDAY MORNING, FEB. 26, 1891

MORTGAGED FARMS.

A bulletin recently issued by the census department shows the mortgaged indebtedness of the State of Iowa to be on January 1st, 1891, \$199,034,957, that of Alabama \$30,-027,893. This is to be followed up by similar bulletins showing the mortgaged indebtedness of the other States.

These two States are selected for comparison, we presume, because they are representative agricultural States, one from the West, the other from the South. In size there is not much difference, Iowa containing 35,504,000 acres, Alabama 32,985,-600 acres. The average amount of indebtedness per capita in Alabama is \$26, in Iowa \$104. The rate of interest varies in Alabama from 1 to 40 per cent., in Iowa from 1 to 20. This 1 per cent. is simply a blind to cover the real amount of interest paid by mutual agreement, as there is no money loaned at 1 per cent. The 40 per cent. rate in Alabama, refers, doubtless, to those cases where farmers buy their supplies on time and are charged much more for them than if they bought for cash, the difference in price being counted as interest. The 20 per cent. rate in Iowa is based partly on the same reason, although the notes of farmers are frequently discounted at that much and sometimes even more. But it is interest all the same whether it is paid in money as such, or in the price of the supplies bought on credit.

The question might be asked how can the average farmer. North or South, pay these rates of interest, when the money to pay it must come out of his own labor and out of the crops he raises? In Iowa \$104 per capita means \$520 to the head of the average family of five, in Alabama \$130. The Alabama man is in a much better fix to pay his \$130 than the Iowa man is to pay his \$520, for Alabama with her coal lands and iron lands is moving onward, while lowa is at a standstill if not retrograding. Whatever the outlook may be to the Alabama tiller of the soil, there is nothing encouraging in it to the lowa to undertake some movement by

MINOR MENTION.

Senator Gorman in the Senate Tuesday very properly denounced the proposition of Senator Chandler to place in the hands of the President unexpended balances and other sums to the amount of \$250,000 for the prevention of epidemics. The bill to aid the construction of the cable between San Francisco and the Kingdom of Hawaii, puts \$250,-000 a year into his hands which with thistadditional \$250,000, if it had been agreed to, would have given him control of half a million dollars. Mr. Harrison might dispose of it honestly, and with a strict view to the purposes for which it was put into his hands. The presumption may be that he would, and again he might not. It is a well known fact that he is a candidate for renomination, and if he was so disposed he could turn this money to account in securing support in the convention and yet use every dollar of it for the purposes for which it was intended, or he might squander a large portion of it if he were disposed to do so. We would not like to believe that he would and yet to place so much money in the hands of a man who is a candidate for high office is simply to tempt him to make misuse of it. Mr. Gorman very properly condemned the proposition and the Senate very properly agreed with him by rejecting it.

* *

Ex-Gov. Foster, of Ohio, who succeeds the late Secretary Windom, as Secretary of the Treasury, is a bimetalist, but opposed to the free coinage of silver, even if confined to the product of our own mines. If he had been in favor of free coinage he would not have been tendered the place, because he would not be in accord with the President nor with

his party, and a free coinage Secretary would be decidedly out of place in an anti-free-coinage administration. He thinks that the present law requiring the comage of \$60,-000,000 silver annually is sufficient to meet the increasing demands of the country for more circulating medium, but this is as far as he is willing to go until the world is ready

sition. The only objection we have vet seen to it is by the Progressive Farmer, and that is on the ground that it is too small, and not enough to insure such an exhibit as the State should have. But with \$25,000 judiciously expended, and the co-operation of citizens of the State who are interested in the State's showing up well, the exhibit may not only be a good but a very fine one, and the

CURRENT COMMENT.

money will be well invested.

--- At the last session of Congress reckless pensions and a big river and harbor job were the means resorted to for scattering the surplus. This session brings subsidies and increased salaries to the front to convert t the remnant of the surplus into a deficit .- New York World, Dem.

----- The latest census shows 45,-000 convicts confined in the jails and penitentiaries of the United States. "This is a sad commentary on the age in which we live," sighs the Home Visitor. It is, brother, it is. It is a still sadder commentary, however, that many, many more people who ought to be convicts can not be included in that category.-Chicago

Mail, Dem. ---- The "Shipping bill" is what the advocates of steamship subsidy call their job. Why are they so chary of giving the thing its right name? Are they ashamed to tell the public frankly that the object of this scheme is to give a large Treasury bounty to owners of American-built steamships and sailing vessels for every ocean voyage these ships may make? The proper title of this al-

leged "shipping bill" would be: "An act to establish a gigantic monopoly of ocean transportation at the expense of the people of the United States."-Phil. Record, Dem.

Undisputed Merit.

The great success of the Royal Baking Powder is due to the extreme care exercised by its manufacturers to make it entirely pure, uniform in quality, and of the highest leavening power. All the scientific knowledge. care and skill, attained by a twenty years' practical experience are contributed toward this end, and no pharmaceutical preparation can be dispensed with a greater accuracy, precision and exactness. Every article used is absolutely pure. A number of chemists are employed to test the strength of each ingredient, so that its exact power and effect in combination with its co-ingredients is definitely known. Nothing is trusted to chance, and no person is employed in the pre-

car stood outside the Third Street arrived home, but three weeks havdepot the other day, leaning against ing passed by and the letter that they longed for not having come, they telegraphed their agent to ascertain the cause of his delay in forwarding the papers. He answered that he had sent a letter. When it came they learned from its contents that he had not settled the matter, having come to the conclusion that it was best, in his judgment, not to purchase the claims. And this, too, rom a man who had received positive instructions to close the deal.

Well, shortly afterward an agent of Flood and Mackey came along gave the poor prospector a cool \$100,000 and the retention of a oneeighth interest for his claims, and entered into an agreement with the millionaire to work the mine on a ceitain percentage. The company was stocked for \$12,000,000. So, you see, the General's one-fourth interest would have stood him \$3,000,000 The "Copper Queen" is still a great mine, while it is said that the agent who took the contract of working the same has pulled out as high as \$60,000 in one month for his percentage.

POLITICAL POINTS.

Dem.

a porch column with his arms folded. Two colored men coming down the street caught sight of him and halted, and the first observed "Some folks would recken he owned dat big depot.'

"But he doan'. "No. He doan' eben own de rail-

roads. "Nor he doan' own the kyar on

on which he runs." "No.

They were silent for a minute or two. as they looked across at him, and then the first remarked: "He doan' eben own Misser Pull-

man.' "No."

"All dere is about it is dat when de train is about to go out Misser Pullman comes down an' says: 'Gawge, I wish you'd be second boss in dis kyar to Buffalo an' back, an' I'll gin yer fo' dollars.' An' Gawge goes wid de kyar, an' den comes back an' leans up agin de depot an' wants everybody to take him for de biggest man in Detroit. Shoo! It makes me tired."

after. What is a subsidy ? Well, when a company owns a line of steamships and can't make it pay, some Congressman offers an appropriation bill to make up the deficit from the Federal Treasury .- New York Herald, Dem. Happy Hoosters.

rocity in it; second, Brazıl hasn't ac-

cepted it yet. The announcement was

a little "previous." Still, it afforded an

opportunity to push the subsidy scheme

which was perhaps what Mr. Harrison is

Wm. Timmons, postmaster of Idaville, Ind., writes: "Electric Bitters has done more for me than all other medicines combined, for that bad feeling arising from Kidney and Liver trouble." lohn

RARE OLD WINES. Fine Mellowed Madeiras Worth Their - What a travesty upon popular government is it to have a party which New York World. was overwhelmingly repudiated by the

Two wine experts discussing the Manhattan cellar recently and the private stock of Madeira used by Herman Oelrichs in his famous terrapin had this to say about the sherrys and Madeiras of New York. The first said: "I have \$30,000 worth of wines and liquors in my cellar and while I am not boastful of it I believe it to be a fact that few, if any, other experts in this city have now a cellar that represents more solid wealth as well as solid worth. I have Madeiras that cost \$200 a bottle and of which I know the history for 150 years. I have any number of dozen of sherrys which cost me from \$20 to \$30 a quart, and while you and I can tell at a glance and by a sniff of their bouquet the respective ages of the \$200 and \$20 wines, you would

be surprised to know how many men of excellent taste and judment in such things decidedly prefer the \$20 to the \$200 bottles. I do not know why it is, but the older a man gets the drier he likes his wines and the less flavor there seems to be in his favorite brands, and as for this 'aniseseed' taste in Madeira, I don't believe there are two dozen men in New York who really like it or know

why they like it.'

For Over Fifty Years MRS. WINSLOW'S

people last Fall still passing laws by the arbitrary rulings of the Speaker, making fat berths for life for discarded Republicans. and increasing their salaries. England under a monarchy is more Republican, than this .- New York Herold,

- An additional Democratic Congressman was elected in the Second district of Rhode Island on Saturnay without opposition. Five years ago the Republicans would have elected their Congressman practically without a contest; now the Republican candidate declined because the battle was hopeless and the election of a Democrat is allowed dy default. New England wants tariff and tax reform and don't forget it. -Philadelphia Times, Ind. Mr. Blaine's reciprocity with Brazil might be a good thing for two reasons. First, there isn't any recip-
