VOL. XLVIII.--NO. 41.

WILMINGTON, N. C., SATURDAY, MAY 9, 1891.

An enterprising American has got himself into the clutches of the minions of the law in London by kindly offering to show a London jeweler how to melt a British sovereign and turn out three times as much gold as there was in the sovereign. With this secret and this magic crucible the jeweler's fortune was a dead sure thing, for all he would have to do would be to get sovereigns, melt em down, turn out three for one, and become a Crœsus. But instead of appreciating the American's kind offer, and tumbling to it, he made an appointment with the man of the magic crucible at his shop, and then stowed some brutal policemen where they could peep through a crack in the wall and see the whole business. And just about the time the crucible man got his crucible in full blast these brutal policemen rushed in, seized the sovereign multiplier, marched him off to the calaboose,

Chauncey M. Depew says that "the South which has not been invaded by insurgents is the only part of the country which is purely and typically American." It is the typical Americanism of this section which hurts Hoar, Reed & Co,, who would like to root some of it out with force bills, etc. It is a solid fact that Mr. Depew remarks on.

MISSIONARY SERMON.

Dr. Lambuth at Grace M. E. Church Last Night-A Very Interesting Discourse.

A crowded and most attentive audience assembled at Grace M. E. Church last night to hear the address of Dr. Lambuth, a missionary of the M. E. Church South from Japan. Never in the history of Wilmington have our people had the opportunity of hearing such a masterly man handle the subject of Missions in such a wonderful manner. Dr. Lambuth impressed the congregation at his entrance upon the platform as a man of extraordinary ability, and for over one hour and a half he held them with a power that one feels only a few times during a lifetime. It seemed impossible to cover so much ground in such a connected and graphic style in the time taken by the speaker. He linked a geography and history lesson of that most highly interesting people in a manner that protoundly impressed every intelligent hearer. The population of Japan is estimated at about 40,000,000-equal to that of Corea, Brazil, Egypt and Siam. Its area is about one-fourth larger than that of the British Isles, with only one Christian member, to every 22,000 inhabitants. Aborigines of the Island are fast becoming extinct-living now among the mountains of the northern portion and in a state similar to that of our American Indians.

The speaker took the audience in a voyage from Wilmington to San Francisco, across the Pacific; landed at Yokahoma, and then through the isthmus, and across the Yellow Sea to China, in such a delightful manner, one forgot to be sea-sick and quite lost the true idea of the size of our sphere.

The speaker, so conscious of the providence of God in national as well as in individual life, traced a Divine hand in the absorption of the Roman Empire at the time of its holding sway over the world, as the great highway through which roads were opened for the progress of the missionary and the establishment of Christ's Kingdom.

The speaker dwelt at length upon the capacity of the Japanese as compared with the Chinese, showing that no nation upon the globe is more acute, precocious and patriotic. They, as a nation, have realized the fallacy of Buddhism and Confucianism, and are just in the condition either to decay in corruption or be vitalized with Christianity. The Japanese realize that the Anglo-Saxon is the ruler of the world, and are ready to adopt all our modern civilization and improve upon it for the rebuilding of their kingdom. Dr. Lambuth here made a most earnest appeal to the Church of Christ to arise at once out of its lethargy and send the Gospel to this people, above all others ready to receive it.

The masterly fecture was interspersed with incidents highly amusing to Americans; steak houses on many highways inviting the passers-by to come in, and for a small amount partake of the beef that makes the Caucasian the ruler of the world. Another-a most threatening picture of an old lady living in a volcanic district-called upon by a missionary for some dinner. He found the hostess quietly cooking her meal over an active fire, blazing and gurgling in the earth beneath. The Japanese hold about the same relation to China that the British Empire does to Europe, and upon the Japanese Islands mainly depends the evangelization of the Chinese.

Japan is rich in coal beds, has intricate water routes-thus furnishing its own resources for becoming one of the greatest manufacturing centres of the world. The speaker spoke with interest about Japanese life-the houses with their scarcity of furniture; table manners, with chopsticks, and alluded to the custom of leaving their shoes at the door, sitting on their heels, meeting the host on all-fours, who meets him in the same graceful manner.

The subject of education was touched upon. The schools are of the finest grades; kindergarten has been adopted and medical colleges, comparing favorably with European institutions. The postal system is far more complete than in America. It is almost impossible for mail to be lost upon the island. Dr. Lambuth himself received a letter once bearing thirteen tags, thus having gone through the hands of thirteen postmaster, and thirteen chiefs of police.

The speaker dwelt at length upon the patriotism of the Japanese, delighting in their wonderful Empire; but realizing in As the Empire now stands the present generation of young Japanese do not attend worship. They realize keenly that heathenism will not keep pace in this century with strong intellectual growth and they are crying out for the True God. The rulers realize that without the young people worship the Empire will have no constituency—they are discussing the principle of Sunday schools, bishops and archbishops; are willing to accept at least the strong morality of the Scriptures.

At this juncture the speaker made a lasting appeal to Christians to come at water of life.

Manning, A. M. Scales, Jr., A. J. Marshall and Walter Bonitz.

The minutes of the last meeting were

read and approved. Capt. W. R. Kenan made the following nominations: For President, Col. W. L. DeRosset; for Vice President, Mr. E. S. Martin; for Secretary and Treasurer. M. C. S. Noble. The gentlemen were

unanimously elected. The retiring President made an able and appropriate speech and referred to the late Col. Sauders in touching terms; whereupon the followed motion was offered and carried: "That this Association does express its profound regrets at the death of Col. W. L. Saunders, and that a committee be appointed to draft suitable resolutions.'

The members then retired to the dining hall, where an elegant banquet was spread. Prof. Winston, the guest of the evening, delivered a strong and able address, and was heartily applauded. Many of the alumni followed with appropriate speechss.

The occasion was quite a pleasant one and will not soon be forgotten by those
