HANS A. KURE.

A Western man has sent the Chicago Inter-Ocean a piece of tin-plate which he made all by himself just to show that tin-plate could be made in this country. That Western man is an idiot. No one has ever disputed that tin-plate could be made in this country. The only question is, can it be made in this country at a reasonable price, so that the people who buy tin will not have to pay the men who undertake it a bonus of \$16,000,000 a year? That's all. Of course, with imported steel-plate, pig-tin, and Welsh workmen, we can make tin-plate here just as well as anywhere.

Mr. McKinley remarked in a speech recently that if Governor Campbell wanted to find out who paid the tax on Canadian wheat which competed with the wheat grown by American farmers, let him go to Buffalo and ask the Canadian farmer who sends his wheat to American markets. But Governor Campbell was loaded and produced from the official reports from the surveyor of customs for Buffalo, that there were imported at that point last year just three bushels of Canadian wheat and that was imported by a farmer for seed.

THE CHAIRETE PANTES. This is the Name Under Which Wilmington's Big Week Will Expand Into a Glorious Success.

The infant that sprang into existence full-fledged, like the armed squadron from the head of Jove, at the Produce Exchange meeting Tuesday night, received its christening last night by the committee appointed especially for that purpose. The immortal nomenclature is "CHAIRETE-PANTES," whose significance will be readily understood as perfectly pertinent and appropriate. The proper pronunciation is Kirete-pantes.

All the committees met according to appointment at City Hall last night, and each discussed the matters pertaining to its province and made estimates of its projected expenses, which were communicated to the Finance Committee. Everything is moving merrily along, and unless some great unforeseen disaster, like an earthquake, or a broad gauge stroke of lightning prevents, the first week in December 1891 will be written all over with big red letters. It will be a grand epoch and long-to-be-remembered era in the annals of the glories of Wilmington.

Thousands will visit the city to witness the marvellous spectacle and be electrified with delight. Every committee has taken hold of its peculiar work with the grip of a Hercules, the zest of a lover and the determination of a Wellington. Every committee is composed of the best material and each individual is an enthusiast in the cause. These committees will report to the regular meeting of citizens to be held at City Hall next Monday night, the 2nd November.

Now, gentlemen, exercise your ingenuity in designing your floats and vie with each other in friendly rivalry, each to excel the other in splendor.

OPERA HOUSE. The Brothers—Count Primo and Baron Ernest Magri.

These diminutive little gentlemen were born at Bologna, in Italy; their parents were of the ordinary size. There has been of the family, altogether, 13 children—three diminutive and ten tall. The eldest of the three little people was a girl, called Amalia; she died 14 years ago, at the age of 24 years; she was several inches smaller than the two brothers. The brothers, Primo and Ernest Magri, are descendants of a noble family. Count Primo is 36 years of age, 37 inches in height, and weighs 50 pounds. The brother, Baron Ernest Magri, is 38 years of age, 38½ inches in height, and 54 pounds in weight. The two little gentlemen have been inspected by the best medical faculty in Bologna, Torino, Milan, Naples and Paris, and pronounced to be the most intelligent, active, symmetrically-formed men in miniature on the face of the globe.

They will appear at the entertainment given by Mrs. Gen. Tom Thumb and her Company, Friday and Saturday. At the matinee Saturday there will no doubt be the largest crowd of children ever seen in our Opera House.

Violation of Section 20 Revenue Law of 1891. Justice R. H. Bunting had two cases before him yesterday for violation of Section 20 of the Revenue law of North Carolina, 1891. The first case was against a white man, R. E. Peete, charged with "enlarging likenesses of the human face" without taking out license.

His attorney, A. J. Marshall, Esq., pleaded in defence, first, that defendant only solicited orders, and did not do the work; and, secondly, that this part of the act was unconstitutional, as infringing the inter-State commerce law of the United States. Both of these were overruled, and the defendant was bound over to appear before the Criminal Court.

The second case was against Perry C. Murray, another white man, charged with the same offence. Herbert McClammy, Esq., represented the defendant and asked a continuance until 10 o'clock this morning, which was granted. His plea will likely be the same as in the first case.

The Nova Scotia Storm. The storm reported yesterday by the Weather Bureau as off the coast of Nova Scotia Tuesday moved off into the North Atlantic. Northwest gales prevailed along the Atlantic coast during the day, reaching a maximum velocity of 52 miles per hour at Kitty Hawk and 48 at Hatteras, N. C., during Tuesday night. It moderated yesterday.

Weather Forecasts. The following are the forecasts for today: For Virginia, North Carolina and Tennessee, fair till Friday; warmer southerly winds. For South Carolina and Georgia, fair, warmer by Thursday night; northeasterly winds, becoming variable.

Net receipts of cotton at all U. S. ports yesterday, 48,107 bales.

Additional Committees for Festival Week. The following committees for Wilmington's Festival week, in addition to those heretofore announced, were appointed yesterday:

Committee on Amusements—Berry Gleaves, chairman; J. T. Harper, R. N. Sweet, E. W. Moore, R. H. Grant, Edgar Williams and L. Yoop.

Committee on Carnival—R. S. Collins, chairman, C. S. Granger, W. R. Morrison, Wm. Atkinson, L. H. Hanby, J. H. Lewis, J. R. Turrentine, Jr., J. Everett, Jr., and H. P. Munson.

M. Foard, J. S. Mitchell, I. J. Bear, H. Gefken.

The reception committee will be announced in a few days.

Total receipts—Cotton, 1,472 bales; spirits turpentine, 191 casks; rosin, 822 bbls; tar, 822 bbls; crude turpentine, 62 bbls.

The Revival. The series of meetings held with the Advent Baptist church are largely attended by serious congregations and interest is decidedly increasing. Elder John E. King preaches close to sinners and with marked effect. He has been absent from the city for a number of years and his people greet him back to his old pulpit with cordial warmth, affirming that he has lost none of his old-time power and persuasiveness. These meetings will continue until further notice, and all are earnestly invited to attend them.

Winter Travel South. The Atlantic Coast Line railroads are preparing for a heavy winter travel, there is every reason to believe that the travel of this season will exceed that of last year, which was far above the average. The convention of railroad superintendents recently held in New York decided to run sufficient trains to accommodate as heavy a travel as can possibly be expected.

The same programme as that of last year will be carried into effect this season, beginning on November 15th.

Waived Examination. J. Norton, charged with embezzlement, was again brought before Justice R. H. Bunting yesterday. The State was represented by Jno. D. Bellamy, Jr., and the defendant by Marsden Bellamy, Esq. Norton waived examination and in default of bail was committed to await the action of the grand jury in the Criminal Court which convenes on the 16th of November.

United States Court. Next Monday, 1st November, the United States Court for the Eastern District of North Carolina will be held in this city with a remarkably small docket, either on the criminal or civil side. The former contains only six cases and the latter two. The enlargement of the minimum amount requisite for giving the court jurisdiction to \$2,000 about precludes all civil business.

Better Than Ever. Maxton Union. The Wilmington STAR recently closed its 48th semi-annual volume, and it is a better paper to-day than ever before in its history. It is one of the newspapers of the State that has been successfully managed and ably edited ever since it was established, and we hope it will continue to prosper.

Carefully and Ably Managed. Norfolk Virginian. The Wilmington (N. C.) STAR, always carefully and ably managed, has entered upon its 25th year, with Mr. Wm. H. Bernard still in harness. The STAR is in all respects clean, and in its Democracy closely to Jeffersonian standards.

FUNERAL NOTICE. The funeral services of the late BENJAMIN J. JACOBS will take place at Grace M. E. Church, this (Thursday) afternoon, at 3 o'clock. Friends and acquaintances are invited to attend.

A Good Situation IS OFFERED TO A MIDDLE-AGED MAN who has some knowledge of Book-keeping, and is competent to direct workmen. Apply. oct 29

P. O. BOX NO. 125.

COTTON FACTS AND FIGURES. —Spot cotton quiet in New York yesterday at 8½ cents for middling.

—Receipts of cotton here yesterday 1,472 bales; receipts same date last year, 1,581.

—Middling cotton was quoted firm in the Wilmington market yesterday at 7½¢ quotations same date last year 9½¢.

—Futures closed steady in New York; sales 122,800 bales. October 8.10@8.13; November 8.16@8.17; January 8.40@8.41.

—Boston Commercial Bulletin: The enormous receipts of cotton, exceeding as they do those of last year, have caused cotton to decline and have also raised the question, if the expected shortage of the crop as compared with the preceding will be realized. The receipts last week were half a million bales, or thirty per cent. more than the corresponding week last year. There does not however, appear to be anything in the situation to modify previous estimates.

Last year after bringing his cotton to the gin the farmer took a portion of it to market and held back the rest on the plantation partly because the roads, particularly in the Carolinas, Georgia and Alabama, were so bad as to make hauling difficult and partly because he looked for higher prices. This year not only are the roads in good condition to induce transportation but financial necessity compels the farmer to sell his cotton as soon as possible. Thus while even from the beginning of the season last year there was a surplus of cotton left on the plantations, this year there is no such reserve to draw from, and this will be felt in the smaller volume of later receipts. The weather has been very favorable for picking and this swells the present movement.

Again, there will be no top crop this year. Last season fully a million bales were picked after the usual time of ceasing to gather cotton. This year the dry weather, in September caused the plant to ripen and stopped its growth, so that practically all the cotton that will be produced is now open. It is believed that November will see the virtual end of the picking this year, while in the last crop it extended into January. Then also as factors affecting the yield, the acreage is a little less than in 1890 and the start is not so good. Estimates from reliable sources are not much, if any, exceed 7,500,000 bales, though some more sanguine talk of 7,750,000 bales. So that in general the statement that the crop will fall a million bales short of last year's yield, 8,650,000 bales, is practically accepted.

Northern spinners have been buying again quite freely but the present advance has checked purchases. The quality of the crop continues high. Middling is only now beginning to be offered from the Atlantic States; heretofore Texas has supplied about all of this grade that came to market. The great bulk of the receipts are still of grades above middling. Middling upland can be landed at about 8½ cents. This does not look so cheap as the eight cent cotton of last August but it is really so, and the cotton has more intrinsic value than the old upland, and cotton that sold at that price two or three months ago.

Upper grades of cotton are about one cent per pound lower than they were last October. While these prices are not particularly remunerative to the farmer they will average considerably better than last year, owing to the higher grade of the crop. The size of the yield is fully ample to supply all consumptive requirements. The surplus carried over into this year, was 650,000 bales in excess of that of a year ago, while owing to the industrial and agricultural depression in Europe as well as the continued unsettlement in parts of South America, the consumption of cotton will hardly equal that of the year 1890-91. The mills believe cotton cheap enough in the neighborhood of 8½ cents for middling upland, but have no great faith in the necessity of paying more.

Broken Leg and Ankle. James Sadgwar, a colored stevedore, had his leg and ankle broken by a bale of cotton falling on it, as he was loading a vessel at the Champion Compress yesterday morning. He was carried home, his broken limb was set, and he was resting comfortably at last account.

Yesterday's Weather. The records of the Weather Bureau give the following report of the range of temperature, etc., yesterday: At 8 a. m., 40°; 8 p. m., 45°; maximum temperature, 53°; minimum, 37°; average 45. Prevailing wind, north. Total rainfall .00.
