Gen. Palmer, of Illinois, who stumped Ohio for Campbell, says it was the free coinage plank that tripped him up. Too much free coinage on the Democratic side, and too much free silver and other circulating medium on the other side did the work.

The proposition of the committee on mercies in the World's W. C. T. U., in session in Boston, to condemn the wearing of feathers of birds unless procured without pain to the birds, didn't strike very favorably. Feathers were doubtless conspicuous in the vote which relegated it to the resolutions committee.

Gov. Boies lacked only 4,289 of having a majority of the 420,000 votes cast at the last election in Iowa, the largest vote ever cast in the State. Considering the fact that Iowa gave Garfield 87,000 majority, we can get some idea from this how the Democratic party has grown in the Hawkeye State in the meantime.

Ladies' Aid Society of St. Andrew's Church.

The Ladies' Aid Society of St. Andrew's Presbyterian Church, of which Rev. A. D. McClure is pastor, gave a unique, novel and most enjoyable sociable last evening in the school building adjoining the church lot.

The most charming feature of this entertainment was the utter absence of the iciness of formality. They met and meant to be sociable in nature as well as name and right well did they succeed. Strangers were introduced one to another and those who barely knew each others' names cemented this knowledge into sisterly and brotherly

regard. An enjoyable adjunct of the sociable was Olympic coffee, sandwiches and confections. About 200 were present and carried away impressions of perennial pleasure.

These were the graceful waiters who handed the refreshments: Misses Meada Stewart, Kate and Barbara Monroe, Hattie and Lula Love, Kate, Ida and Neal Thompson, Lee Bell and Olive and Mary Bissett.

Shortening the Time Between New York and Savannah.

Traffic Manager C. D. Owens, of the Plant system, says in the Savannah News that the new schedule from Savannah to New York, via the Richmond and Danville, in thirty-one hours, will

not worry the Atlantic Coast Line in the least. The schedule by the Coast Line is a little over thirty hours.

Mr. Owens says that competition is the life of trade, and a little rivalry will not be unwelcome. If the Richmond and Danville's new schedule begins to draw from the Coast Line's travel it will be very easy for the latter line to quicken its schedule and shorten its time by two or three hours, which Mr. Owens seems to think a very desirable change

As the Atlantic Coast Line has a splendid roadbed its entire length, and is of easy grade throughout, it has considerable advantage over the Richmond aud Danville in making speed, as the grades are greater on the latter line, and that part of the route from Augusta to Charlotte is not in equal condition to rosin, 115 bbls. tar. the balance of the route. The Coast Line also has an advantage of twentythree miles in distance, it being 903 miles from Savannah to New York by the Coast Line, and 926 by the Rich-mond and Danville and Central Railroad. Mr. Owen says if the Richmond and Danville really means to compete with

the Coast Line for the Southern travel it will have to make use of the Southbound, which would shorten the distance seventy-five miles, the distance to New York by this route being 851 miles. This would give it an apparent advantage over the Coast Line of fifty-two miles, but Mr. Owens says the Coast Line has a trump card which it has been waiting to play for some time. The connection between Weldon and Florence, which has been progressing slowly, is nearly completed, which will shorten the distance between Florence and Weldon in about the same way as the South-Bound shortened the distance between
