OUTLINES.

Destructive fire yesterday at Rochester, N. Y. —Influenza still raging in England. —Overtures from the King of Italy for a settlement of differences between the State and the Vatican. —Express messengers strike again in force. —Reduction of wages by a Pennsylvania iron company. —Washington news—The trouble with Chili; the whole matter to be referred to Congress; the Government to appeal from a decision of a Boston Judge. —The Behring Sea question before the Cabinet. —A bill introduced in the Senate for the purchase of sites for fortifications. —Another outrage by the Chilians; a boat's crew of the Yorktown stoned by a mob. —Inman elected president of the Richmond & Danville Railroad, and a new board of directors chosen. —Influenza in Germany. —Burning of a Benedictine Abbey. —Green goods sharpeners and green-horns. —Street-car strikers riotous at Indianapolis. —Rioting and lynching in Florida. The Ohio Senatorship. —New York markets: Money easy at 3 1/2 @ 3, closing offered at 8 per cent; cotton quiet; middling uplands 7 1/2 cents; middling Orleans 7 1/2 cents; Southern flour dull and weak; wheat dull and lower: No. 2 red \$1 01 1/2 @ 1 01 1/2 in store and at elevator and \$1 01 1/2 @ 1 02 1/2 afloat; corn weaker and fairly active; No. 3, 50 1/2 @ 51 1/2 cents at elevator and 51 1/2 @ 52 cents afloat; rosin steady and quiet; strained, common to good, \$1 35 @ 1 40; spirits turpentine dull but easy at 38 @ 38 1/2 c.

Professor Koch's son-in-law claims not only to have discovered the bacillus of the grip, but how to get the grip on it. This is more important than catching the little bacillus.

The President is getting ready to "retaliate" on those countries which refuse to make reciprocal trade bargains with us. While he is "retaliating," the American people will be paying the piper.

Senator Kyle, of South Dakota, has prepared a bill for a uniform divorce law. If this bill passes it will knock the bottom out of the divorce business in South Dakota, of which she has a sort of monopoly now.

The Philadelphia Times has placed under obligations for one of its very valuable and comprehensive almanacs for 1892, in which there is much useful statistical and other information compressed within brief space.

The reporters who described the grand and imposing pageantry at the inauguration of Gov. McKinley at Columbus, Ohio, Monday forgot to state whether tin horns and tin tags figured in it. This was an unfortunate omission.

The Cincinnati Enquirer is surprised at the coolness displayed by Senator Sherman in the late tilt with Foraker. Can it be that the Enquirer don't know that Sherman is a proverbial refrigerator and that he never warms up even in the dog days?

Connecticut papers say that the farmers of the State have cided enough this year to supply all the drinkers in the United States. One mill owner has used up 160,000 bushels of apples. With this outlook the stock of "champagne" may not be short after all.

One poor planter who is scuffling along raising sugar down in Louisiana will get only \$55,000 in bounty when Mr. Foster finds the money to pay him, while some of the other fellows, who are better fixed, will get a couple hundred thousand or so. The sugar crop this year was a bountiful one.

That naval officer who said in Washington that he didn't believe the sailors of the Baltimore who figured in that Valparaiso riot were drunk, because sailors never get drunk till midnight, would give force to his opinion by informing us how long a sailor stays drunk who gets drunk at midnight, and what particular sobering process he employs to sober him up before day.

A Western Republican contemporary remarks that it is no dishonor for Foraker to have been beaten by such a man as John Sherman. This may be some consolation for Foraker, who as a matter of fact wouldn't have been dishonored if he had been beaten by a tramp. He dishonored himself long ago. But if Sherman had been beaten by Foraker, wouldn't he have felt like buying some mules to kick him to death?

NEW ADVERTISEMENTS. H. A. BAGG—Schedule B tax. J. G. DARDEN—Lost last night. T. W. WOOD & SONS—Wax beans. CROENBERG—Portrait photographer. LORENZO D'LORENZO—To the public.

PERSONAL PARAGRAPHS. Pertinent Paragraphs Pertaining Principally to People and Pointedly Printed. — Mr. E. Turlington is sick and confined to his room. — Mr. A. G. Hankins is sick and confined to his house. — Dr. D. J. Winston, of Southport, was in the city yesterday. — Mr. Alfred Alderman, who has been quite sick, is able to be out again. — Mr. D. S. Cowan, Jr., of Savannah, spent Sunday in Wilmington with his parents. — Mr. C. H. Conoley, formerly of this city, but now living in New York, was in the city yesterday. — Mr. Wm. Yarborough, of the Treasurer's office of the A. C. L., is sick and confined to his room. — Capt. Jno. R. Latta, Assistant Auditor for the Atlantic Coast Line, was reported much better yesterday. — Many citizens of Wilmington will regret to learn of the death of Rev. Dr. Miller, pastor of the First Presbyterian Church of Charlotte, last Sunday, after an illness of four weeks. — Messrs. G. H. Hall, Ivanhoe; J. T. John, Jr., John Station; J. D. Horn, Wadesboro; J. V. French, Rocky Point; D. J. Watson, Southport, were among the arrivals in the city yesterday. — Mr. J. C. Stanley, of Marlville, Bladen county, who came to Wilmington about ten days ago for treatment for a severe attack of rheumatism, is much better. He is at the residence of Mr. Carpenter, No. 405 North Third street. — Messrs. E. Dunbar, B. Caruth, N. C.; F. E. Wright, Wm. Harris, New York; Judge Brown, Owlsville; J. S. Hartley, Philadelphia; C. C. Moore, Brooklyn, N. Y.; A. S. Kerry, Baltimore, were among the arrivals at the Purcell yesterday. — Messrs. Chas. Small, Jr., L. M. Cone, J. L. Ritch, O. Wilson, J. E. Rennell, I. G. Becker, J. R. Amoney, J. C. Hastie, New York; H. C. Constable, J. Vealke, I. L. Harzberg, Baltimore; R. A. Farley, Philadelphia, were among the arrivals at The Orton yesterday.

OPERA HOUSE. Mlle Rhea's Performance Last Night. Mlle Rhea appeared at the Opera House last evening in the five act historical drama, "La Zarina, or Catharine I., Empress of Russia."

Thos. Brown Galloway. Mr. Thos. B. Galloway, only son of A. J. and L. J. Galloway, and grandson of Capt. T. N. Gautier, died in Goldsboro last Monday, in the 25th year of his age. The Goldsboro Argus, referring to his death says: "Gentle as a woman, amiable as a girl, dutiful and affectionate always, the only son of his parents, the idolized brother of three sisters. May the God of infinite love and all consolation succor and sustain them and give them that comfort which can come only from Him who gives and who takes away."

Cotton Stealing. For some time past it has been suspected that quantities of loose cotton were being stolen from the Champion Cotton Compress. Detective Hunt was put on the case and yesterday several colored men—some of them employed at the Compress—were arrested and held for an investigation. Mingo McRae, Jno. Williams, Jno. Jackson and a man called "Eli," were the parties taken into custody, and it is understood that the evidence against them is almost conclusive as to their guilt.

Not Much of a Fire. The fire last night about seven o'clock was in a small one-story frame house on Kellogg's Alley, Fourth between Brunswick and Bladen streets. The building belongs to H. E. Terry and is occupied by colored people. The fire was caused by a kerosene lamp up-setting. It was quickly put out and the damage was trifling. The Fire Department was called out by an alarm sent in from box No. 16, but its services were not required.

In Distress. The schooner Ella M. Watts arrived at Southport yesterday in distress, having lost her foresail some days ago. The schooner anchored at the quarantine station, and will refit there. She is from a port in the West Indies, bound to New York with a cargo of sugar.

Weather Forecasts. The following are the forecasts for to-day: For Virginia, rain, east winds. For North Carolina and South Carolina, rain, east winds. For Georgia, rain, colder by Wednesday night, east winds.

LOCAL DOTS.

Items of Interest Gathered Here and There and Briefly Noted.

— The Cape Fear freshest is bringing many rats down the river. — A decided cold wave is reported by the Weather Bureau as moving upon us from the Northwest. — The side-wheel steamer Protector, bound South, put in at Southport yesterday for coal and supplies. — The Jarbeau Farce Comedy Company are on the bill boards with big posters for a performance here this week. — The Criminal Court met yesterday at 10 o'clock a. m., and after clearing the docket of a few cost cases, adjourned for the term. — The accumulation of rafts at Market street dock yesterday interfered so little with the firemen in their efforts to reach the fire across the river. — Don't forget "Pilgrim's Progress," illustrated by the Rev. Adam Chambers at Brooklyn Baptist Church to-night at 7.30 o'clock. Tickets can be secured at the door. — Haynes Davis, colored, charged with assault and battery with a deadly weapon on some of Bill Howe's stevedores, was required to give bond in \$200, and failing to furnish bail was sent to jail. — Quon Davis, the colored man accused of setting fire to his house on Seventh street, Saturday morning, was sent to jail yesterday, in default of \$200 bail for his appearance at the Criminal Court to answer to the charge. — The fire-wharves of the city should not only be kept clear of obstructions which may impede the firemen, but should be put in good order. The fire-wharf at the foot of Chesnut street for months past has been in bad condition. — Prof. VanLaer has secured the services of a competent and reliable piano tuner in the person of Mr. Chester Lake, of New York, who has over twenty years' experience in a business in which very few can ever become proficient. — A Washington dispatch says Representative Grady, of North Carolina, has introduced a bill to pay to the Cape Fear Steamboat Company \$50,000 for the use of its steamers by the Government just after the close of the war. — The Seaboard Air Line Railroad gives notice, that having adopted a new form of application for ministers' permits, all clergymen desiring the same are requested to call at the ticket office, and fill up the blank for transmission to the traffic manager's office. Applications already sent in will have to be renewed. — Martha Wescott, a colored woman, jumped overboard or fell in the river at the foot of Mulberry street Monday night, and was pulled out by a colored man, who called a police officer. The policeman came up and found that the woman was drunk and wet as a drowned rat. Mayor Ricaud fined her \$10 yesterday for disorderly conduct.

LIST OF LETTERS. Remaining in the Wilmington Post-office January 13, 1892. GENTLEMEN'S LIST. B—C W Bishop, Robt Bones, Wm Brown. C—Charles Chancey, William Chadman. E—Thomas Ellaid. G—J C Gutherin. H—H C Howard, O V Hassner, P. E. Helen, W D Howard, W H Hamilton, W O Hart. J—Arthur Jenkins, A R Jackson, Robert Johnson. K—L H Kelley, T B King. L—Robert Lee, care G Anderson, Robert Lucas, V J Lohy, L. S. L. T. C. McKinney, Charles Morris, H Melton, Harry McKee, Isiah Moseley, James Murkland, Lewis McKoy. N—James Nixon. P—A C Pierce, R F Pickett, Noah Powell, W W Prince. S—Aleck Sauls, Albert Stanhope, Geo Stopes, John Strudels, John J Sharp, T. Shom Smith, Smith Smith. T—T C Thompson. W—Louis Worrick, E P Williams, Marion Whitted care Capt T S Whitted, Mitchell Wooten, R L Warlick. Letters returned from Dead Letter office—Chas Barchen, Wm Faison.

SHIP LETTERS. Albert Fretroustr, — Ciana, care Capt Breuse. B—Melvina Bradley, Mrs M Beedy, Mrs Sio Butler, T H Brown. C—A M Craig, Mary Cole, Mrs Merit Carvie. D—Rebecca Davis. T—Henrietta Turner (col). G—Mrs Emily Greenwood, Lizzie Gause. H—Miss Georganna Henry, Lizzie Hobbs. J—Henrietta Johnson, Mary Johnson, Sarah James. N—Mrs Carolina Neal, care Aria Bryant; Lizzie Norwood, (col). T—Mrs Leahy Thomson. W—Wnoch Winfield, Mrs Jesse Wise, Mattie Wissinger, Mary Wood, Sarah Wales, (2).

LADIES' LIST. B—Melvina Bradley, Mrs M Beedy, Mrs Sio Butler, T H Brown. C—A M Craig, Mary Cole, Mrs Merit Carvie. D—Rebecca Davis. T—Henrietta Turner (col). G—Mrs Emily Greenwood, Lizzie Gause. H—Miss Georganna Henry, Lizzie Hobbs. J—Henrietta Johnson, Mary Johnson, Sarah James. N—Mrs Carolina Neal, care Aria Bryant; Lizzie Norwood, (col). T—Mrs Leahy Thomson. W—Wnoch Winfield, Mrs Jesse Wise, Mattie Wissinger, Mary Wood, Sarah Wales, (2).

Receipts of Naval Stores and Cotton Yesterday. Carolina Central R. R.—162 bales cotton, 40 casks spirits turpentine, 219 bbls. rosin; 85 bbls. tar. Wilmington, Columbia & Augusta R. R.—69 bales cotton, 20 casks spirits turpentine, 314 bbls. rosin, 5 bbls. tar. Wilmington & Weldon R. R.—16 bales cotton, 159 bbls. rosin, 10 bbls. tar. C. F. & Y. V. R. R.—49 bales cotton, 14 casks spirits turpentine, 846 bbls. rosin, 65 bbls. tar. Steamer Lisbon—3 bales cotton, 98 casks spirits turpentine, 50 bbls. rosin, 20 bbls. tar. Steamer D. Murchison—3 casks spirits turpentine, 218 bbls. rosin, 10 bbls. tar. Steamer Maggie—5 bales cotton. Steamer Defta—7 bbls. tar. Total receipts—Cotton, 297 bales; spirits turpentine, 175 casks; rosin, 1,301 bbls.; tar, 153 bbls.

COTTON FACTS AND FIGURES. Receipts of cotton yesterday, 297 bales; receipts same date last year, 408 bales. Spot cotton quiet in New York at 7 1/2 c for middling. Wilmington quotations: Market dull and nominal at 6 1/2 c for middling. Futures closed steady in New York with sales of 140,000 bales. January opened at 6.99 and closed 7.03; February, 7.05 and closed 7.10; March, 7.17 and closed 7.21; April, 7.28 and closed 7.33. — Boston Commer. Bulletin: The market yesterday was more steady but a recovery was slight. The receipts held up to last year and the general average estimate is 8,250,000, which, considering the spinning quality, will nearly equal the crop of last year, but some parties look for a crop from 8,500,000 bales up. The cotton mills are pretty well stocked up but they buy in a moderate way. Liverpool is clogged. The most encouraging feature is that cotton is so low that it has begun to attract the attention of outside capitalists and speculators. If they buy to hold for a raise it will likely benefit the market.

How to Treat the Grip. A Celebrated Paris Physician's Ideas. The New York Herald publishes an interview with Albert Robin, the celebrated Paris physician, giving his ideas as to the best treatment of the grip. He is reported as saying: "A curious thing is noted, and that is that in large cities it is less intense than in the smaller towns and villages. It attacks all temperaments, but old and feeble persons are the most severe sufferers. Children suffer the malady better than adults. If influenza is especially dangerous on account of the complications that arise from it, it follows that its true treatment is to avoid the latter. These complications are pneumonia, pulmonary congestion, weakness of the nervous system and acridulous poisoning of the blood. To avoid such complications the patient should be kept rigorously in bed so long as there is the slightest fever or the slightest cough. Warm aromatic potions should be given, and the patient should be kept in bed until the toxic products that encumber the blood. "I have determined, by the way, that the sweat of a person suffering from influenza is twelve times more tonic than that of a person in a normal condition. Weak doses of sulphate of quinine from twenty-five to fifty centigrams should be given three times a day. The reason is that large doses make the patient sleep profoundly and destroy the fever, but have no action whatever upon the poisons circulating in the blood and do not diminish their destructibility. Small doses, on the contrary, given frequently, render more active exudation and elimination of these poisons, which are the source of the danger. Antipyrene, which is often recommended as a specific for influenza, should be mistrusted. This medicine depresses the nervous system, closes the kidneys, which are the principal means of eliminating animal poisons, and consequently it is more harmful than useful. To sulphate of quinine should be added alcohol in moderate doses in the form of port wine or cognac. "It is necessary above all when fever has disappeared and the patient wishes to go out and resume his usual occupations to insist upon a convalescence indoors for from four to eight days, according to the seriousness of the attack. Such is the general treatment. If influenza becomes localized and affects any particular organ a local treatment should accompany this general treatment. This is, of course, the affair of the physician consulted, and cannot be treated under the head of general indications."

This is, of course, the affair of the physician consulted, and cannot be treated under the head of general indications."

How to Treat the Grip. A Celebrated Paris Physician's Ideas. The New York Herald publishes an interview with Albert Robin, the celebrated Paris physician, giving his ideas as to the best treatment of the grip. He is reported as saying: "A curious thing is noted, and that is that in large cities it is less intense than in the smaller towns and villages. It attacks all temperaments, but old and feeble persons are the most severe sufferers. Children suffer the malady better than adults. If influenza is especially dangerous on account of the complications that arise from it, it follows that its true treatment is to avoid the latter. These complications are pneumonia, pulmonary congestion, weakness of the nervous system and acridulous poisoning of the blood. To avoid such complications the patient should be kept rigorously in bed so long as there is the slightest fever or the slightest cough. Warm aromatic potions should be given, and the patient should be kept in bed until the toxic products that encumber the blood. "I have determined, by the way, that the sweat of a person suffering from influenza is twelve times more tonic than that of a person in a normal condition. Weak doses of sulphate of quinine from twenty-five to fifty centigrams should be given three times a day. The reason is that large doses make the patient sleep profoundly and destroy the fever, but have no action whatever upon the poisons circulating in the blood and do not diminish their destructibility. Small doses, on the contrary, given frequently, render more active exudation and elimination of these poisons, which are the source of the danger. Antipyrene, which is often recommended as a specific for influenza, should be mistrusted. This medicine depresses the nervous system, closes the kidneys, which are the principal means of eliminating animal poisons, and consequently it is more harmful than useful. To sulphate of quinine should be added alcohol in moderate doses in the form of port wine or cognac. "It is necessary above all when fever has disappeared and the patient wishes to go out and resume his usual occupations to insist upon a convalescence indoors for from four to eight days, according to the seriousness of the attack. Such is the general treatment. If influenza becomes localized and affects any particular organ a local treatment should accompany this general treatment. This is, of course, the affair of the physician consulted, and cannot be treated under the head of general indications."
