The editor of the Charleston News and Courier wrote something about "wide tires" and was amazed to find that the intelligent compositor had stuck it up "war times," from which one might infer that the editor does not also run a school of penmanship.

The bounty on maple sugar don't seem to be panning out much richness for the sap-tappers. While there have been 2,798 claims allowed for bounty on beet, cane and sorghum sugar, and the sum paid \$7.270,675, there have been only 18 claims for maple sugar bounty offered, on which the claimants have received all told so far \$420. Consequently ex-Senator Edmunds' constituents are not vociferating enthusitically over the sugar bounty.

#### HOCKY MOUNT.

Rocky Mount is the coming great in dustrial city of North Carolina, if not of the South, therefore there can be no better investment in the world than in Rocky Mount grit. We would advise every one wishing to make money to attend the great auction sale of lots, which will be held in Rocky Mount on the 15th day of June. There is no question that person purchasing lots on that day will be able to a great deal more than double their money in the next few months, as last night for Rocky Mount to put up that portion of the town lying between Thomas street and Tar river, now owned by the Rocky Mount Improvement and Manufacturing Company will soon be the most valuable portion of Rocky Mount. Georgia and South Carolina planters say the new rice crop is doing very well at present and is fairly advanced in growth, with good prospects. The acreage planted is about the same as last year, if anything less. The June planting will be very light. Unless there is an unusually good crop the yield this year is expected to fall behind last year's.

Friday Half-Holiday, The movement in behalf of the Friday half-holidays among the up-town merchants meets with almost universal approval. Reports of Correspondents of the Nor Carolina Bureau of Agriculture.

The reports of correspondents of the Weekly Weather Crop Bulletin issued by the North Carolina Experiment Station and State Weather Service, for the period from May 29th to June 6th, fnclusive, show that the weather conditions have been encouraging. The May drought was broken Sunday, and during the past week alternate showers and sunshine have prevailed with most beneficial effect on all vegetation. Only a few places report excessive rains. The temperature has been about normal, more sunshine however is needed. The transplanting of tobacco has been nearly completed. Small grains are in excellent condition, and especially wheat. Oats was ripe enough to cut in places, but too wet to do so. Cotton and corn have made excellent progress. Crops are generally clean and farmers are better up with their work than is usual at this time of the year.

The North Carolina Department of Agriculture have just prepared the crop returns from every county in the State, and up to June 1st the condition or prospects indicate the growing crops as follows. Wheat 93 1-3; Oats 88 1-2; Rye 89 1-4; Rice 84 1-3; Cotton 81 1-4; Corn 93 1-8; Tobacco 94; Sweet Potatoes 85 1-4; Irish Potatoes 94 1-3; Clover 91 1-2; increased percentage of hogs raised 69; fruit 60; labor 79.

The report is made upon the vitality, condition and prospects compared with the growth of average years, 100 being the basis.

The report shows that while the grain crops remain the same as last month cotton has improved several points.
