election returns next Wednesday he will discover where the "majority" is and what the people think of his infamous treachery.

Ex Senator Ingalls, of Kansas, is a sufferer from gastritis. The Senate had to suffer, too, when he was in it. This accounts for the acidity of some of his speeches.

A Burks county, Pa., farmer has sent Grover Cleveland a whopping big ear of corn, which he says isn't a circumstance comparatively to the majority that the Democrats will have next Tuesday.

There should be such a Democratic majority piled up in North Carolina next Tuesday as to forever discourage tricksters and conspirators from forming corrupt alliances to defeat the will of the people.

Some of the Republican organs declare that Marion Butler has made a brilliant campaign. He also afforded considerable amusement to Bob Glenn and the Democrats who were present when the skinning was progressing.

Ward McAllister says he is satisfied that a man can live more comfortably on \$20,000 a year in Philadelphia than he can on \$40,000 in New York. This ought to give Philadelphia a boost among poor men who have to scuffle along on \$20,000 a year.

Even the Republican managers up in Blaine's and Tom Reed's State are becoming alarmed, and circulars have gone out from headquarters urging every Republican to vote and that not a vote can be spared. This will have no effect on James G. Blaine, for he didn't take interest enough in the result to register.

Betting in New York.

The New York correspondent of the Baltimore Sun of yesterday gives the following in regard to betting at the Stock Exchange:

"At the Stock Exchange to-day a most extraordinary and unprecedented event was noted. All day long some seventy-odd brokers kept congregated around the loan corner, doing nothing but betting and offering bets on the election. There was hardly any attention given to other business. It is estimated that over \$100,000 was wagered. The odds were 10 to 9 on Cleveland for the general result and 2 to 1 that he would carry New York. In the northern districts the frost was so severe that many bolls already developed have become soft and cannot possibly open with the most favorable weather. The best results have been re- alized along a belt extending from the Savannah river to the southwestern cor- ner of the State. Along this belt the crop is estimated at 71 per cent. of a full yield. The poorest result is in the south- eastern counties, where 55 per cent. is the estimate. Nine-tenths of the crop has been picked and the most of this is already marketed.
