cents for three months.

All announcements of Fairs, Festivals, Balls, Hops, Picnics, Society Meetings, Political Meetings, &c., will be charged regular advertising rates.

Notices under head of "City Items" 20 cents per line opfirst insertion, and 15 cents per line for each subse-Advertisements discontinued before the time con-soled for has expired charged transient rates for time

ctually published

No advertisements inserted in Local Columns at any price.
A announcements and recommendations of candidates for office, whether in the shape of communications or otherwise, will be charged as advertisements.
Payments for transient advertisements must be made in advance. Known parties, or strangers with proper reference, may pay mouthly or quarterly, according to contract.

Remittances must be made by Check, Draft, Postal Remittances must be made in Resistance Latter.

Remittances must be made by Check, Draft, Postal Money Order, Express or in Registered Letter. Only such remittances will be at the risk of the publisher. Advertisements inserted once a week in Daily will be charged \$100 per square for each insertion. Every other day, three-fourths of daily rate. Twice a week,

charged \$1.00 per square for each insertion. Every other day, three-fourths of daily rate. Twice a week, two-thirds of daily rate.

Communications, unless they contain important news or discuss briefly and properly subjects of real interest, are not wanted; and, if acceptable in every other way, they will invariably be rejected if the real name of the author s withheld.

Notices of Marriage or Death, Tributes of Respect Resolutions of Thanks, &c., are charged for as ordinary advertisements, but only half rates when paid for trictly in advance. At this rate 50 cents will pay for a simple announcement of Marriage or Death.

An extra charge will be made for double-column or triple-column advertisements.

Contract advertisers will not be allowed to exceed their space or advertise anything foreign to their regular business without extra charge at transient rates.

Advertisements kept under the head of "New Advertisements" will be charged fifty per cent, extra.

Advertisements to follow reading matter, or to occupy any special place, will be charged extra according to the position desired.

Advertisers should always specify the issue or issues they desire to advertise in. Where no issue is named the advertisement will be inserted in the Daily. Where a advertiser contracts for the paper to be sent to him an advertiser contracts for the paper to be sent to him during the time his advertisement is in the proprietor will only be resuonsible for the mailing of the paper to his address.

Amusement, Auction and Official advertisementss be dollar per square for each insertion.

The Morning Star.

By WILLIAM H. BERNARD. WILMINGTON, N. C.

SUNDAY MORNING, Aug. 19, 1894 REDUCTION ON ARTICLES IN COMMON USE.

In two articles preceding this we have written to show that the Senate tariff bill is not only an improvement on the McKinley bill, but an improvement on the Mills' bill. As further proof of the material gain to the people, we herewith 'present a number of the articles which are in common use, with the tariff under the McKinley bill, the reduction by the Senate bill and the per centage of reduction:

			Senate M

Here are seventy-eight articles which are in common use, in the price of which every one is directly or indirectly interested, showing that the object of the framers and amenders of this bill was not simply to reduce the duties in the McKinley bill, but to reduce them in such a way as to do the greatest good to the greatest number while at the same time giving all the protection that any reasonable manufacturer or producer

In making the enumeration we skipped scores of articles which are largely used but used only to a limited extent compared with the above mentioned, because they are not among the necessaries, as some of them are used for certain art pur-

and others by the reduction of the duty on the materials of which they are constructed; will cheapen railroads by the reduction of the duties on rails and other material used in the construction and equipment of the roads. We can form some idea of what this reduction means when we remember that there are 176,000 miles of railway in this country which must be kept in good condition, and on which more or less repairs are being constantly made. To these 176,-000 miles several thousands of miles

are annually added, which will get the full benefit of the reduction. As the South is becoming the great railroad building section of the country, this is a matter of much importance to us, for it will do much to facilitate railroad building in this section. Take it all in all, the Senate | Crisp had. bill is a long stride in tariff reduction in the interests of the whole people. It has been estimated that it will save the people in the aggregate over \$1,000,000,000 a year in the cost of the things they buy, and this is probably rather under than an over

MINOR MENTION.

It has been predicted by the advo-

cates of tariff reform that the passage of the tariff bill would give great impetus to industries and lead speedily to a business revival, while the Republicans who fought all attempts to change the McKinley bill from the beginning predicted ail sorts of disasters as the inevitable result of any reduction of the McKinley protective rates. They singled out tin-plate on which the McKinley bill had given an increased protection of about double what it had before as one of their special objects of solicitude and predicted the utter ruin of that industry if the protective duties were reduced. They were reduced about 50 per cent. among the first echoes we have heard from the passage of the Wilson bill are that a great impetus has been given to the tin-plate industry. That's the answer to the dire Republican predictions that comes from. Pittsburg where prepations are being made to start several plants which have been awaiting action upon the tariff. The commercial and trade papers which have interviewed the representatives of various industries report a spirit of revival and confidence among various industries which look very hopefully to the future now that the question so long agitated has been settled and they know where they stand and what they have to count on. There is no indication anywhere of apprehended trouble, or a lack of hope in future prospects.

It has been suggested that to help

the Republicans in the next campaign, Republican sugar sellers may raise the price of sugar and claim that this is one of the results of putting sugar on the dutiable list, and also that Republican operators of protected industries will cut the wages of their employes and give as a reason that with the reduced duties they cannot afford to pay as high wages as they could under the McKinley tariff. Possibly there may be some of this done, but not to any considerable extent. The business interests of the country do not desire a continued agitation of the tariff question, and they would rather have the new tariff which will soon become the law, whether they like it or not, than take the chances of a restoration of the McKinley bill after several years agitation, for it would take several years to restore it. They would suffer more in the meantime by the agitation and the resultant disturbance in business than they could possibly gain, even if they were sure of a restoration of the McKinley rates of duty. Business is conservative. and capital is timid. They suffer by agitation and the unrest and uncertainty that result from agitation, and instead of desiring a re-opening of this question by the Congress which would do anything to prevent it. If the | each page. of the manufacturers of this country to-day whether the Wilson bill should be carried in the affirmative by an overwhelming majority. They got more than they expected, and don't want any more "tariff tinkering."

of the country for this year be correct-400,000,000 bushels-and the damage to the corn crop of the West be anything like it is reported, there must be an advance not only in the price of corn but of wheat. With a 400,000,000 bushel crop of wheat there will be little if any surplus for shipment abroad. The grain crops of the South have been on the whole good, while the prospects are for a phenomenal corn crop, hence the crop poses, but the reduction of which is | conditions in the West are not a matof material benefit to those using ter of as much importance to us as they would be if our farmers were as The Senate bill will cheapen the dependent upon the West for their necessaries of life which were taxed food supplies as they had been in the by the McKinley bill, will cheapen past. They have cause to congratuvarious kinds of clothing used by | late themselves that they have given the people, poor and well-to-do; will as much attention as they have this cheapen the construction of the year to raising their own grain and houses in which they live by the meat, which puts them in a more inreduction of duties on so many of dependent position and enables the materials of which they are con- them to stand it if the prices of cot-

home supplies on the farm. If our cotton-growers had to buy their food supplies with the money they are likely to get from cotton, the prospects would be pretty blue for some of them.

THE PERSON NAMED IN COLUMN

The Chicago Inter-Ocean notes it as a remarkable incident when just before the passage of the Tariff bill by the House of Representatives Tom Reed vielded part of his time to Bourke Cockran to reply to some remarks of Speaker Crisp. Nothing remarkable about that. No day was ever so warm or so cold that Tom Reed wouldn't give some of his time to any Democrat who wanted to take a whack at another Democrat, especially one who had sat down on Tom Reed as often and as hard as Speaker

California fruit growers are trying the experiment of shipping fruit across the Continent to New York and thence to London. They tried it before, but the railroad freights were so high that it didn't pay. But they have secured such a reduction of railroad rates now that they believe it will. Fruit must be abundant when San Francisco peddlers sell sixteen fine Bartlett pears for a nickel.

One of our contemporaries regrets that Col. Watterson, of the Louisville Courier-Journal, is losing his temper in discussing the tariff bill. Henri is nothing if he is not hot. But he'll cool down some after a while, and keep right along as usual with the Democratic band wagon.

CURRENT COMMENT.

-- Will there be a rise in the price of the farmers' sugar just before election to call his attention with emphasis to the fact that the Democrats have imposed a tax upon that article? Will the Republican sugar-selling grocer take the place of the Democratic itinerant dealer in tinware, who in the last national campaign made the McKinley act and the Republicans odious in the farmers' eyes?-Washington Star.

- When Congress adjourns Senator Hill will, no doubt, ask himself the question: "What have I done as a Senator?" and a still small voice will inform him that he has made a conspicuous and monumental monkey of himself. His attempt to play the part of a political Iago without the people knowing it did not succeed, and his motto: "I am a Democrat," will, no doubt, soon be hung up in a New York pawn shop.—New Orleans States.

SUNDAY SELECTONS.

- We always live prospectively, never retrospectively, and there is no abiding moment.- Jacobi.

- The Pharisee's righteousness consisted in not doing evil; Christ superadded that we must do good,-St. Clement.

BUTTONS OF ALL SORTS.

The Popular Ones Are Made of Dresder

China, Cut Jet and Pearl. The button maker's craft is susceptible of quite as surprising a development as any other branch of industry. Buttons, originally a strictly utilitarian article, now often form the sole trimming of gowns or coats and are amply sufficient for that purpose. We have long been able to have our cloth and silk buttons made to order of the same material as the costume for which they are intended. More recently we have been supplied with composition buttons, which are an astonishing imitation of the silk and serge covered article and wear in-

definitely, which the latter do not.

This being a season of buttons, a great variety is shown in more expensive styles; as carved mother of pearl and cut jet, while with the fashion of Dresden china umbrella and parasol handles have come Dresden buttons of various sizes, decorated in the same manner and used on rich costumes, especially on court coats. Where buttons are adopted as a garniture, if they are in-

DOUBLE SKIRTED COSTUME. tended to give the effect of fastening anything together, it is much the best way to have the corresponding buttonholes made and really button the thing instead of merely securing it by the thread with which the buttons are sewed on. It is more trouble, but well made buttonholes are a decoration in themselves, and there is something anomalous in the position of a button

without a buttonhole Although the double skirt or overskirt is steadily advancing in popularity, the plain skirt refuses to retire from public favor, and it is to be hoped that it will continue to hold its place, for it is lighter and more convenient in every respect than the draped skirt. The latter appears to advantage in muslin, gauze and thin evening materials, but in woolen goods for street wear it is undeniably weighty. It is being used for all sorts of gowns, however, and probably by next winter it will be firmly established as the ruling mode, and we shall see heavy cloths and even velvets made up in that

A sketch is given of a double skirted toilet in silver gray vignone. The plain un-derskirt is of checked silk to match, while the second skirt is draped in box plaits over the hips, confined by a strap, which is buttoned in place. The vest, tight sleeves and revers are also of checked silk, while the upper half of the sleeve, consists of a balloon puff of vignone surmounted by a wide epaulet of the same material buton the ton of the JUDIC CHOLLET.

TRIM TOQUES AND CAPOTES.

a mile wide and extended about the Nearly All Spring Headwear Has Jet, Metal and Lace Ornamentation. The display of millinery this spring is as gay and varied as any one could desire. The manufacture of artificial flowers has risen from a handicraft almost to an art, iving in the country I suppose you have and blossoms that are really wonderful imitations of nature crowd the counters of the shops and adorn the fanciful hats that this season has produced. Violets and red roses are the reigning favorites, repeating the purple and carmine tints so fashionable in fabrics. We are evidently entering on a period of frank coloring, for the half tints and subdued shades which have been considered "the thing" heretofore are giving place to brilliant reds, clear blues, vivid greens and unmistakable yellows. Some very beautiful mixed straws are een, mainly in combinations of green,

pink, black and ecru, and plain neapolitan braids are also shown almost as flexible

and soft as muslin. Many of the wide hats while in others it is bent and twisted in every conceivable fashion. Spangles always appear in the trimining and are used immoderately. A black neapolitan flat trimmed with black had the bent brim covered with black spangles of all shapes and sizes, while in lace hats the pattern is followed out on the net by them. The lace is gathered very little, of course.

Besides the large hats, a number of toques and capotes are shown. The trimming is often allowed to fall on the hair at the back. Sometimes it is ribbon bow, sometimes two or three jet ornaments with pendants, sometimes only a bunch of violets. There is scarcely a hat or bonnet to be seen into the construction of which lace of some sort does not enter, while everything glitters with metallic or fet decoration. A stringless capote is shown with a crown of spangled guipure. A scant ruffle of lace takes the place of a brim and is arranged to droop upon the bair behind. A black

rosette is placed in the middle and on each

side, and in front are two black ostrich

JUDIC CHOLLET. Women Voters After the Offices Now. A deputation of women waited today upon the Hon. R. J. Seddon, the premier, at Gisborne, to urge upon him the right of women to be eligible as members of parliament. The premier, in reply, said that the request was the logical outcome of the recent extension of the parliamentary suffrage to women, but observed that their political education was necessary first.-Wellington (N. B.) Letter. -

Bucklen's Arnica Salve. The Best Salve in the world for Cuts, Bruises, Sores. Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns and all Skin Eruptions, and positively cures Piles, or no pay required. A Ounrier Century Test. For a quarter of a century Dr. King's New Discovery has been tested, and the | that he had a Severe Kidney trouble for ions who have received benefit from powers in all diseases of Throat, Chest and Lungs. A remedy that has stood the but without any good result. About a test so long and that has given universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles Free at R. R. Bellamy's Drug Store. Large size 50c. and \$1.00.

A SUMMER ROOM.

An Arrangement In Green and White-How to Make a Paper Lamp Shade. Among the details of a successfully furished summer room The Decorator and Furnisher mentions a silk hammock swung across one corner; a new cover and valance for the mantel board, made from cotton crape in green and silver, the same material being used to frill into the small screen which should conceal the fireplace fresh shades for the lamps, candles and electric globes, quickly and economically executed, of white and green crape tissue paper, the green over the white. A feathery fern in a Benares jar will harmonize with the surroundings, and a finishing touch may be added by a huge bunch of blush roses in a bowl of green art glass on the wicker table.

To make paper lamp shades composed of three distinct colors one above another the crimped papers should be obtained in three well assorted tints. They are to be brought made expressly for lamp shades, in one circular length. They are best arranged on the wire placed over the lamp. It minimizes the trouble of stretching upward to place the lamp on a milking stool. Slip the paper over, draw it together at the top, leaving a good heading, and then tie it loose-ly with string round the wire, by which means you can regulate the fullness care fully till it is equal all round, and then tighten the string. In the same way place the two other papers separately over. The lowest paper is then bent under about two inches above the edge, the next is formed into a couple of waves, and the upper one drawn up in waves above, so that it makes about five vandykes all round. The paper remains as you press it, and the result is a pretty, most graceful shade.

Screen In Semirustic Style. Screens are, of course, always in sea son, so many are the convenient and dec orative purposes they are made to serve nowadays. But as the time has comwhen fires may be dispensed with and the question arises how to hide unsightly isually important.

empty grates, they are now more than Two and three fold screens are perhaps more generally useful than the single pan-

SINGLE PANEL SCREEN.

The latter is, however, less expensive buy and easier to make, and oftentime serves a purpose quite as well. A very pretty example which may be suggestive o the amateur cabinet maker is in simple semirustic style. It is draped with salmo colored silk, with an insertion of scrollwork embroidered on satin ornamenting

Rose Paste. A delicate flavor of rose leaves is a great addition to certain cakes and confections. and a rose paste made at home is pur than many of the extracts sold for the pur pose, according to Harper's Bazar, which | ber 57 1/6; December 60 1/6; May 65 1/6. gives the following recipe: It is made by chopping the leaves of fragrant roses into a smooth mass with white sugar and placing them in an oven long enough to heat thoroughly, but not entirely melt the sugar. Use a cupful of the leaves to 3 of sugar. Keep in airtight cans and allow to stand six months before opening. This must be used carefully, only a small quantity being necessary to flavor a large cake. A novelty at a recent dinner was a Roman punch flavored in this way with the Turkish preserved rose leaves, which may be purchased at any store dealing in oriental goods. Into an ordinary Roman punch, which is simply a lemon sherbet flavored to taste with rum, the rose leaves were stirred a few at a time until a delicate flaver was obtained, and the mixture was then frozen to a soft and snowy consistency and served in small glasses. Half a can of the Turkish leaves would flavor a sufficient quantity for eight persons.

Angel Food.

Angel food, if correctly prepared, is one of the best loaf cakes made. The recipe herewith given is warranted by The Bakers' Helper to be the best: Beat very stiff and dry 10 whites of eggs (one-half pint), sift together twice, a half

ound of powdered sugar, 5 onnees of pas try flour, an even teaspoonful of cream tar tar. Add all this to the eggs, stirring very gently with wooden spatula. Sprinkle half teaspoonful of vanilla powder to it and fill in the regular angel food tins. Soak these molds in cold water always before using. Fill while wet-just rinse them out-and when baked turn molds upside down. Never grease or line the molds with paper. Just have them wet, and the cakes will fall out when cold, as white as snow, all the crust sticking to the mold. Frost very thin and give icing a very delicate flavor, or just a little lemon juice or maraschino.

A Substantial Pudding.

Dry crusts of bread, odd pieces of cake, will make excellent puddings it soaked in cold milk for a sufficient time, beaten up with suet, a spoonful or two of sago, some sugar, salt and any fruit you may be able to spare; also a spoonful of molasses. Make the mixture stiff and boil it in a mold for two hours at least; then you will have a pudding which none need be ashamed of eating. The sage is an excellent substitute for egg.

Household Hints.

Paint stains that are dry and old may be removed from cotton or woolen goods with chloroform. It is a good plan to first cover the spot with olive oil or butter. Hold a fruit stained article over a bowl and pour boiling water through the cloth. To beat eggs quickly add a pinch of salt salt cools, and cold eggs froth rapidly. Bub egg stains on silver with salt on a samp cloth.

Clean steel knives with raw potato dipsed in fine brickdust. Use wood ashes on discolored tableware.

The St. John's Bread Tree. Notwithstanding the belief of Professor Riley that St. John was just as likely to have fed on the real locust as on the succu-

ent seed vessels of Ceratonia siliqua, this particular tree will always be known as St. John's bread tree, says Mechan's Monthly. It has been very successfully introduced into southern California and southern Florida and is now getting in good demand. It is known as the carob tree, which is the Arab name for the seed pods, on account of their hornlike shape. They like a rather dry climate Two very fine trees are said to be growing on Mount Olivet, just above the garden of Gethsemane. It was a great surprise to Americans to see among the collections of agricultural articles from the south of Europe, during the American centennial, how much this tree was appreciated, as nearly every collection had samples of varying varieties in their lists. In the south of Europe it is generally the chief article for feeding horses, cattle and swine as well as the general article of food among the poorer natives.

It May Do as Much for You. many years, with severe pains in his back year ago he began use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure of all Kidney and Liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At R. R.
