Some of the New York Republican papers are talking about making the election a Waterloo for the Democrats. More likely a waterhaul for the Republicans.

If China had caught on to some of Li Hung's progressive ideas years ago she would not now be without modern arms, and munitions of war, nor be apparently at the mercy of a foe whom she can outnumber ten to one.

The New Orleans Picayune has been counting the noses of the sugar planters who have gone over to the Republican party and finds that they constitute about 54 per cent. of the planters of the State. It thinks they may possibly elect three Congressmen, but other Democratic papers and men posted on the situation think they will plant the whole crowd on the 6th of November, and lay them and their Republican associates out together.

Great Democratic Rally-An Address That Created Much Enthusiasm-Dinner and Oyster Roast-Music by Hanover Cornet Band.

A train of cars filled with enthusiastic friends of the Democratic candidate for Congress from this district pulled out from the Princess street depot of the Seacoast railroad promptly at 11.30 a. m. yesterday, and at 12,80 the large gathering was called to order by Capt. E. W. Manning. Chairman of the Township Committee, who in a few well chosen remarks introduced Mr. J. A. Locknart as the next member of Congress from this

Congressional district. Mr. Lockhart, in acknowledging the complimentary introduction, paid wellmerited recognition to the Democracy of the Cape Fear section, and in a speech of an hour and a half delivered one of the ablest and most lucid arguments in behalf of Democratic principles; one that could but convince the most skeptical and awake to renewed exertion the hardest worker of the party.

At the conclusion of Mr. Lockhart's address, Maj. C. W. McClammy, Pender's favorite son, was called upon and received with unstinted applause. To say that the Major's speech, delivered in that happy catchy style, which is his alone, was enthusiastically received, would be but to convey a faint impres-

Walter L. Main's train of thirty-eight cars arrived at 6 o'clock this morning amid the irrepressible cries of the High School boys. All equipments and especially the horses elicited a continual murmur of admiration. The street parade was great. The show was by far the best and largest that has ever been seen in Wellsville. Among the special eatures were the Riding Lion, Gaza, the Female Hercules, the Live Rooster Orchestra, and the American born Baby Monkey, which is to be seen in the mammoth menagerie of the "Walter L. Heavy Transaction

One of the biggest deals on record in this section was made yesterday, by which Commodore Sam. Bear became "seized and possessed" of the entire cargo of phosphate rock of the wrecked schooner Baisley, now supposed to be somewhere on Frying Pan shoals. The cargo was sold at auction to the

highest bidder by Messrs. Cronly & Morris. There was a large attendance of capitalists, all eager to purchase, and the bidding was spirited. But Commodore Bear beat the crowd in purse and staying qualities, and after a hot contest the entire cargo was "knocked down" to the Commodore for one dollar and seventyfive cents.

FITZ AND CORBETT.

Difference in the Weight and Measure urement of the Two Champions.

Fitzsimmons said the other day that he would fight Corbett at 160 pounds, says a New York telegram, but the chances are that 170 pounds would be STAR. nearer the mark, and with Corbett at 188, he would have eighteen pounds to his credit, not thirty, as even Corbett appears to have thought. The following measurements are interesting at this

Age.... 28 Weight 188 Height 6 ft. 11/2 in. 6 ft. 11/4 i Reach 29% 39 Chest 38 Calf.14 Biceps.... .141/2 Forearm ... 1114

The fight will probably come off Jacksonville. It will attract thousands of men and may break all records on the size of the gate receipts. Fitzsimmons is so anxious to make the fight a certainty that he is willing to make anything like liberal concessions in every respect. As great battles have resulted in the last few years, the betting on this contest should not be overwhelmingly in tavor of Corbett.

REVIVAL OF BUSINESS.

Even the Republican Protectionist Journals Now Admit That There Is a Marked Improvement in Trade.

Some of the Protectionist journals are wiser than some others, says the Philadelphia Record. The New York Tribune, the New York Commercial Advertiser and the Public Ledger of this city are too old birds to longer stultify themselves by shouting calamity when the whole country is beginning to resound with reawakened business activity. Read what the esteemed Ledger has to say on the subject :

"The improvement of business condi-

tions can be no longer successfully disputed; it is so general and so manifest to render ridiculous those unscrupulous partisan organs which, closing their eyes to the truth, continue to ignore it as if it had no real existence. The leading financial and trade journals of the country, those the special mission of which it is to present for the information of their readers the most accurate statements with regard to the state of finance, manufactures and commerce, give the most gratifying reports of reviving activity. The principal daily newspapers of the great cities and the centres of trade, among others the New York Tribune, which has been persistently employed latterly in efforts to roll back the advancing tide of mercantile vigor by representations of continued depression, have recently devoted entire pages to the reports of the representa-tives of the chief business interests of the country, which clearly show that the improvement during the last month has been certain and material.

Dispatches and correspondence from all parts of the country tell of the revival of industrial enterprise; of works which have been shut down resuming operations: of others, which have been operated on reduced time or with a lesser number of operatives running upon full time and with an increased force of employes, and of capital providing new plants in all those industries which are as props and pillars of mercantile success. The great transportation companies, which probably suffered as much as, or more than, any of the representatives of important business interests during the late prolonged period of depression, are daily showing the assured increase of the volume of business. The statements of the banks in all the large financial centres are equally satisfactory as indisputable testimony to the return of prosperity."

Severaly Hurt. The cook on the British steamship Terra had his left arm severely cut yesterday afternoon by an explosion of a glass jar filled with yeast which he was carrying under his arm. The cut was a seyere one, about two inches long, severing the muscles of the fore-arm and cutting two arteries, which caused a hemorrhage. Capt. B. Peterson telephoned at once for a carriage, and took him to the Marine Hospital; but no doctor being there, the injured man was taken to Dr. Bulluck's office, where his wounds were attended

to. He bled profusely. Last night he was resting easy. What's the Matter With the Auditor? The Florence Times of the 11th says : "Col. H. Walters, Vice President; Maj. J. R. Kenly, General Manager; Col. T. M. Emerson, Traffic Manager, and W. A. Riach, General Auditor of the

Coast Line, passed through Florence Wednesday evening in a private car, on their way to Sumter. [Why not, by transposition, make it General W. A. Riach, Auditor, &c.?-

ABOUT COTTON.

No Speculative Buying-A Steady Fall in Prices that Only a Big Freeze Will Stop. Hubbard, Price & Co.'s Weekly Coton Letter says:

There is little difference in the conditions surrounding the cotton market, from those which apparently surround every other product of the soil in every country of the world. Namely, that nature, this year, seems to have devoted herselt to producing a bountiful crop of every article needed by man, with the exception of corn and flax, and the result is that merchants of the oldest standing in trade are aghast at the prices which are being accepted by the producers for their products. Naturally this condition of affairs has

driven speculation entirely away from all

markets, and the trade looks with envi-

ous eyes upon the spinner's position,

who is enabled to dispose of his varns

at such a price that all his operations

are being conducted at a profit, as the

raw material is daily falling below the

point which his most sanguine expectations led him to believe would be touched before the end of the crop year. thy dying words shall dwell with us and While cotton slowly declines and is now at the lowest point touched, it is curious that no reports of damage to the crop, either by storm or frost, cause any triumph, nor a Southern defeat, but see anxiety as they would in other years, but are passed over as simple incidents of climatic influences, which are if anyof Him who doeth all things well." thing for the benefit of the crop rather than injury, and the idea has now become almost a positive conviction that this crop will exceed 9,000,000 bales. The question which is presented to the trade is what will become of the surplus above the requirements of the spinners, which is variously estimated from 8,250, 000 to 8,500,000 bales. Even Mr. Ellison has finally been converted and sees no hope for the market if the anticipated crop of 9,000,000 is realized, and expects that the addition of 750,000 bales of cotton to the visible supply would have the effect of dragging the market to a very low basis. Certainly there seems at the moment nothing to interfere with this conviction, and it is found in the mind

cided accident should occur to the cotton UNDER an order of the United States Circuit Court for the Eastern District of Nor h Carolina, of date August 7th, 1894. I will offer for sale at public anction, at the Court House door, in the city of Wil mington, N. C., at 10 o'clock a. m., on Tuesday, the 23d day of October, 1894, the following described notes and over drafts due the First National Bank of Wilmington, N. C. r.

W. S. O'B ROBINSON, Receiver. At the present time there is a little hesitancy as to pursuing the decline further, because of the knowledge that this is the critical moment, when a frost may make or mar the cotton crop. Up to the present time the cold waves have each of them been passing to a lower point in the South, and this last one, which reached its lowest on the morning of Tuesday and Wednesday of this week, made the following records as given by the United States Signal Ser-

of every man connected with the busi-

ness, that there can be no prospect of

any advance in cotton unless some de-

We furnish these records without comment, as it is evident that at the present time no reports of damage to the cotton crop by frost will be credited unless the temperature should fall to freezing point and extend very far throughout the South. Therefore the market remains simply one between the consumer and the producer, with the producer striving to sell three times as much cotton to the consumer as is necessary for his immediate requirements, and without thought of any reports of curtailment of the current estimate of the yield, or of any speculative buying, the price naturally falls in the efforts of the producer to dispose of his
