One More Cotton Mill Certain. Readers of the STAR know how long and how persistently it has worked to arouse an interest here in the important subject of cotton factories. And they

Mr. Richard Manafi ld at the Opera House

Tuesday Night, Mr. Richard Mansfield, the most famous actor on the English-speaking stage, appears at the Opera House Tuesday evening. This is one of the great events of the present season, The list of great actors is not an extensive one and it is safe to say that Mr. Mansfield heads the list. For years it has been conced d that he is the foremost actor on the English-speaking stage. The many great productions he has given in this country have made his name renowned in every country where the drama is appreciated. The great prosperity he has achieved is due to his remarkable skill as a stage director and his keen sense of handling complex and diverse characters. Mansfield is neither a tragedian or a comedian; he is simply a wonderful artist who can move and

Statement From Atlanta as to the "Dixie Hummer"-Its Time Beaten by the "Pythian Flyer" Over the Plant

and Coast Line System. A few days ago, says the News and Courier, the Chicago Herald ran a train down to Atlanta for the purpose of distributing a special edition which the paper got out. The time made by the train was very fast, and with its usual modesty A lanta said that it was the fastest time ever made in the South. In fact an Atlanta enthusiast sent the following dispatch to the Assiciated Press, and t was printed in most of the Southern

"The Dixie hummer, which left Chicago at 2 o'clock this morning, made the fastest long distance run in Southern railroad history, covering the 788 miles in 16 hours, 15 minutes, actual running, or 16 hours, 57 minutes, elapsed time. The average running time was 45 miles an hour. Many a piece of track was covered at the rate of 70 miles an hour. The train was scheduled to reach Atlanta at 5 80 p. m., but it lost no time going over the mountains between Evansville and Chattanooga. The train came over the Chicago and Eastern Illinois, the Evarsville and Terre Haute, the Nashville, Chattanooga and St. Louis and the Western and Atlantic."

Of course, this is an excellent show ing, but as far as its being the fastest time ever made in the South, "that's all poppycock." Everybody knows that the fastest long distance run ever made in the South, if not the fastest made in the world, was that made by the Pythian flyer over the Plant and Atlantic Coast Line systems on the 29th of August last. The Pythian train ran 781 miles in fifteen hours and forty-nine minutes, including stops, or excluding stops in fourteen hours and thirty-four minutes. Its actual running speed for the entire distance was 58 6 miles per hour. In other words, it ran forty-eight miles farther toan the "Dixie Hummer," and covered the distance in over an hour and a half less time. The performance of the train attracted the attention of the whole country, and the railroads and newspaper men from Boston to New Orleans unanimously,acknowledged that it had beaten the world's record for

long-distance racing.

No one questions the fact that the "Dixie Hummer" made a splendid run.

Considering the country through which it had to go it was a truly remarkable performance, but it is mere bosh to claim that it broke the record. The Atlantic Coast Line and Plant system men naturally feel that an injustice has bee done them by the dispatch. They put themselves to great trouble and expens in making their great run, and they don't want to see themselves unjustly robbed of their laurels.
