A memorial has recently been presented to the British Government signed by leading bankers, merchants and manufacturers doing business in the East, urging upon it the remonetizing of silver and the adoption of bimetallism instead of the single gold standard. The presenters of this memorial contend that instead of the commercial supremacy of England having been a result of the establishment of the gold standard in 1816 it was established before that and that business was for years afterwards carried on under the methods and influence of the bimetallism which had previonsly prevailed and as that influence ceased English supremacy began to decline. They then go on to call attention to the fact that the attempt to do business on a strictly gold basis resulted in derangements, unsettling of values, disturbance in prices, depression in industries. enforced idleness and bankruptcy, and they argue that in view of the immensity of British commerce, the indebtedness of her colonies, and the multitudinous interests involved no nation is as much interested in the remonetization of silver as Great Britain. The memorial concludes "In the presence of the evils which cannot be denied we hope that the Government will not suffer a hypothecal danger to special interests or a prophetic but unsupported assertion of harm to industry and commerce to deter them from a hearty co-operation with the other powers in such measures as seem desirable for securing a fixed par of exchange for the two metals and a more stable standard of value than we now possess: and we must respectfully ask you to adhere to the resolution of the House of Commons passed on February

The Boston Herald is a gold standard paper, but it would favor bimetallism upon conditions the realization of which it does not believe "attainable," but it differs from other

The following is an account of the strange ceremony practiced at the Malagasy national festival every year, as related by nearly all the travelers that have visited the land of the Hovas. The "Fandroana," or royal bath, was first instituted by King Ratambo and is held annually, by roya proclamation, from the 22d of November to the 10th of January. During this time no business is allowed to proceed. The people of the kingdom meet the queen in the silver palace on the first day of the festiva.,

These high strung nerv ous dispositions of ours must have a safety valve of some sort. In one case it is ac complished by a man chewing the end of his pencil. In another, as many of my friends do, during a conversation a pencil must always be in the hand, and the man is either scribbling or drawing all the time he is talking. I know one man who never undertakes to carry on a discussion without a pencil in his hand. He tells me that he could not think if he was deprived of holding one. The motion referred to is as follows: "The House regards with increasing apprehension the constant fluctuation and growing divergence of the values of gold and silver, and heartily concurs in the recent expressions of opinion of the governments of France and Germany in regard to the serious evils arising therefrom.

This memorial comes from leading bankers, merchants and manufacturers of the greatest commercial and manufacturing country in the world and the country which adheres the most stubbornly to gold monometallism, for the simple reason that the law-making branch of that Government is controlled by the moneypower, which owns men who sit in Parliament, especially in the higher House, as the same power owns men who sit in the Congress of
