The reorganization committee of the Cape Fear & Yadkin Yalley Railway Company has agreed upon a plan for the reorganization of the property, and has submitted the same for the approval of the bondholders. The plan provides as follows-the property to be sold under foreclosure, and a new company organized with the following capitalization: Prior lien four and a half per cent, bonds \$ 500,000 General mortgage three and four per cent. 3,400,000

The general mortgage bonds are payable in gold, run one hundred years, and bear interest at the rate of three per cent, for first four years and four per

The reorganization committee has taken the property as they find it, and have built up a plan of reorganization on the present earning capacity of the road and upon a basis of equity and fairness to all in interest. The claim of the A bondholders, that the lien on the division covered by their mortgage possesses a greater value than that securing the bonds of the B and C divisions, is ecognized by an allotment of twentyfive per cent. in General Mortgage bonds in excess of the amount given the B and bondholders, and the B and C bondholders are given an additional amount of first preferred stock, representing the principal of bonds surrendered. It would appear to us that the A bondholders should find it decidedly to their advantage to accept the proffered terms. Although they have a first lien upon the most desirable portion of the property, t is very doubtful whether under any circumstances the courts would permit a dismemberment of the road by a separate sale of the several divisions. All prece dents are against such a ruling, and especially noticeable, in this connection is the case of the old Orange & Alexandria Railroad (Virginia Midland) where the same state of affairs existed. THE SOUTHERN RAILWAY RELAYING

Lesses at the Reidsville Races-Gov. Cotton Bales Lighter Than Usual This Season-Fire Near the Yarborough

RALEIGH, N. C., Nov. 11. The Southern Railway begins active preparations to reach their deep water termicus at Norfolk by replacing the track of the North Carolina Railroad between Greensboro and Goldsboro with heavier rails. The work is now full, under way. At present the laying of the new rails will not extend beyond Nelson, a point 20 miles beyond Raleigh. The reason for this is that the Southern has supply of 60-pound rails which they desire to utilize and they are placing it to the best advantage. Next year still heavier rails will be placed on the road between Greensboro and Selma. The terminal work at Pinners Point and Portsmouth will soon be completed. The line of vessels which go to West Point will likely change their route on the first of January making Norfolk the

objective point. It is interesting to note that Mr. Bradley, the recently elected Republican Governor of Kentucky, who is being urged so persistently and so early in the game for the Vice Presidential nomination, is an old North Carolina favorite in Republican circles. In 1888 Loge Harris nominated Mr. Bradley as a Southern Republican for the Vice Presidency. He was quite a young man then, and is still so, Mr. Harris says. Mr. Bradley received the solid vote of the North Carolina delegation for the Vice Presidency.

extensively for Southern mills has received several telegrams of late making inquiries about the light weight of the bales of cotton. It is a generally known fact that bales do weigh less this year than last. The firm after inquiring about, learned this to be the case. One ginner remarked that he had not been able to nake a heavy bale of cotton this year. This fact is attributed to the drought Cotton was so light and dry, that it was impossible to get the usual amount baled. The firm in this city after inquiry estimates a deficiency of ten ounds to the bale. At a crop estimate of 7,200,000, there would be a deficiency of 162,000 or something over two per cent, of the crop. Here is a bull argument which has not been brought into

True Bermuda Easter Lily. (LILIUM HARRISH,)

THIS MAMMOTH WHITE TRUMPET LILY, with flowers four to five inches long, is the best of all Lilies for winter forcing and flowering, because its grand, trumpet-shaped flowers, which give forth a delicious perfume, are wonderfully beautiful and expressive. As a pot plant it is tall and stately; the spike is thickly studded with bloom, which are lovely as cut flowers, and keep a long time in water.

If you want them to bloom Easter plant them now. Mammoth bulbs 25c.

First as an Entirety. Messrs, Hambleton & Co., bankers, of Baltimore, Md., in a circular letter of Nov. 9th, 1895, give the following information relative to the proposed reorganization of the Cape Fear & Yad-

cently in telegraphic dispatches to the STAR, viz:

First preferred stock Second preferred stock Common stock

General mortgage bonds
To holders of Class A bonds
To holders of Class B bonds,
seventy-five per cent. of \$734,000
To holders of Class C bonds,
seventy-five per cent. of \$840,000

Second preferred stock,
To be given to holders of present
consolidated mortgage bonds,
two and one-half shares for
each \$1,000 bond and overdue

ommon stock, two shares,

sions and the divisional bondholders made an ineffectual effort to have the property sold by divisions. The court refused to permit such dismemberment upon the grounds that the greatest good to the greatest number demanded the preservation of the unity of the property, and that to destroy its unity would be to destroy its value and would be unwise and inequitable. While the trust deed of the Cape Fear & Yadkin Valley Company provides that the A, B and C bonds shall possess a separate lien upon their respective divisions, it also provides

separate sale of the several divisions alowable. At least so it appears to us, and ceptable bid. every, the persons or bodies corporate who shall at any time be the holders of said bonds, without preference as to

The present fixed charges upon the property are \$183,240. The fixed charges under the proposed plan will be in 1900, after the General Mortgage bonds draw four per cent., only \$137,240, or \$46,000 less than at present. The gross earnings of the Company for the fiscal year ending September 80, 1895, were \$495,800, operating expenses \$400,000 and net earnings \$95,200. During the receivership repairs and betterments have been charged to operating expenses. When

the new company is fairly started and

the new money provided is expended on

the property and equipment, the road can be worked at a much lower per-

centage and the earning capacity of the property will be largely increased. No re-

ceiver's certificates have been issued and

there is no car trust. We consider the

bondholders will find it to their interest
