- Kinston Free Prees : Monday afternoon Mr Frank H. White, aged 21, near Ft. Barnwell, was killed by lightning. He was driving a wagon load of tobacco that had been cured at Mr. Henry Davis' to his father's home. A little brother, aged 10, and a nephew, aged 15 years, were also in the wagon. The two boys were securely wrapped up in cloths to protect them from the heavy rain. The shock was so great that the horses as well as the persons in the wagon were severely shocked and the horses came to a stankstill. When the boys recovered they found Mr. White dead, lying on the ground at the horses' heels, with his neck broken. Shocked to insensibility he had fallen from the wagon and broken his neck. - Durham Sun: Near Taylorsville a few days ago, while threshing wheat, a little boy who was cutting the binds made a mislick and cut the feeder across the back of the hand, making an ugly wound. what his politics, is given every priv-

After all the card stocking, shuffling and dealing the fusion game between the Populist bosses and the Republican bosses has been played and Boss Butler seems to have taken most of the tricks. Russell has suc ceeded so far as to stay where the Republican convention put him, but it was by knuckling and surrendering to Boss Butler, who put up the job on his party and forced it to accept the terms offered. It is a queer mix all around, and one that it seems to us will be very hard for the rank and file of either the Populist party or the rank and file of the Republican party to swallow. The Populists have to swallow for the second place on the ticket one of the old "firetried" Republicans, who has a prospective lien on the U.S. Senatorship, to succeed Pritchard, who now seems to be a back number with the men who helped elect him.

This is doubtless part of the bargain with Butler, in consideration of which Mr. Dockery consented to play second fiddle to Guthrie. Dockery wouldn't give a pinch of sawdust for the Lieutenant Governorship if it wasn't, in his estimation, the stepping stone to the Senatorship, in the event the combination carry the State.

But where is Dr. Mott going to be in the meantime, while Butler and Dockery are playing their game? He nurses Senatorial ambition, too, has nursed it for years, and that accounts tor his desertion of the Republican party, his espousal of the free silver cause and the lively interest he took in fusion between the Democrats and the silver men who are not Democrats After all his planning and hohnobbing with Butler he finds himself outwitted and the slippery Butler gone into the embraces of the cool and clever Oliver, who didn't say much but had the longest pole. Mr. Dockery's friends gave it out that he is a free silver man and that he would not snpport McKinley on a gold platform. How much truth there is in this we do not know, but probably about as much as there was in the free silver professions of Jeter Pritchard, who held his "principles in abeyance" until he grabbed the Senatorial plum, when he resumed

his principles and his Republicanism, gold plated, reasserted itself. But here comes another mix. Mr. Dockery as second fiddler to Mr. Guthrie, will play on the silver string, and the sure enough Republicans who vote the regulation, put-up job appeared in the Philadelphia North

Meerschaum is extracted in the same way as coal. Pits from 25 feet to 125 feet deep are dug, and as soon as the vein is struck horizontal galleries, sometimes of considerable length, are made, but more than two galleries are seldom to be found in one pit. The stone as extracted is called "ham tash" (rough block) and is soft enough to be easily cut with a knife. It is white, with a yellowish tint, and is covered with a red clayey soil of about one inch thick. In this state the blocks are purchased by dealers on the spot, not by weight nor by measurement, but according to approximate quantity, either per load of three sacks or per cartload,

Indian Territory Town Sites.

Ex-Senator Henry L. Dawes, the chairman of the Indian commission, says that the town site question in the Indian Territory has become one of great im portance. There are now about 800,000 white people in the Indian Territory. They have built up towns, but are mere tenants at sufferance, without a particle of title to the lands on which they built. The Indian courts are closed against them, as are the Indian schools to their children, 30,000 of whom have no other orportunity for schooling, excepting hose whose parents are able to hire private teachers. They have no voice in the governments of these five nations, nor a police officer to protect them or their

property against violence. It will be the object of the commi sion, first, to obtain such a solution of the town site question that those who have built up these towns and invested large sums in costly buildings and expensive stores and trading places may have some title to the ground upon which the structures stand and some voice in their government, and, secondly, to see that the vast and valuable territory shall be held either according to the original title, for all Indians equally, or shall be allotted in severalty to them, so that each may hold his own share in fee.

This is a rather Indicator	We have no fault to find with the statement that the free silver movement is a delusion, but our Philadelphia con- temporary magnifies the importance of this incident. Instead of being easily reinted, the arguments of the silver men are so well constructed that hard, heavy and continuous battering is required to upset them. Instead of being ill-in- formed the silver advocates are, as a rule, thoroughly well posted as the re- sult of study. Even the farmers and wage-earners, men unaccustomed to the public advocacy and defence of political theories, have been studying the ques- tion for years. Some of them are as small as a walnut, while others attain the size of a cubic foot. Those which combine regularity of surface and size are the best. The manipulation required before they are ready for exportation is long and costly. The clayey soil attach- ed is removed and the meerschaum dried. In summer exposure for five or six days to the sun's rays suffices, but in winter a room heated to the required temperature is required, and the dry- ing process takes eight or ten days.
