Referring to the Royal Arcanum Council, it will be of interest to note that there are now 190,000 members in America. Reports from the various lodges in this State show the order to be in quite a flourishing condition. The next session of the Grand Council will be in Salisbury in April, 1900.

A Plan Suggested. An enthusiastic veteran suggested to

representative of the STAR yesterday that an economical and at the same time an enjoyable trip might be arranged, with permission from the proper local and Federal authorities, for the Confederate veterans of the city, who desire to attend the re-union at Charleston in May. His plan is to secure from the government, with deference to the wishes of Commander Morton and the Division of Naval Reseves, of course, their splendid cruiser, the Hornet, and make the trip by water spending a day or two in Charleston and returning by the same means. He estimates that nearly five hundred persons could be accommdoated as passengers and that while in port at Charleston a number of those who desired could secure lodging on the boat.

Come this week and visit the C. W Polvogt Co. They will continue their Bargain Week's sale. Terms TRUCK SHIPMENTS

Began in Dead Earnest Yesterday From Wilmington and Points on the W. & W. R. R.

The largest Shipments of strawberries and early vegetables by far, that have been made from Wilmington and points on the Wilmington and Weldon railroad, were handled by the Southern Express and the Californa Fruit Transportation Co. yesterday.

The schedule of extra trains on the W. & W. road, a reference to which was made in yesterday's STAR, was put into operation and handled good shipments at the outset.

From Wilmington there were shipped by express about thirty crates of berries and possibly a hundred and fifty baskets and barrels of lettuce. This was in addition to the heavy freight shipments. Prominent among the shippers from Wilmington were Messrs, C. H. Heide and C. H. Alexander, who have well cultivated farms near the city.

Mr. J. A. Montgomery, of Burgaw, who came down on the evening train, said that about a hundred and fifty crates of berries were shipped from that point to Philadelphia, Boston and New York. He brought with him two quarts of the finest berries seen here this season. Sales were made for Burgaw farmers in New York yesterday, he said, at from thirty to thirty-five cents per quart.

Large shipments of berries were also reported yesterday from Rocky Point, Mount Olive, and as far north as Warsaw.

North Carolina berries were quoted in Boston yesterday at from 17 to 30 cents per quart; in Philadelphia from 20 to 25 cents per quart. North Carolina lettuce was sold in Philadelphia yesterday at from \$2 to \$4 per barrel; n New York at \$3 to \$5 per barrel; in Baltimore at \$4 to \$4.50 per barrel.

There is general complaint in the Northern markets that a very large proportion of the North Carolina berries are shipped too green. This gives the Charleston and Florida berries an advantage, which our shippers should | were adopted:

Berries were sold on the local market yesterday as low as fifteen cents per quart.

SQUARE BALES AND ROUND BALES. Messrs. Sprunt Willing to Put Their Claim

For the Square Bale to the Test.

To the Editor of The News and Courier-Our attention has been drawn to-day, for the first time, to Mr. Searles's letter in your paper, dated New York, April 15. The statement made by us, to which he refers, was written to one of our correspondents, or agents, and was not intended for publication. We do not desire a newspaper controversy as to the compale, and the standard 24x54 square, or rectangular bale. Since we have been quoted publicly, however, we wish you to state that our information came from a cotton merchant of the highest character in Liverpool, Mr. John Milligan, No 7 Rumford street, that the cylindrical bale had been sold over the counter in Liverpool at less price than

the standard square bale, 24x54. We may add that we have since received information from several Continental correspondents to the same effect with reference to Bremen sales. We know nothing of the terms under which these sales were executed; we simply made the statement as it came

to us from responsible people.

As to our claim that we can put more weight of the compressed standard square bale, 24x54, into a ship to the net ton register than it is possible to put in round bales, we are willing to test it in our next steamer for Liverpool by measured space and to afford the contestants every facility for fair Yours respectfully, ALEXANDER SPRUNT & SON.
