PUBLISHER'S ANNOUNCEMENT.

PUBLISHER'S ARMOUNCEMENT.
THE NORNING STAR, the oldest daily newspaper in North Carolina, is published daily except Monday, \$2.00 year.
Star Destination of the second start of the second

Advertisements discontinued before the time contracted for has expired, charged transient rates for time actually published. No advertisements inserted in Local Columns

at any price. All announcements and recommendations of candidates for office, whether in the shape of communications or otherwise, will be charged

as advertisements. Payments for transient advertisements must Payments for transient advertisements must be made in advance. Known parties, or strangers with proper reference, may pay monthly or quarteriy, according to contract. Remittances must be made by Check, Draft, Postal Money Order, Express or in Registered Letter. Only such remittances will be at the fisk of the publisher Communications, unless they contain import-ant news or discuss briefly and properly sub-jects of real interest, are not wanted; and, if ac-coeptable in every other way, they will invari-ably be rejected if the real name of the author is withheid.

is withheid. Notices of Marriage or Death. Tributes of Re-spect, Resolutions of Thanks, &c., are charged for as ordinary advertisements, but only half rates when paid for strictly in advance. At this rate 50 cents will pay for a simple announce-ment of Marriage or Death. Advertisements inserted once a week in Daily will be charged \$1.00 per square for each inser-tion. Every other day, three-fourths of daily rate. Twice a week, two-thirds of daily rate. Contract advertisers will not be allowed to

Contract advertisers will not be allowed t exceed their space or advertise anything foreign

o their regular business without extra charge Advertisements kept under the head of "New Advertisements" will be charged fifty per cent.

Advertisements to follow reading matter, or

to occupy any special place, will be charged extra according to the position desired.

The Mooning Star. BY WILLIAM H. BERNARD. WILMINGTON. N. C.

SUNDAY MORNING, JULY 2, 1899

THE ISTRMIAN CANAL.

If the question of Government aid to an Isthmian Canal were settled definitely one way or the other it would be but a short time before a canal would be an accomplished fact. There has been so much talk about it and so much said about the possibilities of trade in the Eastern hemisphere, that not only public attention but the attention of capitalists has become more drawn to that enterprise than ever. There is little doubt that this will be one of the schemes which will figure conspicuously in the next Congress and possibly be settled one way or another, as to whether it will or will not have the support and financial backing of this Government. The commission which was sent to investigate the Nigaragua route and report as to its feasibility, and the probable cost has reported that the proposed route is feasible and that the work "can be done for about \$130,-000,000. This was along the line surveyed; utilizing the San Juan river and the lake, but it has been said from time to time that there are other and more practicable. routes where the obstacles to be overcome would be much fewer, and where the work of keeping the canal in repair would be much lighter, while the cost of construction would be far below any estimates yet made for either the Nicaragua or the Panama canal. We remember reading some time ago, while this scheme was under discussion in Congress, a letter from an American, who claimed that he knew and had been over a route and could mark it out, where a canal could be constructed, utilizing water courses most of the way, at a cost far below the lowest estimate made for the Nicaragua canal, and he advised the Government to go slow and do some more investigating before it assumed responsibility for the Nicaragua scheme. Who he was, whether he was honest and in earnest or only playing a ruse to put obstacles in the way of the Nicaragua canal we do not know, but his letter attracted little attention and he seems to have subsided. Now it is alleged that some old survey has been discovered which presents a sea level route, which was substantially what that letter-writer claimed he could show, and on this route it is now proposed to operate, a company having been organized for that purpose, the facts in reference to which were thus briefly stated in a Trenton, N. J., dispatch a few days 820:

and it was reported would construct canal by some route, Government aid or no Government aid. Perhaps they have, as stated in this dispatch, struck a more practicable

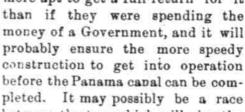

September 4th, 1899, the objects of and comparatively cheap route. which are set forth in the following, If so this simplifies the matter and adopted by the Chamber of Commakes probable the speedier accommerce: plishment of the work, for it is exceedingly doubtful if Congress

are those pertaining to her industrial could be induced to give it the suprowth and development, and no port asked for when this scheme igher obligations exist to day, or obli was last before it. As far as the gations fraught with greater blessings people are concerned they are in of her citizens, than the speedy and favor of it, but the Pacific railways wise solution of those problems. Possessing resources unequaled by are opposed to it, as it would deany other section or nation on the

prive them of considerable revenue, and they will, as they have already done, use all their influence against giving Government aid, and the influence of corporations which command as much money as they do amounts to,

great deal. If it can be built without Govern-

ment assistance all the better for that will make it a purely business enterprise and will ensure its operation on business principles, and it will doubtless also ensure greater economy in construction for men who spend their own money are more apt to get a full return for it

between the two which will give the Americans a chance to show their mettle and energy. If they have discovered, as alleged, a sea level

route they will have a decided adment, that the same may become what antage over the Frenchmen who its importance to the South demands of all classes within her borders. have a very rough route to work and mountains of rock to remove, a stupendous undertaking from the by every State in the South. Such beginning, and the worst to go

through yet. Possibly this Trenton dispatch may be but the revival of some of much valuable information, but the those speculative schemes which contact with thoughtful business have been heretofore reported, in men is productive of good results. which some sharpers have secured and in addition to this they draw atconcessions which they hope to distention to the South, and put more pose of to others later and make a people to studying and thinking good thing out of. The small capiabout it as a field for enterprise and talization of this company looks the investment of capital. Everybody has not the time nor that way, but there may be something in it. Whether there is or the ability to formulate plans of JESUS AND THE MOSS.

LOUNDING GOWN OF TURKISH COTTON CLOTH FROM HARPER'S BAZAR

THE original robe was of beige Turkish towelling. The front is made to hang loosely from the figure, and is shaped to the waist by a loose girdle of twisted silk tasselled at the ends. The wide revers of the upper body are cut in one piece with the fronts that join the deep collar at the shoulder seams, and are finished with an inch and on balf ruffle of white wash ribbon. A similar ruffle continues down the front of the hem. The sleeves have not a particle of superfluous fullness at the armhole or over the upper arm; but a flare occurs just below the elbow that yields a freedom to the lower arm and allows for a deep turned back facing of silk. A plain princesse back, with centre and side back seams, fits the garment to the form, and a Watteau pleat oins the neck-band and spreads into part of the skirt fullness below. The pat tern published by HARPER'S BAZAR where the design originally appeared, al-lows for a six inch train. The garment should be finished at the lower edge by deep facing or hem. The chemisette and collar pattern are not included with that of the robe

Of Turkish towelling, or any fabric of the same width, viz, 27 inches, this arment will require 9 yards to make as illustrated; also one bolt of wash ribbon and 1 yard of wash silk for sleeve facings.

Chamber of Commerce, that a meeting It bloometh now in every clime, of those deemed most able to effect the foregoing purposes be, and is hereby called to meet in the city of Huntsville, Alabama, on Monday. Septem ber 4th, 1889, and continue in session until the business before it shall be completed; and be it further Resolved, That the Governors of

"Articles of incorporation for the American Isthmus Ship Canal Company were filed here to day. "Through these articles the first an-

nouncement was made of the new combination which, it is said, includes many men of large wealth, headed by former Mayor William R. Grace, of New York, and expects to carry to completion the Isthmian canal scheme. Although the nominal capital is \$30, 000, the articles of incorporation give the right to increase it to \$250,000,000 "It is estimated that between \$150,

000,000 and \$200,000,000 will be needed to carry out the project, the greater part of which will be expended in buying off the holders of concessions. The incorporators, who are said to be merely figureheads for the men of millions back of the company, are Henry Leeds, of Manhattan; William C. Merriam, of Brooklyn, and Juan A. Smith, of Jersey City.

According to the papers of incorporation the object of the company is to acquire any all concessions, rights and franchises on the American isth-

merce are such and the new conditions that present themselves make such a waterway more of a necessity than ever, and leaves less doubt of its accomplishment in the near

An isthmus canal has been talked about more or less at intervals for over three quarters of a century; it has been before Congress repeated-

not, the growing demands of com- progress or plans to remove the ob-

ly as far back as 1825, and has been favorably reported upon a number of times, and the route surveyed several times, all of which has served to keep it before the country and center public attention upon it. It would not be creditable to the enterprise of this country to let it die or to acknowledge that it is not competent to the task, when the Frenchman has un-

dertaken the task of boring through mountains of rock from Panama to Colon.

A BIG WHEAT FIELD.

future.

We have said much in these col umns about wheat culture in North Carolina, but it is a subject the importance of which justifies the shedding of a good deal of ink. We frequently find in our exchanges from other States references to the capacity of North Carolina as an agricultural State, which we take pleasure

News and Courier:

"On the 10th day of May" says the editor of the Southern field, "the writer had the pleasure of viewing a three hundred and fifty acre field of wheat in North Carolina, which will be harvested about June 1. The indications are that this farm will produce this year twenty-eight bushels to the acre, and that the owner will realize at least 100 per cent. profit on the wheat crop. But this is not all. On this same land will be grown this year before time for sowing another crop of wheat this coming fall, a profitable crop of corn." No industrious man ought to perish, or stay poor, or have

the Carolinas.

field of wheat" would be a very rare sight in any Southern State, and not a common one even in the great wheat-growing States of the West, and a field of that size which would give an average yield of 28 bushels to the acre would be very fare even in such wheat-growing States as California. tion, ingratitude, irritation, suspicion.

We regret that we do not know the county in which this field is located, that we might learn something more about it, but the fact that it is North Carolina is some-

thing that we may take some satisfaction out of for it gives an object lesson as to the capacity of this

stacles in the way of progress, but there are few who have not time to read the suggestions made by those who have the time and ability to do the planning. There have been a great many conventions of an industrial character held in the South,

and we are sure the South has profited by them. There should be more. The more the better.

FOOLING WITH CUBA. A few days ago we quoted an extract from the Washington corre-

spondence of the New York Journal of Commerce and Commercial Bulletin showing the growing dissatisfaction with the military government in Cuba, and how soft snaps were being made for Americans who had a pull. The following, which we clip from the New York World, shows that this military rule is re-

sulting in irritation that may have very serious consequences, unless there be a change and this Govern-

ment shows some disposition to regard its pledges and obligations: It 8878: profound impression in this country "After quoting our solemn pledge-The United States here by disclaims

in reproducing, as we do the following, clipped from the Charleston

to leave the government and the con trol of the island to its people. He goes on to make a startling presentment of facts, of which these are "There can be no doubt that 'pacification' of the island is now accomolished. City for city. the towns of Juba are more peaceful, and orderly than those of the United States. There never was a more docile, quiet people. All the reports of 'bandits' are zealously forwarded to the United States, and half of them are lies.'

to "hunt for work," in a country like

Central America. They are impatient "A three-hundred-and fifty-acre to undertake the management of their own affairs. 'The irritation of the Cubans against he Americans and American military rule is daily increasing and will inevitably presently find vent in a revolt. "To drift on, to delay evacuation. neans "a struggle with the tremendous problem under_ disheartening conditions, trying to help this people in the face of daily increasing opposi-

ledge.'

FEMALE MAIL.

That sounds more contradictory than t is, when attention is called to its being description of the largest mail received by any man in the United States exclu sively from women. This "female mail" is received by Dr. R. V. Pierce, the celebrated specialist in women's diseases, chief consulting physician to the Invalids' Hotel and Surgical Institute, Buffalo, N. Y. It is only fair to say that it is not the

man that women write to, but the doctor. One of the remarkable features of this correspondence is that years after a cure has been effected, grateful women continue to write to Dr. Pierce, being thankful for health and for the kind and fatherly advice, which was blended with the physician's counsel, and which was so helpful in preserving the health when regained.

The offer of a free consultation by letr is exten

COTTON MARKETS.

By Telegraph to the Morning Star.

NEW YORK, July 1.-The opening cotton market was steady with prices three to eight points higher on generally bullish news from all quarters. The leading bull influence was the report, later verified, that instead of being exaggerated, the damage to cotton in Texas by the protracted and record. breaking rain storms of the past three days had been very much under-esti mated. Coupled with this information 18 00 @ 20 00 15 00 @ 16 00 was a firm set of . English . cables and a gloomy crop statement by the Chronicle. Shorts were in an uneasy frame of mind as a result of the adverse news from the South, and covered freely where opportunity offered. Speculation was seriously retarded by the proximity of the holiday season. Bulls and outside inventors alike were reluctant to assume new responsibili-
