Diphtheria Cases.

No further cases of diphtheria were reported yesterday, though one suspicious case came under the observation of a physician in the southern section of the city. It was, however, not officially reported. The excitable contingent of Wimington's population appears to have allowed their fears of an epidemic to have been absorbed by the diphtheria scare, while there are just as many cases of scarlet fever. There were no new ones of the latter disease, yesterday, however.
