FARM AND GARDEN

STORAGE FOR ROOTS.

Plans For Houses, Large or Small, Hillside and Field Cellars.

The leading feature of a good root house or cellar are cheapness of construction, nearness to the place where the roots are consumed, dryness, ventilation, and above all, it must be frost-proof. These important points must be kept in mind in planning a root house of any size.

ROOTHOUSE AND HILLSIDE CELLAR.
or cellar, says a writer in the Ohio Farmer in introduction to descriptions and diagrams as follows of a number of these places:

Fig. 1 is an end view of a roothouse made of brick. As brick is a pretty good conductor of heat and cold, it is necessary in building the walls to leave air spaces. A roothouse should be roofed with matched lumber and shingled, underlaid with two thicknesses of good building paper and ceiled overhead with matched ceiling and should have double doors, one pair to swing out and one pair to swing in.

Fig. 2 shows the stone facing of a hillside root cellar. This is a large cellar with bins on each side, with an alley between and is provided with a wide door. Two tight fences of staves and planks two feet apart, with earth filled in between, or of logs or stout rails used in the same manner make a cheaper front and give better protection against cold than stone.

A field root cellar, Fig. 3, may be built by digging in dry ground a trench 5 feet deep and 8 wide. Along each side 1 1/2 feet below the surface notch and level the earth up to the surface so as to form an oblique support for a joist 2 by 8.

Procure for Fig. 2 by 8 joists, saw them into lengths of 5 feet and set up a pair, spiked together at the top, every two feet of the length of the building. Nail cheap oak boards on the top of the joists to cover it completely. Cover this roof 12 to 18 inches deep with earth and sod it neatly, drawing the sod on each side to a gutter which will lead away the water of the rains.

The ends may be closed with double boarding and filled in between with sawdust. In the gable ends over the top of the doors it should be supplied with movable shutters for ventilation. In light soils it will be necessary to place a stone or brick or post and board wall against the side of the cellar. Such a cellar will last many years and is thoroughly frostproof. If made 90 feet long, it will hold, being filled only to the eaves, about 700 bushels. It may of course be made wider and higher and have root bins on each side, with a passageway between them.

Fig. 4 is a cheap roothouse made of slabs. Fig. 5 is half of a cross section. To make it frostproof take some rough

Infrequent and Improper Shampooing
are responsible for dry, scrawny and variable colored hair. Many people have a good supply of hair, and it would be beautiful were it not that they shampoo it too often and with too much soap. Shampooing the hair with soap is a waste of time and money. It dries the hair and makes it brittle. Everyone's hair should be shampooed once a week with some non-detergent and health-giving wash.

Sutherland Sisters Scalp Cleaner
does not rot and bleach the hair, like soda, ammonia, etc. It is a scalp cleaner with the "Hair Growth" which they contain nothing but what is good for the hair and scalp.

Holiday Goods.
Mixed Nuts, Coconuts, Canned Candy and Plain Raisins of fine quality.

Selling at Low Prices.

We also have Seed Oats, Seed Wheat and a complete line of Heavy Groceries. Lowest Prices for Quality.

Hens in the Molt.
Hens molt every fall, beginning usually in August, depending on the latitude. No special treatment is necessary, provided the fowls are well cared for, generally speaking, but some poultrymen aim to enrich the food in oils during this period by feeding sunflower seed or linseed meal, the latter being more commonly used. It is no doubt a good plan to sow a patch of sunflowers for the use of the fowls as shade and in order that they may have seeds in the fall during molting time. At this season of the year they seem to be extra fond of sunflower seed, which would indicate that sunflowers are good for them and that they know it—Reliable Poultry Journal.

East Carolina Real Estate Agency.
R. G. Grady & Co., Burgaw, N. C.

Christmas Time is Here

Not Christmas day nor Christmas week, but the plain time, the best time, the time of head work and heart work, the time of pleasant anticipation and enjoyable enjoyment. The time of looking and debating and secret wishings out, which will be evolved the gifts most valued and appreciated, because carrying with them, weeks of self-denial, sweat and long forethought.

For the Jeweler it is a time of buying, unfolding and displaying. The time when we can show you our choice selection of fresh from the packing boxes. The time when your early coming will enable you to select some desirable and useful articles to be "laid aside." A time when early Christmas shopping means much to you. Our line of

NOVELTIES
is large this year, but the best of the most extensive stock always gets to the "early birds." Will you be one?

DINGELHOEF BROS.,
Jewellers and Scientific Opticians, Parlor No. 123 Market St.
Dec 17

Well, Christmas is Coming, and I Am Glad of It, Says the School Girl.

My father and mother go to town before then, and I shall put in my wants and tell them where I would go and get the nice things I want.

My mamma has promised to buy me a nice Clock, and I have seen one that came from the Racket at \$2.48, just like the one I want, and a Fur Collar-ette at \$1.75 and \$2.00. Some very nice ones at \$4.00 and \$5.00, with the Capes and Fur and Heads and Tails and the nice things I want.

I will have him to get me a pair of Goodman's best Solid Leather Five Shoe at Gaylord's for \$1.00 a pair. My School Shoes, solid and good, he can get at 85c; and the run is large sizes, from 8's to 10's.

Look here! I shall not have it all. How about that Suit I am to have at \$1.50 or \$2.00; and a pair of those Double-Seated Pants at 50c; and a good Coat for 10c, 15c to 25c.

Well, I want some good Undershirts and Pants. I am going to get him to bring me some of those 25c Shirts that are worth 50c. 25c. I want a nice Pair of Union Suits, a good one at 25c; and a pair of fine Shoes at 75c or \$1.00. Do you know it don't take much money to fit me up, as I do not have any fundings. There is where you win; they do not cost much when you get them at the right place.

Big miss, you shan't have it all. My papa says he is going to buy his baby a nice long Clock at 75c, a pretty trimmed Hat, trimmed up to suit baby. Nice pretty styles at 75c, and a beautiful Silk baby Cap at 25c. And—these little soft Christmas Socks, laced up with red strings for 25c; all around the top for 35c and 50c. And the nicest little soft warm baby Mitts at 5c.

Don't you think papa can buy half of the things we want? Well, yes; they won't cost much. And he and mamma need some good Winter Clothing. I know where he trades, because he always does buy reliable, honest Goods, and gets them cheap at the Big Racket.

My mamma says she is going to buy a Carpet for her front room and her parlors, and says she can buy a good Ingrain Carpet at 25c, and good Brussels Carpet at 45c; a good Hemp Carpet for the dining room at 15c; a nice Matting for her parlor at 18c and 20c; and some Shades at 10c and 25c. Some Lace Curtains for the parlor at 95c a pair. And some nice Silkings for a tablecloth at 8c. And, just think, after buying these goods so cheap, the Racket Store man will give my mamma a real nice, large Willow Rocking Chair for a \$25.00 purchase, a set of fine Chinas, six Cups, six Saucers, six Plates and one large Bowl for a \$25.00 purchase.

They Have About Twenty-five People Pushing Out Daily at Wilmington's Big Racket Store.
