The Morning Star. BY WILLIAM H. BERNARD, WILMINGTON, N. C. FRIDA MANNING, MAY 24.

AN OBJECT LESSON IN FIGURES.

"More markets for American products" is becoming a sort of stereotyped cry with the Republicans, who have resorted to the reciprocity dodge to avoid tackling the tariff question, which some of them don't want to do and will not do if it can be prevented. In one of his recent speeches Mr. McKinley said "it is your duty and my duty to labor for more markets." A stranger who was not informed as to what progress has been made in extending our commerce would conclude from all this talk that we had few foreign markets and that we were suffering in consequence. And yet the increase in our foreign trade and the progress made in securing a foothold in foreign markets has both surprised and alarmed the representatives of the industrial interests in the commercial countries of Europe who are earnestly studying and seriously debating the ways and means to check this progress which they say threatens not only the prosperity but the existence of some of their leading and most important industries.

They have kept well up with our industrial statistics, too, and in what we have made the most progress and why. They have kept track of the growth of our iron and steel industries, the manufactures from these, of our cotton mills, woollen mills, silk mills, the number and increase of mills, looms and spindles, their output and consumption of raw materials. They have studied this about as closely as our own industrial representatives have, and more closely than many of them, because it is a matter of much interest and concern to them.

One of the leading German economists has recently published a very interesting paper which bristles with figures showing the industrial progress of the United States within the past twenty years. Already he says "the American iron industry has become the leading factor in the world-market, with which the European competing industry will have to reckon for all time." As an impressive object lesson he presents the following table showing our exports and imports for the past two decades, thus: Exports. Imports.

the "reciprocity" advocates who are trying to dodge a reduction of the tariff, especially on Trust controlled articles, may talk until their throats are sore, but it isn't that, nor more markets we want, but lower duties to enable our exporters to do business under more favorable conditions in the markets, which they already have. That's the kind of reciprocity they need and the only kind that will be worth the paper it is written on.

"THE PICK AND THE OLIVE BRANCH '

The negro of the South is getting a good deal of advice these days, a good deal of good advice, and some of the best of it comes from men of his own race. One of these is Prof. Councill, president of the (negro) Agricultural and Mechanical College, at Normal, Ala., who delivered an address a few days at Roger Williams University (colored) at Nashville. Speaking of the race question, he said:

"The solution of the race problem does not depend upon whether the negro votes or not. Colleges cannot solve it. Houses and land cannot solve it. Wealth and all the power, ease and comfort which it brings may aggravate it. If the negro remains in ais country, the race question can be settled only by each race understand ing its relation to the other, and each knowing its place and each keeping its place.

Then, addressing both races, he said that there should be kindly feeling, and each do all it could towards the lifting up and the betterment of the other, the white man not forgetting that he is white nor the negro that he is a negro. Then, addressing his own race, he said: "Every negro boy and girl should be taught to work, and to work hard, all the time. Whip idlers from among us, as the best sting out the drones. Idlers produce crime and criminals.

We must ask nothing but a chance to work and to be paid for our work. Envy no man. Take nothing from any man. Every honest negro drayman, servant girl, washerwoman, mechanic, hotel boy, barber, who does his duty in an intelligent, competent, trustwor thy manner, is a queen or prince among men. No honest labor is dishonorable. It is more blessed to serve than to be served, in any walk of life. The serIFAD-

Is only one form of the suffering result ing from a diseased condition of the sensitive womanly organism. The only way to cure the headache is to cure the diseases which cause it. The use of Dr. Pierce's Favorite Preacription has been the mons of curing thousands of women of headache, backache, female weakness and other forms of disease peculiar to women. It estab-

lishes regularity, dries weakening drains, heals inflammation and ulceration and

heals inflammation and ulceration and cures bearing-down pains. "I think if it were not for your 'Favorite Pre-scription' I would have been in my grave," writes Mrs. Edwin H. Gardner, of Egypt, Ply-mouth Co., Mass., Box 14. "I had pain all over me, and such a dragging feeling it seemed I could not do my house work. I had to sit down to wash the dishes, en. In the year 1807 I was so sick I did not care to live and prayed many times that God would take me. One day I thought I would write to Dr. Pierce. In a few days I received an answer. I decided to try his medicine, and to-day I am a well woman. I have no headaches previous to the monthly period, and such pain that I would roll on the floor in agony. This sometimes would occur every two weeks, and I would be very weak afterward. I was in pain all over. My feet would slip from under me when I would try to go across the out being in pain. I took three bottles of 'Favorite Prescription' and three of 'Golden Medical Discovery' and three vials of Doctor Pierce's Pellets, and was completely cured."

Dr. Pierce's Pellets stimulate the liver. CURRENT COMMENT.

- So far nobody seems to have been able to grasp that explanation made by President Schwab before the industrial commission as to why the "community of interest" plan is Dem

-Mr. Carnegie's gift of \$10,-000,000 to pay fees of Scottish students at leading universities of Scotland is the most magnificent benefaction ever recorded in the annals of humanity. SPIRITS TURPENTINE

- Dunn Banner: Col. John A. Spears, of Lillington, N. O., died at the residence of his son iu-law, Mr. R. L. Green, of Raleigh, Tuesday. Col. Spears was was 73 years of age. He went to Raleigh during the ses sion of the Legislature to attend to some business and was taken with grip, from which he never recovered sufficiently to return tome

- Greenville Weekly: Mr. F. U. Harding had a lot of hail on exhibition Saturday that he gathered in the field of W. F. Hartsfield, near Ayden, Friday. The hail fell Tuesday. It was muddy. or black looking stuff, and a number of pieces were an inch and a half in diameter. Where he found that it was still nearly eighteen inches deep. It had been there since Tuesday but was somewhat protected, which kept it from melting.

- Goldsboro Headlight: The wheat crop in this county looks remarkably well. It is the largest crop planted in many years and the weather favors it. - Bean prospects in this section are quite encouraging. The crop is late, but many bean fields are beautiful in their white and purple blossoms. Shipments will soon begin. --- The strawberry growers seem to be in hard luck. The continued wet weather has almost ruined the crop, which looked very promising last week, with prevailing good market reports. -Grass is giving the farmers a good deal of trouble. Those living in the strawberry region hardly can obtain sufficient negro help to conquer it. In other sections of the county negro labor appears to be plentiful for present farm needs.

- Winston Journal: An attempt was made Monday by Henry Wilfong, 70 years old, to blackmail A. A. Shuford, a Hickory banker, to the extent of \$100. Wilfong wrote an anonymous letter to Shuford threatening death if the money was not forthcoming. _____ The United States Collieries, Steel and Iron Company, which owns the mines at Danbury, through its representative, Mr. Tilden, is conferring to day with the committee appointed by the Chamber of Commerce in regard to the "community of interest" plan is a good thing for capital but a bad thing for labor.—Atlanta Journal, The company is ready to put up its machinery as soon as the road is com-

pleted. Mr. Tilden says that the mines are undoubtedly extremely valuable. The area covered by the deposits is five miles long and two miles broad, and it is estimated by a number of authorities that there are no less than 124,000,000 tons of ore, for which the company has already been offered 6.25 per ton. The value of the ore, which is magnetic iron, is that it is the ore from which Bessemer steel is made they never so many .- Philadelphia and that there are few deposits in the United States. bough.

- Clinton Democrat: Congress----- The Albany street-car emnan Charles R. Thomas has appointed plovees who did not strike were Mr. Walter E. Pridgen, of Kerr, to a promptly rewarded by the company, West Point cadetship. The appointafter the trouble had blown over. ment was made on competitive examination. - Mr. M. R. Matthis, of To each of the four men of the two Taylor's Bridge, township, was in town crews who took out the first two Saturday. He told the Democrat cars \$100 was given; to each of the about an encounter with a coach whip third crew \$50; to every motorman snake. Mr. Matthis was out walking and conductor who remained in the last Thursday with his little son. The service of the company during the boy saw a snake and called his father's strike \$20, and to all other emattention to it. Mr. Matthis saw that it was a coach whip and began to lay ployees who did not strike, a bonus of \$5, as well as board and expenses. plans once to kill it. He ran after the snake which turned and showed fight. It thrust its head up in the air ----Newport, R. I., is getting to and came siding at Mr. Matthis in a be a great resort for people of the way that made cold chills creep up and down his back. These are suggestive figures, and shows that our productive industries have not only supplied the demands of a largely increaseed population, but have added to our exports to the value of about \$500,000,000 last year over 1880, while the imports increased only about \$200,000,000 over the same year. A country which can show such a record of exports as this, and such a steady had come to our terms ' increase, cannot be suffering much for foreign markets.

If our "reciprocity" friends do not think this table shows progress enough they should remember that this progress has been made under handicapping conditions that make the figures presented the more remarkable. This handicap was the protective tariff which operated very seriously against our exporters and limited their sales to such things as were absolutely needed and could not be as well or as cheaply supplied by our competitors across the seas. The only way we get the trade of foreign countries is by selling at a lower price than our competitors can sell, or when some article is needed which cannot be supplied from some other source. In general trade the English trader, for instance, has the advantage over the American, because he is not hampered by import duties, and can consequently dispose of his goods and take in exchange for them, in part at least, the products of the country he is dealing in, for which products he may find a market in England or some other country. This the American trader cannot do because at his port of entry on returning home he would be confronted by an import duty

ant girl's hood and apron above an honest heart and educated brain are as honorable as the college cap and gown. Let the negro race carry the pick in one hand and the olive branch of peace in the other."

The solution of the race problem is right in this, for this means the fostering of industry, sobriety, good habits, character, which will do more to elevate the race and remove the friction that may exist than all the ballots they could cast in a century. By the way, negroes who give the race problem much thought are not losing any sleep over the ballot.

HOW HE CAUGHT THE SULUS.

Gen. Bans, who negotiated that treaty with the Sultan of the Sulus, arrived in San Francisco a few days ago, and in conversation told how ne captured them. He said:

the persuasive power of silver dol-

lars on the unsophisticated head

men of that group of islands. He,

very wisely no doubt, concluded

people who agree with him.

gests itself namely: Are the gen-

Thinks a Halter Needed.

"We don't wish to interfere with any honest fad or any legitimate fun." remarks Rural New Yorker, "but we must say that the Angora goat craze now sweeping over the country needs a halter. Hundreds, yes, thousands, of people seem to believe that the Angora goat will turn some brush ridden old pasture into gold. The Angora does' well on the western slopes of the Rockies and in the great southwest. Dealers tell us that the trade in mohair is limited and will not stand any great increase. The price of good Angoras has been boomed far out of proportion to their practical value. On most eastern farms well bred sheep will prove just as profitable as these goats."

Brave Men Fall

Victims to stomach, liver and kid ney troubles as well as women, and all feel the results in loss of appetite, poisons in the blood, backache, ner vousness, headache and tired, listless, run down feeling. But there's no need to feel like that. Listen to J. W. Gardner, Idaville, Ind. He says: 'Electric Bitters are just the thing for man when he is all run down, and don't care whether he lives or dies. It did more to give me new strength and

It is no longer called the "jaunting, but the outside car, and there is another charming word lost to the world. There was formerly an inside car, too, but it is almost unknown in Dublin, though still found in some of the smaller towns. An outside car has its wheels practically inside the body of the vehicle, but an inside car carries its wheels outside. This definition was given us by an Irish driver, but lucid definition is not perhaps an Irishman's strong point.

It is clearer to say that the passenger sits outside of the wheels on the one, inside on the other. There are seats for two persons over each of the two wheels and a "dickey" for the driver in front, should he need to use it. Ordinarily he sits on one side, driving, while you perch on the other, and thus you jog along, each seeing our own side of the road and discussing the topics of the day cross the "well," as the covered in cener of the car is called. There are those who do not agree with its champions who call it "Cupid's own conveyance." They find the seat too small for two and yet feel it a bit unsociable when the companion occupies the opposite side.

To me a modern Dublin car with rub ber tires and a good Irish horse is the jolliest conveyance in the universe. There are a liveliness, an irresponsible gayety in the spring and sway of it, an ease in the half lounging position against the cushions, a unique charm in "traveling edgeways" with your feet planted on the step You must not be afraid of a car if you want to enjoy it. Hold the rail if you must, at first, though it's just as bad form as clinging to your horse's mane while riding on the row. Your driver will take all the chances that a crowded thoroughfare gives him. He would scorn to leave more than an inch between your feet and a Guinness' beer dray; he will shake your flounces and furbelows in the very windows of the passing trams, but he is beloved by the gods, and nothing ever happens to him.

A STORY IN SECTIONS.

Demonstrating What a Hot Sun Can Do With Fruitful Eggs.

"Some five years ago," said Black, "I was aboard a river steamer on the Rio Grande. Among other freight exposed to the sun was a crate of eggs. About noon the purser, passing the crate, heard a peculiar sound. He pulled off a board to investigate, when out hopped an army of chicks. They sported over the deck like penguins on an icefield. The sun had been the incubator, sir."

PRODUCE MARKETS. By Telegraph to the Morning Star. NEW YORK, May 23. -Flour dull and fairly steady. Wheat-Spot easy; No. 2 red 82c; options became strong after a startting decline, due to crop

especially when we remember that ninety-five per cent of their exports are shipped in vessels which belong in countries with whose traders they compete, which is another reason in addition to handicapping tariff why they cannot do the barter business which their competitors do, for that would necessitate the chartering of vessels for the round trip. Mr. McKinley and the rest of

ways victories, nor are victors always entitled to the glory they Bishop Barclay of California preached a sermon recently in Chambersbug, Pa., in which he contended that God intended that the men should boss the women, and that this was part of the curse. There are other people who believe box. Sold by R. R. BELLAMY. † that way too. Among the Indians the women gather up the fire wood and do all the work and drudgery while the bucks loaf around and have a good time, and in some civil-ized countries women work in the fields and at hard manual labor, and nurse the things that may after-wards see that and not feel ashamed of it. These people may agree with Bishop Barclay. CASTORIA. The Kind You Have Always Bought Bears the

NEW YORK, May 23 .- To day's cotton market was moved by buying and selling from the outside and failed to July corn closed and May 42c materially respond to either bullish or bearish influences. The room ele-ment was badly mixed up in its op-tions and readily turned buyer or seller as foreign. Southern, Wall street or Western orders guided them. The uncertainty was still centered around July which followed a whim-sical course all the session and at times fluctuated violently. The opening was steady with prices unchanged to one materially respond to either bullish or lower. Oats showed a closing decline
