New Machinery Has Been Added and the Mines Are in Active Operation.

THE STREET IMPROVEMENT.

Princess Will Soon be Mscadamized From Pifth to Ninth. Which Has Been Improved as Par as Market--Much General Repair Work

To the uninitiated in city affairs and to those who have not previously, reason of their municipal or curiosity, visited the rock quarry in operation near the city, it will be well worth the while to make a visit to the plant now.

For some time during the early part of the present administration, owing to the excessive rainfall and a combination of other reasons, it was impossible to operate to advantage the city's extensive mines there, but now, thanks to the addition of new machinery and the adoption of improved ideas, the plant was never operated upon a more successful basis.

A reporter yesterday had an opportunity to visit the plant, and was impressed with the activity going on in that branch of the city street department. In place of the small pump, which was found early in the year entirely inadequate to keep the mine free of water, there has now been installed a mammoth pump of 60,000 gallons capacity per hour to take the place of the smaller one of 18,000 gallons. The smaller one is not, however, of no use, for it has been "rigged up" in the pumping station and is ready at a moment's notice to augment the flow from the mines from the larger engine if it is so desired, or in the case the one breaks down, the other-is ready for use at a moment's notice. The larger pump has an eight inch suction and a seven inch discharge. Two hun dred and twenty-five feet of iron pipe of this capacity for the large pump was purchased with the machinery, which came as a great bargain through the knowledge of machinery on the part of Alderman Louis H. Skinner, of the Streets and Wharves Committee, who made the purchase from the Hanover

ficiating clergyman at the marriage of Land and Improvement Company, of Castle Haynes, for \$250. The pump alone cost when new \$750. A 30 horse power boiler was also purchased at a very reasonable figure by Alderman Skinner from the Powers & Gibbs

boiler, too small for use. The boiler formerly used to generate steam for the derrick machine has also been discarded to save fuel and the steam for this machinery is now con ducted by an underground conduit from the rock crusher boiler some 50 or 75 yards away. All the departments are now very busy and about to expectation. It will come out 85 people are engaged at the mines. From 75 to 80 tons of the very best material for street improvement are now being taken from the quarry and put on the thoroughfares of the city each day. This, too, at a cost per ton convict labor. That is a criminal surprisingly low. Mayor Waddell, as chairman, the other members of the Streets and Wharves Committee and Superintendent J. M. Woolard are to be congratulated upon the progress

now in evidence in this important

Company to displace an 8 horse power

branch of the city government. The pump at the quarry is run both night and day to keep the quarry clear. Engineer Tom Barr is in charge during the day and Engineer W. W. Sellers is on duty at night. Mr. Irwin Blackmon has charge of the derrick machinery and Mr. Joe Schrader is in charge at the crusher, and all are running on full capacity. Twelve carts are kept as busy as bees in Ex-Gov. Hogg is working to bringing the material to city and just now a vast deal of street making and repairing is in progress. Superintendent Woolard now has about completed Ninth between Market and Princess streets and Prin cess street has been permanently improved on one side as far as Fifth and on the other side as far as Seventh. The macadam is not being brought to the river further than Fifth as the property owners on Princess between Fourth and Fifth are making an active effort to have the brick pavement extended that far. It seems very prob-

able that this will be done. At the quarry which is the centre of all activity in the street department now, Mr. M. Y. Johnson is superintendent in charge.

Preparing for a Great Meeting.

To night at the First Baptist Church all who will join in a chorus choir to occupy a large platform will meet for rehearsal and to meet Evangelist Lawrence B. Greenwood and take instructions as to their work. Members of other as well as Baptist churches are cordially invited to help in this song service. Mr. Greenwood conducts the meetings on very broad lines, and it is hoped that all churches will be quickened and helped by his work. Workers and singers will be welcome at all times.

PYTHIANS' NEW HOME

Progressive Wilmington Knights Have Leased Third Floor of Murchison Building.

CONTRACT FOR TEN YEARS.

Joint Committee Prom Stonewall, Clarendon and Jefferson Lodges Have Perfected Arrangements-Hall Pitted to Pythian Ideas.

A joint special committee from three of the four Knights of Pythias lodges of the city yesterday made announcement of the perfection of its plans to occupy the entire third floor of the new Murchison National Bank building now in process of construction on the northeast corner of Front and Chesnut streets, a lease of the hall for ten years having been completed.

The announcement will be received with interest and great pleasure by the four hundred and more Knights of the city who have long cherished the hope that some day they might have for a home, commodious quarters designed and constructed especially for them. Such a dream will be realized when early in 1902 Stonewall, Clarendon and Jefferson lodges will break camp in the MacRae building and move into elegant apartments in the Murchison building, designed and executed by a Pythian for Pythians and excelled in beauty and convenience by no other

K. of P. lodge in the South. The building in its entirety will be an imposing structure of pressed brick and granite, and will cost approximately \$20,000. The first floor will be occupied by the large banking interests of the Murchison National Bank; the second floor will be converted into up-to-date office apart ments, and the third will be the home of all loyal knights, whether visiting or local. The entrance to the upper floors will be from the Chesnut street side, the building will be comfortably heated by steam and the lighting will be from gas and electric fittings.

On the third floor the entire space will be taken up with the lodge room proper, hat and cloak room, property room, reading or reception room, and all other necessary appointments to make the "home" cozy and hospitable for the most exacting knights. The reading and reception room will be 23x25 feet in size and the lodge room itself will be 40x62 feet in dimensions. The interior fin-

ishings will be unique and durable, the color scheme being in K. of P. colors. There wil be nineteen windows extending around the hall and the ventillation will be well nigh perfect.

Contractor W. E. Glenn, of Charlotte, who will have charge of the construction, is himself a Pythian and knows just how each detail of a lodge room should be arranged. Mr. J. D. Nutt is chairman of the

joint committee to whom so much is due for its painstaking care in arranging for the new home and other members from the three lodges are as follows: Stonewall, No. 1-Messrs. W. C.

Smith, Eugene Fillyaw and J. H. Holmes. Clarendon, No. 2-Messrs. J. L. Daddow, J. T. King and J. D. Nutt.

Numerous friends of Mr. Wm. A. Wright will regret to know that he is desperately ill at his home on Market street. Yesterday noon he was out but very early in the afternoon he was seized with a congestive chill from which it is feared he cannot recover. ANOTHER ICE FACTORY.

Movement Said to be on Poot for Installation of New Plant Here.

Another ice factory for Wilmington now appears to be a reasonable certainty, although definite information regarding the establishment of the same is unobtainable from parties interested in the city.

It is understood that Armour, the largest consumer in the city, is behind the movement for a new factory and that before definite announcement as to the establishment of the enterprise is made, contracts with other large consumers will be sought, notably the brewing companies and several of the fish packers.

Mr. L. H. Simmons, of Rocky Mount, N. C., who has spent several days in the.city, is said to have visited the city with the purpose of interesting as many people as possible in the enterprise. Persons to whom reference was given in Wilmington regarding the industry refused to discuss the details of the probable installation of the plant.

THE STATE FAIR CLOSED.

Refreshment Tent Destroyed by Fire. Charred Body of a Negro Found in Ruins-Indications of a Murder.

[Special Star Telegram.]

RALEIGH, N. C., Oct. 25.-The rereshment tent in the Midway was destroyed by fire early this morning. The body of a negro, Joe Russ, was found charred in the ruins. The coroner held an inquest which developes strong indications that the negro was killed and the tent set on fire, but no one is implicated yet. Investigation is not completed. "Esau, the Wonder, that eats 'em alive," was in an adjacent tent and was badly burned.

The Twentieth Century Fair closed to-night and it is estimated seventyfive thousand people attended. Secretary Pogue in an interview to-night eclared that many features of the Midway disgusted him, and he promises more high toned attractions in the future. Many features of the present Midway are declared to be most base and immoral; lower than any seen at the World's fair or the Pan-American Midway:

Yesterday was the end of the first fiscal week of the cotton crop year that the receipts were in excess of a corresponding period last year. The receipts for the week ending yesterday were 22,837 bales against 13,465 bales during a corresponding period in 1900. The crop year receipts thus far are, however, far behind those of last season up to the same time. The local quotations remain firm on a basis of 74 cents for middling.
