WILMINGTON, N. C. SUNDAY MORNING. DECEMBER 15.

## WHERE THE BOOMERANG COMES IN.

In writing yesterday on the opposition to the Crumpacker bill we remarked that it might be followed by some results not anticipated by its originator and his followers. Its real, though not its acknowledged, purpose is to strengthen the Republican party by weakening the South and to give the Republican party a stronger grip on Congress and the Presidency by reducing Southern representation in Congress and in the electoral college. That is the scheme, but it may have quite a contrary effect in time. Leaving out Democratic opposi-

tion from both sides of the line, which will, of course, be solid against it, there are several elements in the Republican party which are opposed to it. First, those Republicans who are weary of the negro agitation and would like to have him diffeoundly climinated from politics, like the Congressman amount in the extract we made yes terday from the Washington correspondent of the Baltimore Sun, who spoke not only for himbut for a very considerable number of Republicans in the Northern and Western States. They don't know how soon they may be confronted by the negro question in their own States and they don't want to take a position now that would estop them from taking such action as they might deem necessary in such contingency. Then there are those who if the South only were affected might not hesitate to support Mr. Crumpacker's scheme but realizing that if carried out logically it must apply to all States which restrict suffrage for other causes than crime, will not want to put themselves in a position to estop suffrage legislation which might in time become necessary to protect the interests of the better and more substantial class of citizens from the irresponsible and worst class, at least considered irre-

Take Massachusetts, for instance, the State of Representative Moody, who introduced the resolution of investigation as to Louisiana. That State has qualified suffrage laws, the object of which was to eliminate as far as possible the votes of European and Canadian immigrants in the interest of what the people who favor these laws call good government. If Massachusetts takes such action to protect herself from the votes of illiterate white men, why should the people of Massachusetts object to the people of a Southern State taking action to protect themselves from the votes of the illiterate black mass, which is a much more potent and dangerous factor in these States than the illiterate immigrants are in Massachusetts, or Connecticut, or Pennsylvania. Without some such restrictions it would be, with the increase of the foreign element, only a question of time, and no remote time, either, when the native voters would by the minor factor in the government of several of these States. But the Crumpacker bill logically applied would cut off all restrictive suffrage legislation in any of these States, unless they accepted the alternative of reduced representation in Congress and in the electoral college. Already how to protect themselves from the incoming masses of negroes has been a subject of animated and serious discussion in such cities as Philadelphia, Boston and Chicago, while negroes have been driven from a number of towns and counties in Mr. Crumpacker's own signature.

Coming southward there are Republicans who hoped to build up a white Republican party by eliminating the negro. They feel the agitation of the negro question as a party measure would so inflame the feeling of the white men of the South against the Republican party that they would loath anything bearing that name and the hope of building up a white Republican party would be dashed to the earth never to re-

There are others who have been scheming to form a combination with what Senator McLaurin calls "Commercial Democrats," whose plan was to use these Commercial Democrats as decoys to draw votes from the Democratic party, to nominate them for office, and cast the Republican vote white and black for them, thus defeat the Democratic party and elect so-called Democrats with Republican principles. This is the programme of some of the Re- conquest; according to the courts publican schemers in this State. they are American territory when Making the negro an issue in Con- it comes to ruling them gress, making war on the South on but foreign territory when it comes account of him, would destroy that to squeezing tariff duties out of them. scheme even before it budded, and For some purposes the constitution drive these Commercial Democrats stretches far enough to reach and back into the party.

any particular it is as a schemer, fellow who had the bear by the tail; who never hesitates to "hold prin- he had to hold on because he didn't ciples in abeyance" to accomplish find it convenient to let go, so we any political scheme he may have suppose we will have to hold on to in view. With him success is the the tail and try to make the bear begoal of ambition, and, politically have himself and be good, if he does speaking, he is absolutely unseru- some growling and snarling.

he attains it, although he discourses very unctuously about dishonest elections, ballot box stuffing and all that kind of thing. He has sagacity enough to see that the Republican party in North Carolina couldn't form an alliance with a white mule after the National Republican party committed itself to and became responsible for such a measure as Crumpacker proposes, and hence there is nothing surprising in Senator Pritchard's opposition to it.

But opposition will come also from the intelligent, sensible negroes of the South, who will deprecate the re-opening and agitation of that question as injurious to both races, white and black, but more to the black than to the white, because the black are always the greatest sufferers in these race agitations. A meeting of negro ministers, held in Louisiana several days ago, voiced the sentiments of this class of negroes in the following resolution, which, among others, was unanimously adopted:

"Resolved, That we pray the Congress of the United States not to so anagonize the race question by a reduc tion of Southern representation as to stir up race hatred in the South and cause a repetition of the bloody scenes of the 70's, of which the negro will be the material sufferer.

The more intelligent class of ne groes, especially those who own property, are not anxious to have the mob of negroes vote. They would prefer not, because the less of that kind of voting there is the more assurance they have of good honest government which will protect them and their interests the same as it will the white people and their interests.

These are some of the results that would convert the Crumpacker bill into a boomerang, and utterly destroy the Republican party in the South without a hope of recovery.

## A DISAPPOINTMENT.

The verdict in the Schlev case is

a surprise and a disappointment, a surprise at the biassed decision of the majority and a disappointment at the division in the court. We thought, as doubtless did many others who followed up the proceedings of the investigation, that there would be a sort of compromise verdict which, while fully vindicating Schley, would let the Navy Department down easy, but we did not exsponsible, and not desirable as pect, and we do not think any other impartial person did, that two of the judges could have concluded to make such a sweeping condemnation, with but one saving clause, and this in the face of so much positive testimony to the contrary, while one of the judges, the brains of the trio, with the same testimony before him, came to an exactly opposite conclusion. The country will agree with Admiral Dewey, and that will leave the matter just where it was before the investigation began. Neither the friends of Schley, nor the friends of Sampson, nor the believers in fair play, who may not belong to either faction, will be satis-

fied with this divided verdict, which is a waterhaul and settles nothing. But there is little prospect of getting anything more satisfactory, for if the case were taken into Congress partisan influence would rule there, and the majority would feel it incumbent to sustain the Navy Department just as these two Admirals who rendered that unwarranted ver-Unbiased people who have read

He can well afford to rest on that and on the unqualified verdict of the other here of the Spanish war-Admiral Dewey-who besides Schley, is the only one of the navy who comes out of this thing with as much honor as he went in. ## COTTON MARKETS.

By Telegraph to the Morning Star. NEW YORK, Dec. 14.—The cotton market opened easy, with prices three to six points lower under unloading by small holders who were frightened

three to three and a half points in Liverpool to-day and by another bad turn of the stock market. But almost immediately after the call unbiased room operators recognized great inherent strength in the market. Covering was soon in active progress and new buying figured prominently. The app-arance of an intensely wave in the Southwest and a forecast for very low temperature in the central and eastern districts over Sunday gave rise to predictions for a light movement of the crop next week. To day's receipts were not up to expectations and estimates indicated very moderate arrivals on Wall street, the South, the continent and American spinners were buying on the first hours advance. Room bulls were untiring in their efforts to support the market and the bears were greatly disturbed by the unlooked for action of values which were soon even with last night's final bids, despite the weakness abroad and the unsatisfactory condition of the stock market. Trade was not especially active, but reflected a healthy speculative situation. The market for spot cotton closed quiet with prices unchanged, on the basis of 81c for middling uplands and 84c for middling gulf.
