owe allegiance to that country will be permitted to remain in the Philippines to pursue their professions and to e: joy all the rights of property. The Vatican holds that if the Philippine Government cannot compel the members of religious orders to leave their parishes, the Vatican certaioly cannot do so.

Officials believe the present negotiations will not fail. The United States Government will not secure everything it desired, because, even if the Pope were disposed to concede these things, the negotiations have developed the fact that although his power is theoretically unlimited, in actuality the internal politics of the Vatican impose tial factor. conditions even upon the chief prelate of the church which he must observe. Therefore the immediate and complete withdrawal of the Spanish friars from the Philippines is not now expected, but it is believed that the result desired can be accomplished by an arrangement for the substitution of friars of other nationality, and the principal is profit by its victory: sue at present is as to the time within which this change may be brought about.

As the friars are gathered almost al together in Manils and are a heavy charge on the convents and members of the Catholic Church outside of the order, who are maintaining them, it is expected that they will hasten the sothe ground waiting to gobble up every lution of the problem by themselves valuable sugar plantation on the voluntarily seeking other fields of island, whose owners will be comlabor outside of the archipelago, for it pelled to let go at forced sale. One apparently well authenticated report is not held to be within the power of the United States Government to rehas it that the \$15,000,000 issue of establish them in their parishes against stock made by the Sugar Trust last the desires of the native Catholics. winter, and whose disposition has not

Although Governor Taft must make concessions on this point, he has been successful in other matters, and especially so in the matter of religious education in the public schools. The cardinals' committee insisted strongly that any arrangement made with Governor Taft must include some provision for religious training in the schools, but it seems now that the committee has consented to an indefinite postponemet of this issue, which is in itself a satisfactory solution of the case from the viewpoint of the United States.

This is supplemented by a dispatch from Rome which states that it is understood that the question of withdrawal could be settled immediately if President Roosevelt will consent to their gradual withdrawal. If that is all an agreement can be reached for of course President Roosevelt will have to consent to that for if he refuses to do that the friars may refuse to move at all and the whole business will fall through.

This fact is recognized by Secretary Hay, who called Secretary Root's attention to the treaty with Spain by which her sovereignty was transferred to this Government which provides for and protects the rights of Spanish subjects remaining in the islands after the transfer of sovereignty. The friars can claim as follows protection under this clause and insist that this Government protect them in their personal and property rights just as it would protect any other former subject of Spain, and this Government, if it respected the treaty, would be bound to listen to

## COTTON MARKETS.

By Telegraph to the Morning Star NEW YORK, July 15 .- The cotton market opened steady, with prices one point higher to one point lower and for the balance of the day followed a rut of five points, with trade at all times tame. The English cables cut little figure as an influence, being regarded as a stand-off. The weather report gave showers to moderate rains in the belt and the forecast pointed to more precipitation over the central and eastern sections to-night and to-morrow. Spot cotton houses were light buyers of the July and August options during the forencon, Liverpool bought January. Then came the weekly crop weather report from Washington, and noted a marked change for the better in conditions, as compared with one week ago. However, the trade had discounted a favorable report and as selling orders were scarce, the depart ment's statement produced little or no effect on the market, which continued dull and narrow. Throughout the and March 4 17-64@4 18-64d seller afternoon the market was featureless with the room quite content to await further weather developments in the belt and the cables from Liverpool tomorrow. The close was quiet with prices net unchanged to two points ower. Receipts were light, clearances for export were small and the other phases of the statistical situation lacked new features

NEW YORE, July 15.—Cotton quiet at 9 5-16c; net receipts 50 bales; gross receipts 1,764 bales; stock 143,999 bales. Spot cotton closed quiet; middling uplands 9 5-16c; middling gulf 9 9-16c; sales 130 bales.

Cotton futures market closed quiet: July 8.70, August 8.45, 8

about July corn. As a result the effect of the break was felt in all other grains. Yet natural conditions were bearish enough to break prices and fine weather and lower cables besides the heavy receipts caused such general selling in all the pits that September wheat closed 1@11c lower, September corn 11@11c down, July corn 151c lower, and September oats #@1c lower. Provisions started strong, but could not withstand the pressure of the grain break and closed a shade to 20c lower. OHIOAGO, July 15.—Oash prices: Flour easy. Wheat—No. 2 spring 74@
