cordial acquiescence of the Camp. 1t is also being suggested in Confederate circles that the next Legislature be asked to make Davis' birthday a legal holiday. The meeting of the camp last night

was presided over by Commander W. . Woodward. A record of the proceedings was kept by Adjutant A. L. DeRosset and a goodly number of veterans were in attendance. The Adjutant reported that the Camp had urned out in uniform for Memorial Day and again to attend the funeral of the late Comrade W. R. French.

The Commander appointed as the committee on Membership, Comrades W. P. Oldham, Geo. W. Huggins and Thos. D. Meares.

Upon request of Comrade W. I DeRosset the commander was instructed to suggest to Governor Aycock the appointment of Comrade Geo. W. Huggins to fill the vacancy on the county pension board, caused by the prolonged absence from the city of Capt. Walter G. MacRae. The Board will now be composed of Comrades W. L. DeRosset, O. M. Fillyaw and Geo. W. Haggins.

PRETTY WEDDING IN THE COUNTRY.

Marriage of Miss Sudle Mills and Mr. E. Parker Thursday Evening.

Located in a picturesque grove of stately pines and less pretentious oaks stands Masonboro Baptist church, which was the scene Thursday even ing at 8 o'clock of one of those quiet country weddings which are always interesting because of their simplicity and their striking contrast to the society weddings of the present day. The contracting parties were Mr. Columbus Edward Parker and Miss

C. Ransmeier, of Trinity College. He discussed the subject from the standpoints of time, value and discipline. The time should be early life. A knowledge of the languages is indispensable to the professional men of to-day-the physician, the chemist. French and German are also of great value to the commercial world. Prof. Ransmeier made a strong plea to the teachers to see that the future genera-

tion is better trained in modern languages than the people of to-day. "School House Building" was discussed in able manuer by Prof. E. C. Brooks, of Monroe, who said the great care now being taken in the construction of school houses is a proof of the interest taken in education by the people. The first step in modern education is the development of the mind. The environment of the child entering school is changed from the free life it has been leading. The change must be made as attractive as possible.

For reasons of health the location of schools should be carefully selected. Prof. Brooks discussed fully the material construction of the school house aud gave many valuable suggestions along that line. Mrs. Hollowell, president of the As-

ociation for the Betterment of School Houses, gave an interesting review of the Association's work and its objects. "The Influence of the Rural

Library" was the subject of an able paper by Supt. R. M. Davis, of Tarboro. The library may have a farreaching effect upon an entire comcommunity, so care should be taken to choose only good books. The influence of good books is incalculable, a powerful factor in the formation of the character of both child and parent. They enlarge one's capacity for enjoyment and tend to broaden the mind and increase the mental power. A good book is some times more influential in a community than a good man, therefore only the best books should

enter our libraries. "The Library in College Work" was ably presented by Librarian W. S. Bernard, of the University. North Carolina ranks twenty-seventh in the number of its libraries. Mr. Bernard gave many interesting statistics regarding the State's libraries. The student reads for all or either of three objects: pleasure, culture, research. Each of these sub-divisions were treated at length, using the University's splendid library as an example. Coupled with the address Mr. Bernard gave much profitable information regarding the management of a library. One of the finest papers during the entire session of the Assembly was read by Prof. R. D. W. Connor, of Wilmington, upon "Calvin Henderson Wiley and the Common Schools of North Carolina." The life and services of that distinguished educator were sketched from the time he assumed charge of the schools in 1852

sembly was assumed almost entirely by Mr. Harrell, who willingly and enthusiastically gave his time and energies to it.
