LOOK

OVERCOAT DUTY.

You owe yourself an Overceat that's right-the Overceat that's right owes you proper protection and wear.

But you will not find "right kind" of Overcoat every where; you'll certainly not find it if you shop at random.

If you patronize most any kind of a clothing store most anywhere.

If you jump at the first reduced price advertisement.

If you rush into a store and rush out, buying the first coat shown you.

To procure that "right kind" of Overceat you must go to the right store-the kind of a store that confines its advertising to facts and invites investigation and compa rison.

If you will consider these points we believe that you will leave your Overcoat money here

Our Overcoat price range is from \$10.00 to \$25.00 and your money goes back if the coat goes wron g-but it won't.

Changes From a Fish to a Bird. The story of the early life, transformation and final death of the Chinese quall is the most remarkable that is found in the ornithological literature of the world. The narrative in all its unreasonableness is found in the story of om chung, which is the name the Chinese quail is known by when at home in the Flowery Kingdom. Celestial authorities on bird lore declare that no specimen of om chung was ever known to live a year; that they do not lay eggs, as all other known species of birds do, and, finally, that their progonitor is a slimy, four jointed worm, which has a red head and a sting on the end of its tall. This queer seacoast worm, according to the curious legend of om chung, lays 100 eggs annually. Fifty of these become fish and the otber fifty are worms of the same species as the parent. The fish that has come into existence in this curious manner also lays 100 eggs a year. Fifty of these become water denizens after the image of their parent, and the others family. These on chungs, or Chinese brought into existence as above related. We give the above not as a literal fact, but as a specimen of the Chinese idea of evolution.
