### THE SEEDSTAN.

How doth the busy nurseryman Improve each shining hour, And peddle scions, sprouts and seeds Of every shrub and flower?

How busily he wags his chin, How neat he spreads his store, And sells us things that never grew And won't grow any more.

Who showed the little man the way To sell the women seed ? Who taught him how to blow and lie, And coax and begand plead ?

He taught himself, the nurseryman; And when his day is done, We'll plant him where the lank rag we Will flutter in the sun.

But, oh, although we plant him deep Beneath the butter He's so much like the seeds he sells He never will come up. -Burkington Ha

HOW DEY GROW.

Remarkable Blongation of a Detroit Man in a Very Short Time.

[Detroit Free Press.] One day last week a Detroit mechanic was going down Michigan avenue and became favorably impressed with a pair of pants hanging in front of a cheap clothing store. The price was low, the goods seemed all right, and he made up his mind to purchase. "I gif you de word of Andrew Shack-

son dot dose pants are shust like iron," said the dealer; "I warrants dem efery dime."

After three or four days' wear the purchaser found the bottom of the pants crawling toward his knees. It was a bad case of shrinkage, and he got mad and went back to the store and said:

"You swindled me on these pants See how they have shrunk!" The dealer looked him all over, felt

of his head, pulled on the pants, and finally said:

"I shall give you one thousand dol-lars a month if you will travel with me.'

### "How-what?"

"You are shust growing right up at the rate of two inches a day, and I takes you aroundt the country on exhibition. Dose pants are shust as long as efer, but you have grown outd off dem.

"I don't believe it!"shouted the man. "I am forty years old, and quit grow

ing long ago!" "I gif you de word of Andrew Shack son dot you vas growing." "I don't care whose word you give

I say these pants have shrunk nearly a foot."

"Has de top of dose pants shrunk

Starving Orchards. [For the Carolina Farmer. It is worse than useless for a farmer

set an orchard and not give it a hare of his care and attention. We are induced to make these remarks from an examination of some of our neighbors' orchards a few days ago, the condition of which are anything but creditable to their owners; (and, ine, there are many others (and, ine, there are many others in ountry in the same fix.) The or many of them, appear half-some dead, and many declining, literally starved; not having re-manure or culture for years, owded with water sprouts, dead

in that town a true and lawful "so of George Washington, aged one hun dred and three years." For Mr. Mu nd rotten stumps, caused and disastrous pruning hattan informs us that this interest-ing centenarian is the son of the Faing centenarian is the son of the Fa-ther of his Country by a lady whom he married "in the summer of 1778" at Fort Duquesne, and upon the very spot "where the freight depot of the Pennsylvania railroad now stands." And yet veracious history tells us that George Washington had been already married on the 17th of January, 1759, to Mrs. Martha Custis. We decline to indict the founder of the republic for bigamy in this Centennial year

Now what should be done what nure, rehards? We would say manure, grape, prune, and cultivate judici-not being very busiy, and the trees, not being very old, will put on new life, and rejoice in their renovation. This should have been done earlier, but it is not nave been done earlier, but it is not now too late to produce very desirable results. When done in proper time it will double the crops, and infuse new life and vigor in the trees. All decayed stumps of large limbs should be taken off close and smooth, and if much decayed, and hollow should be well filled and plastered with grafting clay, or better a medi-

salt, melt it, put in the yolks of three hen's eggs, not the whites, stew till brown—then add the same quantity with grafting clay, or, better, a medi-cation of equal parts pure clay, garden mould, and cow dung, well manipula-ted. This will remain intact for years, of sugar, as of the eggs; in fifteen minutes strain for use; spread it on the skin where the poison is as often as needful till a cure is effected. The and if, when dry, a thick coat of lead paint is applied on this it is rendered very durable, and will keep out air and moisture and arrest further decay. man who gave this to the writer a few months ago, was in danger of having his leg amputated—now the surface The roots of trees, unlike the cattle. can't get to a fresh pasture; and when exhausture occurs they should be fed. A tree will not flourish in poverty no is healed over, and the skin looks natural. He is ploughing every day. Keep it on hand. more than a bullock will thrive when half starved. It is rarely the case that The Growing Power of Corporations, the soil is too rich or even sufficiently rich for the apple and pear, and if by a succession of exhausting crops of When our fathers abolished the law of primogeniture they supposed grain the rootlets are gradually deprived of susetnance, poor crops and diseased trees must be the consethat the country was secured against the danger of vast individual wealth accumulating from one generation to

quence. Washing with strong soap-suds kills insects, their eggs and *larva*, and adds greatly to the health of trees, young or old; and no manure is better than leached or unleached woodashes, sowed or spread around as far as the roots extend. If the trees are mulched with half rotted straw or litter before this application the ben-

efits will be still greater. this vast and constantly increasing All this is not new to most cultivapower is under irresponsible control. tors, but they need "line upon line," and beginners may be benefited by A corporation can neither be hung what we have said. soltly asked the dealer "Why, no."

'Shouldn't de vaistbands shrink down shust as queek as dose bottoms should shrink up. If it's in de cloth, one part should shrink like de odder, eh? When I sold you dot elegant pair of pants for three dollars I don't suppose you vas growing so fast or I shall haf put zum straps on de bottoms." "Well, I don't like this way of doing

business," said the purchaser. "Shust like me. If I sells such elegant pants as doze to a man, and he grows out of dem, it damages my trade.

You haf damaged me five hoonored dollar, but I haf low rent, pay cash for mein goods, and can make you dis fifty cent-tie for five cents."

Influence of the Moon on Vegetation.

The moon's influence upon vegetation was formerly discussed period-ically in many of the agricultural newspapers of the day, but as neither the moon nor the discussion of her powers ever had the slightest effect powers ever had the slightest elect whatever upon vegetation, the dis-cussion has gradually died away be-fore the march of improvement and the growth of intelligence which have almost entirely displaced the old su-perstitious notions of past ages. We have never paid the slightest regard to these old savings shout the moon's to those old sayings about the moon's influence on vegetable and animal life. We would no sooner go to the almanac to learn when to wean a calf or to kill a pig, than we would consult its pages to learn when to "look out for a storm," with the words strung along down the calendar through fifalong down the calendar through fif-teen to twenty days. There is a pro-per time for cutting timber, varying according to the object desired. If to secure the best sprouts for a second growth, cut in the spring. If to kill the trees root and branch, cut late in summer, but there are no one or two days which are practically better for these operations than other days dur-ing the same months. We have heard ing the same months. We have heard of a man who would consult the alof a man who would consult the al-manac to learn when to build a rail. fence. There were a number of letters published upon "Lunar Influences" in the monthly New England Farmer of the year 1855, but we could hardly recommend you to look them up, exit in the kettle occasionally. Then take it out: let it drain; return the drained liquor to the kettle and add all the water needed. Repeat the process, and occasionally add a little soap and salt. After the wool is suffi-ciently drained, simply rinse it out in cold water, and you will have it white and soft. Never let wool boil in the liquid as that will fix the gum. cept as a matter of curiosity. The best time to kill a hog is when it is fat, the weather cool, and the pork needed for home use or for market. The best time to plant or sow is when the ground is warm and in the best condition to receive the seed. The condition to receive the seed. The best time to kill weeds is as soon as they appear, and the best time to har-vest a crop is when it is ripe for the harvest. Finally, the best time to study the influences of the moon upon vegetation is when all other subjects have been completely exhausted.— New England Farmer.

### Stonewall's Widow.

Mrs. "Stonewall" Jackson is a handsome little woman, looking still very young. Gen. Jackson left his wife and child in very moderate circumstan ces. He invested all that he had in the bonds of the Confederacy, which are of course worthless. A neathome in Lexington was nearly all that was left. A small amount of money in bonds and this house comprise Mrs. Jackson's wealth at present. Her in-come is sufficient for the support of herself and daughter. She is now boarding at school in Charlotte for the purpose of educating the daugh-ter. She has uniformly discouraged any movement that looked toward the raising of money by public subscripces. He invested all that he had in

species of natural scenery-Moravian Falls. The fall is almost one hundred

let it remain fifteen minutes, moving

it in the kettle occasionally. Then

the liquid, as that will fix the gum, render the fibre stiff and gray, and unfit it to make soft, flexible yarn. Fine wool needs more lime in the ket-

tle than coarse. Taggins may be cleansed in the same manner, by clip-

ping off all the hard matter that cannot readily be compressed between the thumb und finger.—Rural New

The Man Who First Nominated Hayes

Yorker.

feet from top to bottom, but is com-posed of two declivities; the first de-clivity is some seventy feet above the second. Just at the foot of the first there is a table rock ten feet long six-ty feet wide, and as smooth as though it had [been executed by an artisan's skill. The second declivity is thirty feet from the base of the first. Mid-way the first fall, in the centre of the rivulet, there is a large protruding rock. After a rain or even a shower correspondent, writing from Sanford to the Raleigh Observer, gives the following particulars: " Miss Ann Eliza Sibley, the 'Johnson's Wife" alluded to, lived in Fay-

rock. After a rain, or even a shower, etteville many years ago-before ei-ther you or I can remember. Her fathe water is hurled with such rapidity against the rock that it is shattered into a thousand atoms, as it leaps in the air some twenty feet and strikes a few feet from the base of the second fall, giving it a new start. The rock over which the water falls is of the finest species of granite, the edges of which are environed by shaggy moun-tain moss. A level headed person can descend and ascend the first fall with-in a few feet of the protruding rock without being in iminent danger, although the face of the main rock is almost smooth. At the first fal, against the rock that it is shattered ther was a physician, and a native of Connecticut, as I have heard. "There was torn down in Fayetteville, about twenty years ago, a very old building, one of the old landmarks, long known as 'The Grove House.' That house, I have heard it said, was erected by Dr. Sibley. But

have also heard this contradicted. I remember many years ago listening to quite an animated discussion bealmost smooth. At the first fal, there stands a gigantic old mill, built after the ancient Gothic style. The tween two venerable ladies on this subject. One of them had quite a capacity of this old mill is almost in-calculable. It operates flour, wheat, corn and oil mills; wool eards and distinct recollection of Dr. Sibley and his family, and related anecdotes cotton gins and press. When the stupendous seventy-five foot wheel is of the pains and care that were taken in the bringing up of Ann Eliza, an put in motion, it looks as though it only child." would turn the axis of the earth. "Senator Johnson, (not Johnston)

Verily, the mountains of Western of Louisiana, came to a sudden and North Carolina not only are possessed of minerals in abundance, but also untimely end. In going ashore from some of the most beautiful natural scenery in the world.—Wilkesboro Witness. a steamboat at Washington City he fell into the water and was drowned. This was, I think, in 1830 or 1831. Recipe to Cleanse Wool.

Hunt Brothers, of the"North Bloom field custom woolen mill," New York, once gave the following recipe for cleansing wool: To two pailfuls of water add a quart of soft soap and half a pint of common salt. Heat from 150 to 180 degrees—or a little warmer than the hand can bear. Put in all the wool that will stir conveniently, and

Mothers, do not let your darlings suffer with the Whooping Cough, if you have a remedy so mear at hand. Use Dr. Bull's Cough Syrup, and the little sufferer will soon find relief. Price 25 cents.

Receipts to-day, 36 bbls pitch, 1,182 do rosin, 86 do spirits turpentine, 698 do tar. The operations reported in our last appear to have pretty well satisfied the orders at to have pretty well satisfied the orders at hand, and the general market for the day was quiet. Spirits turpentine met with only a moderate and by no means anxious jobbing inquiry, for which the offering proved ample and sellers willing to accept 30c, leaving value unchanged. Rosins also were more or less neglected, and nominal-ly unchanged, though holders were inclined to make a show of steadiness. Tar and pitch in fair jobbing demand and steady. The telegraphic advices were as follows: Liverpool—Spirits turpentine, 28s 6d; rosin -common, 5s 3d; fine, 10s. London—rosin, 6s for common; pale, 12@15s; spirits turpen-tine, 28s 6d.

Diseases, and upon ins fouring full particulars, show-books and papers containing full particulars, show-ing that every one can be his ewn physician and pre-pare his own medicine, and such information as we have received we now offer to the public without price, only asking that each remit a three cent stamp for return postage. Address CRADDOCK & CO., 1032 Race Street, Philadelphia, Pa., giving name of this many mh 33-3m W this paper. Scotching Malaria. It is a fact widely and amply attested that where the powerful and perticious drug, quinine, and oth-er mineral poisons, administered as remedies for fever and ague and billous remittents, fail to yield more than temporary relief to the sufferer, Hostet We heard of sales yesterday of 1 raft infe-rior Common Mill at \$5 00 and 1 raft Fair ter's Stomach Bitters scotches those tremendous epidemics most thoroughly, and by strengthening the system and regulating its functions, protects it rior Common Mill at \$5 00 and I raft Fair Mill at \$7 50 per M. STAR OFFICE, April 24. SPIRITS TURPENTIME.—The mar-ket was firm at 29 cents per gallon for country packages, with sales, however, of only about 20 casks at that figure. ROSIN.—The market oppened strong, with buyers and sellers apart, but later against malarial attacks. No resident of a locality where the above maladies prevail, or where they are likely to break out in consequence of the pol soning of the atmosphere by norious exhalations, And that, and THAT!" Picking himself up at the foot of the stairs, the stranger was heard to gloomily sollicoulze— "Why, they told me that old rooster was a red-hot republican, the cussed liars."—Danbury News.

his office Saturday reading the politi-cal news from Cincinnati, when a visitor entered. The new comer was

The lines addressed to 'Johnson's Wife of Louisiana' were written in her album perhaps a year or two be-tore this, but I do not think they ap-peared in print until about 1834."

raising of money by public subscrip-tion for her use. Hence a proposition made last spring that the various memorial societies of the South should receive contributions on Memorial day for the family of Stonewall Jack-son, realized only a few hundred dol-lars. Mrs. Jackson has determined to make her home in Charlotte, near which city her father lives. She is now trying to so arrange her slender resources that she can build and fur-pish a home for her self and development nish a home for herself and daughter. She much prefers to supply whatever deficiency there may be in her means by her own exertions.

#### Delicate Cakes,

One cap batter, two of sugar, three-quarters cup sweet milk. four of flour, six eggs(the whites only), three heap-ing teaspoonsful of baking-powder, sifted with the flour, whites of eggs put in last of all and the whole well beaten. Excellent cup cake made as above, only adding the yolks.

Williams & Murchison.
Schr Marion P Champlin, Freeman, La-Guayra, Jas H Chadbourn & Co.
Nor barque Forsete, Christepsen, Rotter-dam, Williams & Murchison.
Nor brig Dag, Jobsen, London, Alex
