COMMON SCHOOLS. It is very common for editors and public speakers to complain of the general want of intelligence in the State, and particularly of the workings of the present free school system. But we believe the fault is in the people and not in the system. The prescribed requisites for a free school teacher are about in keeping with the amount of pay he is likely to get. You can't expect a hundred dollar man to work for twenty dollars. What chance has a committee to employ a first-class teacher when the amount of money they are allowed to expend would not pay a first-class hog drover? Yet, if the tax were raised one dollar, every man who has been denouncing the free school system as a delusion and a snare would at once denounce the increase of expenditure as an attempt to defraud the "down-trodden and oppressed people." Give your free school teachers more money or cease your grumblings.-Morganton

We agree with our respected contemporary that the people are to blame, but there is great defect in the system. The educational fund is not half enough, the standard of scholarship is distressingly low, and the teachers generally are very incompetent. If there was more money there could be employed a better grade of teachers at fair remuneration. Under the present system, we believe, the time allowed to each pupil is only some six or eight weeks in the year. That is all the fund will

If the common school fund is not increased and a better class of teachers employed, then it is of but little real importance whether the present | back panacea, which is to print and system lives or dies.

If the press and popular leaders do not rise to the demands of the age, and determine to do what is right, irrespective of what people may do or say, then it is quite certain the school fund will not be enlarged, and the lack of education will continue indefinitely to distinguish the people of North Carolina. We must have more and better schools, or the stigma of ignorance will be through the decades to come the insignia of North Carolina.

If the people of North Carolina are not willing to be taxed higher that education may be extended to the children of the State, then they deserve all the reproach and all the evils that flow from ignorance and vice.

Before the war the old State stood first among her Southern sisterhood in the cause of popular education. In 1878 she is at the foot of the class, and stands Z among the thirty-eight. Shall this unpleasant state of things continue? It depends upon an intelligent, thoughtful, conscientious and earnest press and upon the leaders of public opinion generally.

THE THIRD TERM.

The talk throughout the North is what Grant said in his reported "conversation." According to the papers his chat about the third term makes it plain that a plan has been matured to run Grant again, and that the Herald is a party to it. The New York correspondent of the Philadelphia Ledger is an able Republican. He is not an extreme man, and hence we quote what he writes on the 26th

"At the Democratic club rooms no doubt seems to be entertained that the "conversations" are part and parcel of a plan that has been matured by the Republican lead-ers here, to make the author of them their standard-bearer of the party in 1880. Both Mr. Tilden and Mr. Hewitt are credited with these convictions, but upon what, if any, facts these are predicated, does not seem to be known to anybody but themselves. The *Herald* also is accused of being privy to the scheme. In support of that surmise it is said that Mr. Bennett was in active communication with General Grant when on the other side, and that Mr. John Russell Young in writing up the 'conversations' was but following instructions. As additional circumstantial evidence in that direction, the fact is referred to that the Herald to-day is republishing all the favorable commentaries upon to beggary and bankruptcy, for they is a "specimen brick."

the 'conversations' that have appeared in | would destroy the capitalists of the | People are escaping from New the leading journals within the past day or two, as if in order to keep the matter before the public, and thus familiarize it with the third-term idea."

The New York Tribune, strange to say, goes heavily against the movement. The secret of the opposition of this very corrupt and wicked paper is that it is for Jim Blaine for President. It is warring vigorously against Grant and will have some influence in lessening his chances. We quote a paragraph to show its animus:

"The zeal in reporting him, and the man-ner of it, begin to nauseate the country, because he is made to appear as a very obstreperous and clamorous office beggar, who has only the common cunning of perpetually denying that he wants office in order to keep his name perpetually in mind.

* * * The political buzzards who persist in placing him before the country as a candidate, with or without his consent, are compelling the people to remember much that they would most gladly forget."

About the Custom House the talk already is of establishing a Grant organ in New York-an organ to urge his renomination and re-election. The Bread and Butter army of ninety thousand is getting in earnest in the Grant, business.

THE NEW PARTY.

The Greenback party is distinguished for several things. It has remarkable pertinacity and zeal, has very wild and dangerous notions, and is very aggressive and insinuating. It may not mean to work mischief, but as sure as the sun is the centre of light, the new party will entail ruin upon the country if the ideas and principles thus far evolved from its conventions and platforms are adopted by a majority of the American people. It is a mistake to suppose that this new and aggressive party is aiming only at an abundant supply of greenbacks—that they simply demand more money, money in great quantities, money continually, money all the year round. It would be very bad for the country if this idea was adoptedif the country was flooded with millions, hundreds of millions, thousands of millions of currency. Such attempts to cure the patient is as futile and senseless as to relieve a man sinking under repeated drunken debauches by administering a stiff drink every five minutes. Cure will never come to the sick man in that way, and relief from the ills that are afflicting the great body politic will never be found in the reckless Greenpay out to laborers on all public works a thousand 'million of dollars. But, as we have said, dangerous and fallacious as this sort of quackery would be found to be, making very bad a thousand times worse, it is by no means the only dangerous practice proposed. The Greenback manipulators have other dogmas and other

remedies that are as dangerous as

1. The withdrawal from circulation of all notes of National banks.

2. The entire bonded debt of the United States is to be called in and paid off in greenbacks.

3. That all Government dues are to be paid in greenbacks.

4. That greenbacks are to be made an absolute legal tender in all kinds of business transactions.

5. That there is to be no more issue of bonds, no tax upon the people to pay interest.

6. That printed notes are to be substituted for coin, and faith in the country to be in lieu of gold and

These are some of the points urged by Conventions. They all follow the grand, underlying idea that countless millions of money are to be scattered broad-cast over the land. As the New Orleans Picayune well

They would substitute the rag picker for the miner, the paper mill for the As-sayer's office, and the printing press for the Mint. Their new money must be put in circulation by being paid as wages to all poor men and women who work on public jobs. The currency thus supplied must, in their view, become the revivifying life-blood of transfusion that is to pick up drowning industry by the locks and restore to health our languid commerce. There is to be no more of compulsory idleness, no more hard times, no more scarcity of mo-ney. Paper money is to become the solace of all existing woes and panacea for all pri-

vate and public maladies." Individual manipulators and bushwhackers have given expression to wilder and more agrarian doctrines. They are specious, and are intended to impose upon the gullibility and ignorance of the voters of the country. They are tenets that will destroy the country and reduce it in a decade

demands: "Some demand an income tax that shall increase in rate according to the amount of income. Some require all railroads and other means of general transportation and travel put under the immediate control of State governments. Some ask for a gratuitous distribution of public lauds Some want a trans-continental railway built, with greenback payments for labor. Some want all appointive Federal offices made elective by the people. Some demand that United States Senators shall be elected for short terms, and directly by the people, like members of the lower House. Every form of political heresy finds its advocates somewhere among the Nationals."

The great end and aim of this class of propagandists and revolutionists is to divide out the accumulated capital of the country. They hate all men who have been successful, and agrarianism and communism lie at the very foundation of all their political heresies.

We will only refer now to one point-the question of circulation of money. Is there a scarcity of money in the country? It is stated as a fact that there are \$685,000,000 of coin and paper in circulation. This will give over \$15 to every man, woman and child in the Unitited States, estimating the population at 45,000,000. If there are 9,000,000 of families, with five persons to each family, then this gives, it would seem, an ample sum for weekly expenses. In addition, it is estimated that there are two thousand million dollars on deposit in the banks of the country.

We do not undertake to say how correct these figures are. We give them to let our readers see what is urged by those who insist that there is plenty of money in the country. We are not sufficiently informed to say what amount of circulation the country really requires. The amount in circulation is not equal to that of France, but it may be enough for the uses of the people. The point is that the country can not be relieved by the Greenbacker's wild ideas.

THE RESULT.

By referring to our table it will be seen that the loss and gain thus far is as follows: There is a Democratic gain in Granville, Wake, and the district of New Hanover and Pender, of one Senator each-total 3. There is a loss in the Senatorial districts of Cabarrus and Stanly, Guilford and Alamance, Cleveland and Gaston, and Bladen and Brunswick of one Senator each-total 4. There is a gain in the House of one member each in Franklin, Pender and Wake, and two in Granville-total 5. There is a loss in the House of one each in Rowan, Cabarrus, Wayne, Orange, Moore, Alexander and Bladen, and two each in Cumberland and Robeson-total

One precinct in Brunswick (Town Creek) has been thrown out, and if it is sustained then it will change the result as to the Senator from Bladen and Brunswick, and also give us the Representative from Bladen, which is now counted as a loss. The Legislature will be largely Democratic. The Democratic candidates on the State ticket are elected, of course, as there was no opposition except in the case of one of the candidates for Circuit Judges, Mr. Gudger. There is no doubt, however, of his election.

A railroad agent, Mr. J. C. Andrews, from New Orleans, says that over one hundred deaths from yellow fever had occurred before he left several days ago. He says:

"The fever is specially dreaded because of its malignity, and has proven so far very fatal. Fully fifty per cent. of all the patients have died, and the doctors find it hard to manage. There is a great deal of excitement among the people, who are more affected by the presence of the fever now than they were in 1872, when it was quite prevalent. The very fact that they are quarantined make them all the more anxious to get away, and causes much of the fear and excitement. Escape from the city is now very difficult."

The returns from Orange county show that Josiah Turner not only received the full Republican vote, but that he was supported by about eight hundred Democrats of that county. The Raleigh Observer says he will be an independent candidate for Congress in the Metropolitan District, and thinks, very properly, that if he can retain his present hold on the Democrats of Orange there is great danger of his election.

It cost the 3,500 voters of Liberia a snug little sum to enjoy the luxury of a government. Mr. A. B. Williams states the expenses aggregate \$101,782, or \$29 per each voter. The colored man who leaves North Carolina for Liberia with the hope of bettering his condition is doomed to a sad disappointment. It is somewhat expected in Government circles in Washington that there will be a collision between the U. S. forces under Mackenzie and Mexicans under Oralles. The Mexicans are very defiant. They in turn accuse men from this side of marauding and of poaching on their preserves. It is believed that these charges are merely trumped up as an offset to the charges made against them.

Archbishop Gibbons-The Approach ing Consecration of Bishop Keane. The Baltimore Sun states that Archbishop Gibbons has just returned from a short visit to Cape May and Saratoga greatly improved in health. While away he took part in an ecclesiastical conference held in New York -Cardinal McClosky presiding-for the purpose of electing a President of American College in Rome, in place of Bishop Chatard, lately elevated to the See of Vincennes, Indiana. The election resulted in the choice of Rev. Louis E. Hostelot, of New York, the Vice-Rector of the College. Sunday, August 25th, the eleventh Sunday after Pentecost, has been appointed by the Archbishop as the day for the conse-cration of Bishop-elect Keane as Bishop of Richmond and Vicar Apostolic of North Carolina, providing the bulls arrive in season. The ceremonies will take place in St. Peter's Cathedral, Richmond, and will be of a very imposing character.

Archbishop Gibbons, the head of the
Metropolitan See of America, and so lately himself Bishop of Richmond, will perform the ceremony and act of consectation.

A Singular Case. A few days since two or three men wer coming down the river on a flat, and had reached a point about fourteen miles above this city, when two small, black clouds came nearly together, with the sun shining through the open space, constituting a focus of the sun's rays of such strength and power that a white man, who was steering the flat at the time, and who happened to be in a position to get the full force of the piercing rays, had his back and arms blistered to a cake, and it was found necessary to run the flat ashore with all possible dispatch, when the man in question crawled into the bushes in a shady place to cool off.

After stopping awhile the clouds passed away and the men were enabled to continue

on their course. The party from whom this information was obtained says he saw the back of the man alluded to, and it was in one solid

NEW HANOVER AND PENDER. Intelligence received here last evening enders it certain that A. H. Paddison, Democrat, the present incumbent, has been re-elected Sheriff of Pender county; T. J. Armstrong, Democrat, to the House of Representatives, and W. T. Bannerman. Democrat, Clerk of the Superior Court. There is also no doubt of the election of R. K. Bryan, Democrat, as Senator from the Twelfth Senatorial District, composed of the counties of New Hanover and Pender. The election of Mr. Bryan was brought about by the fact that Sampson, one of the Republican candidates, got the Republican votes of New Hanover, and Wilson, his Republican competitor, got the vote of his party in Pender, while Mr. Bryan carried nearly the entire strength of

-- Charlotte Observer : To-night the ladies of the Lutheran Church will conduct a yard party in the lawn adjoining the Mint. Extensive preparations have been going on several days for a delightful evening's entertainment. The lawn will be prettily ornamented with colored lights, and the ladies will offer all the attractions usually presented on such occasions. In addition to these, a stage will be erected in one corner of the yard, where a series of tab-leaux, charades, dialogues, &c., will be given by the young people. Prof. Ranigan's Band will then and there make its first appearance in this country, and many other interesting and ludicrous features will be represented. — We regret exceedingly to learn that Dr. Elias Alexander, of this city, was stricken with paralysis at his home day before yesterday afternoon, and is now lying in a critical condition. The whole of his right side was paralyzed.

- Charlotte Democrat: Since the adjournment of the Local Ministers' Conference in this city, revival services have been continued in Calvary Mission Church, preaching by Rev. R. L. Abernethy up to Thursday night, and much interest manifested by large congregations. — Mr. A. L. Williamson, a farmer living near the city, brought us a curiosity in the way of a bean or pea pod. It measures two and a half feet in length and contains a pea every two inches. - Dr. Grissom has issued a rejoinder in pamphlet form, in which he thoroughly exposes Hammond, using the most elegant and chaste language, and giving abundant evidence to convict his opponent. Dr. Hammond is the man who was tried as a Surgeon General of the U. S. Army during the war and dismissed from the ser-vice for conduct unbecoming a gentleman. He missed it greatly when he assailed Dr. Grissom, a gentleman and a physician who stands in the front rank in the estimation of Insane Asylum Superintendents of the United States.
