OTHER MINERALS IN NORTH CAR-OLINA.

Washington C. Kerr, State Geologist. Chromic Iron is of common occurrence in the same region.

Manganese-Several veins of the Black Oxide, of considerable extent, have been found.

Barytes is found in large veins in the Western and middle counties, and is exported to the Northern States, to be used, among other things, in the manufacture of paints as a substitute, in part or whole, for the lead carbonate.

Building Stones-Granite, marble and sandstone abound everywhere. Half a dozen Diamonds have been found accidentally in washing gold gravels, some of them of considera ble value.

Oil Shales exist in great thicknes in connection with the coal beds, and yield a large per centage of oil. The other minerals mentioned are

of common occurrence.

Of mineralogical curiosities, there is a larger number found in this State than any other of the United States.

UNWISE AND IMPOLITIC.

Wilson Advance.

Composed as it is of thinking, sei sible men it is not to be expected that every member of the Demo cratic party will agree exactly con-cerning every plank in our platform. We must expect and be prepared to give to individual members some latitude of thought and expression. As long as our party has in it such a large number of intelligent men just so long will there be differences of opinion in regard to the policy of the party, and it is both impolitic and unwise for any man or set of men, to attempt to set up a particalar standard and compel every mem-ber of the party to give it his hearty endorsement under penalties of excommunication.

| Washington Gazette. The Wilmington STAR has pro- pounded a series of questions to the Democratic newspapers of the State concerning various matters of taxa- tion, mainly the tariff and Internal Revenue. The Gazette has expressed its opinion on several previous oc- casions. We agree with the Star in its answers to each question. Do not abolish the Internal Revenue, but wipe out the present system of col- lecting. Place a tariff for revenue on the hazuries, and place the neces- saties, as far as possible, on the free list. We believe this to be sound doctrine.
