NEW YORK, Nov. 23 .- The move ment of the crop, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Nov. 23) the total receipts have reached 222,510 bales, against 242,078 bales last week, 267,-604 bales the previous week and 241,921 bales three weeks since; making the total receipts since September 1st, 1883, 2,198,099 bales, against 1,187,240 bales for the same period of 18×2, showing an increase since September 1, 1883, of 10,859

The exports for the week ending this evening reach's total of 99,640 bales, of which 67,607 were to Great Britain, 13,224 to France and 18,789 to the rest of the Continent, while the stocks as made up this evening are now 931,806 bales.

The weather at the South has been less favorable for the work of gathering the crop; heavy rains have fallen in the Northern belt and the Mississippt valley, causing local floods, and to a slight extent interrupting railroad transportation The movement of the crop has fallen off somewhat and the heavy exports of last week had their influence. On Saturday the market was dull and prices favored buyers, but in the course of Monday and Tuesday there was a considerable advance. Wednesday saw part of this improvement lost, under the cloud of the Franco-China difficulties, which caused some selling to realize. Thursday gave us a quiet but steadier market. To-day there was an irregular advance; November and December were decidedly higher, with hints at a possible "corner" on December contracts, but the later months showed little improvement, and the business, except in December and January contracts, was very small. Cotton on the spot has been quiet but quotations were on Monday last advanced 1-16c. Today there was no quotable advance, but a firmer feeling, and the close was strong on the basis of 101e for middling uplands. The total sales for forward delivery for the week are 377,000 bales.

RANDALLISM.

The Voice of the Press.

Boston Herald, Ind Rep., Low Tariff, Every canvass of the memberselect shows that a majority of them are in favor of a further and of an honest revision of the tariff, with a view to reducing the taxes upon the necessities of the people, and thus preventing a dangerous surplus in the revenues. Mr. Randall is openly ary." After the comparative Scotch opposed to this policy, antagonizing takes "nor" instead of "than" (i. e., it with that device of the pig-iron monopolists, an abolition of the internal taxes upon spirits and tobacco. There would be no doubt of the election of a Speaker opposed to the Randall Kelley combination if the votes in opposition were concentrated instead of divided.

Louisville (Ky.) Courier Journal, Dem. Voting for Sam Randall means nothing in the world except a desire to keep up the war taxes and to keep the Democratic party from obtaining control of the Government next year. Mr. Randall for the Speaker's chair means a Ways and Means Committee so constituted that the subject of tariff revision cannot be taken up for debate; means a deliberate defiance of the popular will, which plainly and unmistakeably is for reduction of tariff taxation.

Baltimore Day, Dem. The Philadelphia Press, Republi-

can and Protection, says: "Abolishing the internal revenue taxes doesn't involve any fine figure-work on the part of anybody and it would reduce the revenues to a point where the surplus would not bother anybody." If the Democratic party wishes to offer itself for a sacrifice next year it should by all means follow the line marked out by these Pennsylvania protectionist newspapers by continuing to tax the necessaries of life all they can bear and putting tobacco and liquor on the free list. This is Mr. Randall's policy and to it he asks the Democratic party to commit itself by electing him Speaker.

New York Herald, Editorial. Is the Democratic party hedging? The last Congress broke up with a feeling of general dissatisfaction wi hathe tariff law that had been passed. The whole drift of feeling in the Democratic party was towards revenue reform by such a revision of the tariff as would remove its protective features. This was to be the main issue in the next Congress.

It was recognized then that Mr. Randall would not be with the party in this agitation, and his opposing views were well known-in fact, so well known that he was generally ranked with the Republicans, as on this main question he was at one time with them.

The prominent opponents of Mr. Randall are Mr. Carlisle and Mr. Cox, who hold views very different from Mr. Randall.

-- The country is in a mighty humor for revenue reform just now, and the Democrats can win if they will pledge it to the people in lan-guage not to be mistaken, and make the issue against protection boldly on the stump. Here in the South we will win on the race issue, tariff or no tariff. But just how the Democrats can hope to carry the . North without accepting the gauge thrown by the Republicans is more than we can see even with the subject illuminated by last Tuesday's calcium light.—Selma (Ala.) Times, Dem.

WHAT A REPUBLICAN PA-PER SAYS.

No Change Unless there is to be Ben

St. Louis Globe-Demecrat, Rep. The Democrat of average intellirence who takes a square look at the result of the recent elections ought to be convinced of one thing, at least, and that is that a Democratic President is not to be elected on the simple proposition that "the Republican party must go." In other words, it has been unmistakably shown that no change is going to be brought about in the control of the government merely for the sake of a change. When it comes to a direct test between the two parties, taking their relative records as they stand the people will continue to intrust the administration of their affairs to the one in which they have confided for over twenty years. Before a change can be effected it must be demonstrated that something is likely

to be gained thereby. BURNETT'S COCOAINE, The Best Hair Dressing in the World. Why Representative Arnot Supports Randall.

ELMIRA, Nov. 25 .- The Hon. John Arnot, the millionaire Congressman elected for this district, said to a reporter this afternoon: "I am a proectionist, and will vote for Randall for Speaker, if there isn't another Democratic Congressman in New York State who takes such a stand. It is supposed that five Democratic Congressmen from this State are for Carlisle, and that most of the others are for Cox, which is generally understood to mean free trade. In reply to the reporter's suggestion that some rank Cox as being half and half, Mr. Arnot said: "Well, I don't want any half and half in this particular, for I've too solid a respect for a protective tariff. I am an out and outer, and that's the kind of man I shall favor and vote for Speaker." Congressman Arnot will leave for Washington the latter part of this week.

Polishing the Wrong End. Many men daily polish their boots who never give a thought to the condition of their hair, except to harrow it casually with brush and comb, or submit it to the paralyzing attentions of the average barber. What happens? Why, this: From neglect, mental anxiety, or any of a score of causes, the hair turns prematurely gray and begins to fall out. Parker's Hair Balsam will at once stop the latter process and restore the original color. An elegant dressing, free from grease.

THE SCOTCH "VERY."

Edinburgh Review.

Scotch is peculiarly rich in adjectives signifying "very." A thing may be freely good, gey good, geyan good, sair good, rael good, deen good, doon good, bias or byous good, and these are only a few of them. Some of these are confined to certain districts. Strike of Railroad Freight Handlers at New Orleans-A Business Fail-

NEW ORLEANS, Nov. 27 .- The railroad freight handlers continues to cause much trouble to officials of the roads, but they report that they are making fair progress with their business. Most of the roads have brought laborers from other oints. These the regular hands capture as fast as they arrive, giving them food for a day or two and then enough money to pay their way home. Superintendent Williams, of the N. E. R. R., say that his company will not submit to the dictation concerning the employment of laborers. They are willing to give employment to citizens in preference to strangers, but now the strikers demand that only union men shall be employed. No question of wages is involved. A Texas Pacific official said to-day that the roads would continue to bring aborers from other points until there laborers from other points until there would be more men than the strikers could take care of. Railroad men do not appear to think that the strike will last long, but the strikers are firm and confident of ultimate success. By proclamation, in 1863, the President directed that the Tax Commissioners in South Carolina set apart certain lands that have been bought in by the Commissioners for the government and sell them. The lands had previously been sold because of the refusal of the owners to pay the direct tax levied by the government. There was a provision that half the proceeds of the land sold by the President's proclamation should be returned to the State; onefourth as a fund to aid in the colonization or emigration from the State of any person of African descent who desired to remove to Hayti, Liberia or any other tropical clime, and the remaining fourth to reimloyal citizens. The State entered claim for the proceeds of sale of the lands. The Bureau of Internal Revenue is of the opinion that only the fourth to reimburse loyal citizens may be refunded, claiming that subsequent legislation is contrary to the spirit of the provision concerning the fund for colonization. The Commissioner recommends that the claim of the State to the amount of \$60,375 be allowed. Comptroller Lawrence, in a decision on the same case, opposes any sum being refunded. Owing to the Comp troller's decision, opinion is expressed in the Internal Revenue Department that as the State of South Carolina is indebted to the United States in direct taxes charged against lands to the amount of \$152,181, the

claim may be allowed as an offset. FOREIGN.

Denial of the Report of English Mediation on the Tonquin Question-France Rescinds the Decree Forbidding the Importation of American Pork-Painful Rumors of Disaster to the French Forces in Tonquin.

Paris, Nov. 27 .- A rumor was current this evening in the lobbies of the Chamber of Deputies that Admiral Courbet with his forces had been defeated in Tonquin by the Black Flags and his communications cut off. The rumors were given more cre-dence because no official information is forthcoming. There is considerable uneasiness felt at the absence of news from Admiral Courbet's expedition.

LATER.-Excited crowds thronged the boulevards until a late hour to-night eager ly discussing the rumors of a French defeat in Tonquin. The reticence of the gov-ernment was much commented upon. Several members of the committee on Tonquin Credits urged Prime Minister Ferry to abandon his reserve and inform the Cham-ber of the position of affairs. In view of this state of things, the following semi-official communique was sent to the papers: "We are authorized to declare that up to the moment of going to press the govern-ment has received no dispatch from Ton-quin unfavorable to the French. Unfounded Report Relative to the Appointment of a Nuncio to America - The Vatican and the United States - Fallure of a Ship-building

[By Cable to the Morning Star.] LONDON, November 27 .- The Times correspondent at Rome says the report that the American Bishops have proposed that the Vatican send a Nuncio to America, is unfounded. The report probably arose through a misapprehension of the fact that the Vatican thinks of sending Monsignor Sepiacci to preside, as Apostolic Legate, over the labors of the Council to be held in America in 1884. The American Bishops are here to make arrangements for the Council. Monsignor Sepiacci may remain in America to carry the labors of the Council into effect, and afterwards to maintain direct communication between the Vatican and the Church in America.

The question of the reopened diplomatic relations between the Vatican and America has not been mooted. Moreover remembrances of the circumstances which led to the recall from Rome, in 1867, of Gen. King, the American representative, will doubtless operate against any augges-tion of the kind being favorably viewed by the American Congress.

The flames which were first dis-covered at 1 o'clock, A. M., spread rapidly, sweeping away before them every business building in the place, including the postoffice and two newspaper offices. There were no adequate facilities for fighting the fire, which made rapid headway. Will. Roberts, Chas. Roberts and Fred Roberts was crushed by falling timbers, and Thos. Dorman, Jno. Samuel, Thos. \$4,000. CURRENT COMMENT.

--- The sharp contest over the Speakership now going on means very much more than the defeat or the success of either Mr. Randall or Mr. Carlisle. It is the contest between the faction which has no faith in Democratic declarations and no confidence in the capacity of the majority of the party to conduct itself discreetly, and the faction which, without experience, is convinced that the Democratic party, by making good its professions, can commend itself to the country. It is this difference of opinion which gives the contest its present significance.-Boston Journal, Rep.

-- If Mr. Randall be chosen things will remain as they are. If Mr. Carlisle be selected for Speaker there may be some changes, but they will be of the kind which come as the seasons come, without producing shock; while if Mr. Cox be elected we shall have a house resolved undoubtedly upon reform, and yet under the direction of a thoroughly in telligent man.-Brooklyn Eagle, Dem. WHY WE ARE SICK.

No device that can add to the comfort and convenience of a dwelling is omitted in our modern architecture, and money is not regarded when the luxury of clothing or beauty of personal adornment is in question. Hence we all live in better houses and wear better clothes than did our forefathers. Why should we not take the same better care of our health? Why should dyspepsia, and the train of diseases that follow it, almost unknown in the olden time, he so prevalent now? Simply olden time, be so prevalent now? Simply because of the poisonous and indigestible trash which in these days is forced upon the public as genuine food, or used to adulterate those articles that go to make up the delib bill of force of the daily bill of fare of every household Our forefathers were content to make money by plain and honest methods; but the hot competition of the present day and the strife for rapid riches have called forth all the ingenuity of modern science to de-vise cunning deceptions that shall enable the avaricious dealer to more rapidly in-crease his profits, even though he destroyed the health of the public thereby. The consequence is adulterated, impure, poison-ous and house food on avery hand

ous and bogus food on every hand.

The people buy these adulterated articles of food because they are cheap, entirely ignorant of their poisonous qualities. A few years ago this evil had reached such alarming proportions in England that the public sentiment demanded legislative interference, and parliament enacted the most severe repressive laws. Dr. Small, U. S. A., after an examination recently made under the direction of the War De of food is as great in this country to-day, and of as dangerous a character, as it was in England at the time referred to. No article entering so generally into the food of every family has been found more villainously adulterated than baking powder. For the purpose of underselling an absolutely pure powder like the "Royal"—which has become the standard for purity and strength in baking powders-hundreds of dealers are putting up baking powders with cheap and adulterated cream of tartar containing lime, earth, etc., adding strength by the free use of alum. These powders are sold cheap, but their use is expensive, for they are one of the chief causes of the dyspepsia from which the American peo-ple are suffering. This species of aduleration, at least, can be avoided by follow ing the advice of Prof. Mott, the chemist to the Government, who recommends consumers "when purchasing baking powders to select one standard powder, as the 'Royal Baking Powder,' rather than to risk purchasing adventurous compounds put upon the market by persons who have no higher notive than dollars and cents.

We hope to see Congress take hold of this important matter in a sufficiently vigorous manner to put an end to the whole nefarious business. In the mean time, if people will be as careful to buy the best and purest food as they are to wear the best clothes and build the most comfortable houses, it will not be necessary to ask so frequently the question, "Why are we sick?" Every scientific test has proven the 'Royal" to be pure and wholesome.

A Lady Robbed of her Teeth.

She was a beautiful young lady of about twenty, and lived in Philadelphia. It was years ago, when physicians used to administer a liquid preparation of iron by means of quills or glass tubes, so that it could be swallowed without coming in contact with the teeth. This young lady had been prostrated by a severe attack of illness, and iron was given to her to restore her to something like her former condition of health. By some mismanagement, or possibly by her own carelessness, she took the doses of iron in such a way that they touched her teeth. She thought her teeth were hard enough, and did not realize the power of the chemicals contained in that preparation of iron to eat through the enamel and honeycomb the teeth. The consequence was that her teeth, which had been an exceptionally faultless set, were utterly ruined. First the enamel went. Then the substance of the teeth became like chalk, and soon nothing was left but a lot of unsightly Had Brown's Iron Bitters then

their place.

The beauty of the iron contained in Brown's Iron Bitters is that it is a pure preparation, free from every injurious feature or ingredient. It cannot do harm, nor can it fail to do good. This preparation of iron is the only one that can be taken without damage to the teeth.
